ARHIVA I.N.G.G. „ANA ASLAN". PAKISTAN (serie). PACIENȚI (sub-serie). DOSAR (A-T)

Documentele au număr de înregistrare primit la INGGAA.

Conține scrisori din decadele '50-'80.

Limbi : engleză, română (adnotări, traduceri și unele documente medicale), germană, franceză.

Documentele au fost ordonate alfabetic.

Scrisorile sunt manuscrise și dactilografiate. Documentele sunt originale și/sau copii.

Majoritatea scrisorilor și documentelor medicale sunt grupate pe corespondența dintre pacientul respectiv și INGGAA sau între firme și INGGAA.

Hârtie de diferite dimensiuni și compoziție, 1 prospect de medicamente, plicuri, 1 carte de vizită, tăieturi din ziare, extrase din reviste, telegrame, copii de pașaport.

Conținut:

Corespondență între pacienții din Pakistan și prof.dr. Ana Aslan, ca reprezentant INGGAA. Dosarul conține, în cea mai mare parte, scrisori de la pacienți care vor să se interneze, au fost internați sau vor să revină, însă conține și scrisori profesionale și personale de la medici (A.S.M.T. Hossain, Noor Jehan Hameed, M. Qamar-ul-Haque, M.A.J. Abbasi, M. Monawar Ahmad, Noormonmed, Manzoor Ahmad Qureshi, M.S. Qureshi, W.A. Ritschel).

Scrisori medicale, rapoarte medicale, hemograme, examene radiologice, redirecționări de scrisori dinspre institut spre diverse instituții (IMECO, Ministerul Turismului, Oficiul Național de Turism „Carpați") sau invers, adrese.

Pacienții solicită informații referitoare la produsele medicale (și formulele lor), la tratament și la internarea în clinica INGGAA, achiziționarea produselor INGGAA, documentație științifică, reprezentanță pentru difuzarea produselor INGGAA, rezervări și programări pentru tratament, scheme de tratament.

Majoritatea scrisorilor trimise de către pacienți sunt adnotate la începutul scrisorii, partea de sus, sau subsol, de către Institut – rezumat al solicitării pacienților, în special datele conținute referitoare la bolile de care suferă pacientul, sau diferite indicații. Sunt prezente adnotări anexate scrisorii originale (reprezentând răspunsul dictat sau rezumatul scrisorii). Trei scrisori au atașate traducerile (din engleză).

Sublinieri pe unele scrisori ale pacienților: vârsta, bolile de care suferă pacientul, tratamente urmate.

Scrisorile de răspuns conțin semnătura, în original, a prof. dr. Aslan sau, în absența acesteia, a reprezentanților INGGAA (semnătura directorului adjunct dr. C. David).

Conține corespondența cu Fazl-i-Ahmad, președintele companiei Hala Enterprises Ltd., care dorea informații despre Gerovital H3 pentru tratamentul lui și al soției.

Conține scrisoarea adresată de A.A. Bugno, absolvent de Medicină, care solicita documentație științifică întrucât nu putea să-și procure singur materialele necesare pregătirii medicale.

Conține corespondența cu Rahim Bux Khan, președinte „Buxly Paints Limited", în calitate de pacient. În cadrul acesteia se află și corespondența cu fiul Tasmeen A. Khan, aflat în R.F.G.

Conține corespondența cu Sher Zaman Khan, președinte al „Public Accunts Committee Civil Secretariat", în calitate de pacient.

Conține scrisorile adresate de prof. Ana Aslan d-lui Hakim Mohammed Said, ministrul Sănătății din guvernul pakistanez, în care mulțumește pentru scrisoarea adresată de acesta cu ocazia decernării medaliei și premiului „Leon Bernard".

Conține examenul de laborator pentru Shamsal Alan, ambasador al republicii Bangladesh.

Conține un schimb de adrese cu ambasada Pakistanului. Scrisoarea pakistaneză a fost trimisă cu valiza diplomatică a premierului.

Conține buletinele de analiză ale Dehlavi Samiulla Khan, ambasadorul Pakistanului la Moscova.

Conține corespondența cu James Ilett, reprezentant al „United Nations Development Programme", care s-a internat în clinina INGGAA, împreună cu soția.

Conține dosarul editorului „Pakistan Hotel and Travel Review", S.W.A. Maulai, în calitate de pacient.

Conține corespondența cu Sibte Yahya Naqvi, secretar adjunct în ambasada Pakistanului. Acesta solicita material bibliografic în numele mai multor cetățeni pakistanezi.

Conține corespondența cu echipa editorială a revistei „The Medicus", în care erau solicitate informații în vederea scrierii unei cărți.

Conține corespondența cu homeopatul Walter Money, interesat de Novocaină, formula acesteia și literatura științifică aferentă.

Conține corespondența cu B.A. Sajid, membru al „Pakistan Academy of Letters". În scrisoarea acesteia vorbește despre un articol publicat în „Urdu World Digest", cu privire la competența prof. Ana Aslan de a trata pacienții vârstnici.

Conține corespondența cu e.K. Tandoh, reprezentant al „Ghana High Commission", în calitate de pacient. În scrisoarea acestuia este menționat numele ambasadorului Ghanei în România, E.K. Dadzie, care îl sfătuise să se adreseze clinicii.

Respected Dr. Ana Aslan,

I read with great interest the pioneering research work being done for arresting old age under you enlightened leadership. and I am greatly interested to have detailed information in this field.

For your kind information I am a highly experienced technical + scientific person having spent 9 years in Scientific research.

Kindly also send me literature on "GEROVITAL-H3" (as injection and as a cream for external application on skin).

An immediate reply in the matter is highly desired for which I shall be highly obliged.

Thanking you.

Yours Sincerely

My dear Prof.Dr. Ana,

There has been a slight change in our schedule of reaching Bucharest. We will now be reaching on the 6th of May via Flight No.SR 462 arriving Bucharest at 15-05 hrs. instead of previous programme of reaching on the 2nd May, 1985. I hope this change will not cause you much inconvenience. However I sincerely regret this change and hope you will be able to accommodate us accordingly.

Kindly instruct Hotel Flora to reserve a double-room for us and arrange transport for us from the Airport to the Hotel.

With best regards,

Yours Sincerely,

f Ahmad

Dear Prof.Ana Aslan,

I am glad to receive your kind letter of March 9th on 25th instant. Soonafter the receipt of your letter intimating that you will not be available till 1-5-85, I changed the itinerary to 2-5-85. I hope you will have received my letter also to this effect.

My programme now is as under :

(1) Arriving Bucharest by Flight No.SR 462 at 15-05 hours.

(2) I have already telexed Flora Hotel to reserve a Double Room with Ppivate Bath Room from 2-5-85 to 14-5-85 on which date I and my wish to return home. However, if longer stay is required, we will re-arrange accordingly. I may again request you for your personal attention and treatment of my wife.

(3) According to our re-arranged programme we will be in Athens till 17-4-85 morning and will fly to Amsterdam the same day. It will be a pleasure to meet you there.

I hope you will be kind enough to treat my wife yourself.

With regards,

Yours Sincerely,

(Fazl-i-Ahmad).

Dear Prof. Aslan,

I acknowledge your letter dated January 5th, 1985. It appears the month has been by an error written as January instead of February. In this time I had already fixed up my programme of reaching 2nd April and sent you a telex message, a copy of which is enclosed, getting your approval. Since then I have heard northing at all. I have now fixed my programme according to your advice and will be reaching Bucharest on 2nd May 1985 by Flight No. S.R.426, the arrival time being 15.05. Kindly make necessary arrangement for transport and availability of a double private room with a bath room in the best clinics for the check up and diagnosis of my wife

I may like to inform you that we have planned to fly back on the 14th of May 1985 by a Romanian Airliner flying to Athens at 7.45 in the morning. I hope this time will be enough for her check-up and final diagnosis and more of treatment.

Thanking you,

Yours Sincerely,

(Fazl-i-Ahmad)

Dear Mr. Fazl-i-Ahmad,

I received your letter and I am sorry that you have not yet received my previous letter by which I asked you if possible to come in May, because in April I am abroad.

However we made the required reservation for you and your wife at the Otopeni Clinic for April 2nd and asked someone to meet you at the airport at 18.35 o'clock. In my absence, my collaborators will take care of you and of your wife.

On April 16th I shall be in Athens. If you want, you may call me at Hotel "Grande Bretagne" telephone : 3230-251.-

As regards your request to market our products in Pakistan, when you come to Bucharest, please get in touch with The Romanian Foreign Trade Company "Chimimportexport" - Blvd. Republicii 10, Bucharest; telephone: 13.04.46. - and they will give you all the necessary information.

With kindest regards,

Feb. 17, 1985.

Dear Prof. Aslan,

I beg to draw your kind attention to my letter of Jan. 13 to which I am awaiting a reply. I also beg to draw your kind attention to para-3 of the said letter which needs some clarification as I do not need any medical treatment for myself. I only need a medical check up of my wife and to stay with her during the period of her treatment in Bucharest.

We have finalized the programme and will be arriving on 2nd April 1985 from Athenes on Flight No. RO 242 landing Bucharest at 18.35 hrs. Kindly make suitable arrangements for us of transport from the Airport to the Clinic and for a Private Room with a bath room in any of the Clinics where you are available for the ehck up and diagnosis. Hoping to meet you on the 3rd of April 1985 when the treatment will start. On the 17th of April we have fixed our departure for Medrid and hope we will be free by 16th April's evening so that we can travel on mid-day of 17th. I hope this fortnight will be enough.

I did make a request that to market your products in Pakistan one of my Companies will be deeply interested in working on agency basis. Would you be kind enough to let me know how to go about?

With best wishes,

Yours Sincerely,

(Fazl-i-Ahmad)

Jan. 13, 1985.

Pakistan

Vrea să vină cu soția pe 15 aprilie, — să vină după 1 mai când este Dna Prof. Dumitrana. —

Dear Prof. Ana Aslan,

I am to acknowledge receipt of your kind letter of November 27th, 1984 only recently. It appears my letter dated December 5, 1984 has either escaped your attention or it has not reached you. I am enclosing its copy for your reference and reply. I also asked you in my letter of November 11, 1984 that my business Company will like to be appointed your agents for the marketing of your products in Pakistan. I am confident we can develop the market here.

We have provisionally fixed the programme and hope to reach by 13-4-1985 so that after a day's rest my wife can be taken up for treatment on Monday the 15th April, 1985.

May I ask one clarification that when we both occupy a double room either in Otopeni Clinic or Flora Geriatric Cure Hotel, whichever is better for treatment and stay comforts, when only one is a patient and the other one an attendant, will the charges be the same for both?

As soon as I have finalized the travel arrangements, I will give you the Flight No., timing of arrival etc. so that suitable reservation is made for us, in advance, and confirmed. I hope my wife will have your personal attention for check-up, diagnosis and treatment. We will actually be travelling all the way for you and your expertise. I hope you will oblige and not disappoint us. We have heard so much of you that we look forward to our being treated by you.

With regards,

Yours Sincerely,

Fazl-i-Ahmad

Nov. 11, 1984

Sub: USE OF GEROVITAL H3

My dear Dr.A.Aslan,

I have used the above product for a number of years - though with breaks - and feel I have been benefitted by its use. Since a year I am using it regularly and hope to keep it up I had heart problem and have undergone a bypass surgery at Stanford University Medical Center by Dr Shumway in 1981. I hope Gerovital H3 can be used by me. Please advise.

My wife is suffering from Osteo Artheritus for more than 10 years or so Since last few years it is worsening and her wrist, ankle and knee joints pain She had her left shoulder frozen in 1981 and restored by physiotherapy Now her right shoulder is frozen. She has fibrositoes at the back of her neck and the movement of the neck is painful and restricted. She also has Blood Sugar high level and high Blood Pressure Both of these are under control with medication. This is the brief resume of her problems We have read an article in a local magazine giving more details of the uses of your product i.e Gerovital H3 in Cream, Tablet and Injection form - as also the message and hydrotherapy that you give in your country. I would like to be advised on her treatment in the following manners :-

1- Which of your product be used by her - Gerovital H3?

2- Is injection advisable ? If so, of what strength and how many times a week ?

3- Would you recommend a visit to Romania and start a vigorous treatment under your care for some time and then come back for a follow up as advised ?

I will be grateful if you send me details of the charges of her tratment I will be accompanying her and my stay charges will be extra. This will help me to arrange funding of the trip before it is undertaken.

~~contd+++/2+~~

=(2)=

May I also request you to consider my Company being appointed as your products' Sale Agents in Pakistag ? I hope you will be able to promote sales if you so desire. I hope you will consider the request favourably.

I do hope you will not mind my writing to you this demi-official letter and seeking your guidance. I also hope you will send an early detailed reply and oblige.

Thanking you,

Yours faithfully,

Dear Mr. Fazl-i-Ahmad,

In answer to your letter I have to inform you that Gerovital H3 is useful both for you and for your wife. So that it is better for both of you to come to us.

We generally recommend a stay of two weeks necessary for medical examination, laboratory tests and a course of treatment under our supervision. Afterwards it is continued at home according to the indications received here.

Enclosed herewith you have our conditions.

When you and your wife decide to come, please, let us know in time the date of your arrival, in order to make a reservation.

Waiting for your reply, I remain

Yours sincerely,

Acad.Prof. Ana Aslan, M.D., D.Sc.

Sub: USE OF GEROVITAL H3.

My dear Dr.A.Aslan,

I have used the above product for a number of years - though with breaks - and feel I have been benefitted by its use. Since a year I am using it regularly and hope to keep it up. I had heart problem and have undergone by-pass surgery at Stanford University Medical Center by Dr.Shumway in 1981. I hope Gerovital H3 can be used by me. Please advise.

My wife is suffering from Osteo Artheritus for more than 10 years or so. Since last few years it is worsening and her wrist, ankle and knee joints pain. She had her left shoulder frozen in 1981 and restored by physiotherapy. Now her right shoulder is frozen. She has fibrositoes at the back of her neck and the movement of the neck is painful and restricted. She also has Blood Sugar high level and high Blood Pressure. Both of these are under control with medication This is the brief resume of her problems. We have read an article in a local magazine giving more details of the uses of your product i.e. Gerovital H3 in Cream, Tablet and Injection form - as also the message and hydrotherapy that you give in your country. I would like to be advised on her treatment in the following manner :-

1- Which of your product be used by her - Gerovital H3?

2- Is injection advisable? If so, of what strength and how many times a week?

3- Would you recommend a visit to Romania and start a vigorous treatment under your care for some time and then come back for a follow up as advised?

I will be grateful if you send me details of the charges of her treatment. I will be accompanying her and my stay charges will be extra. This will help me to arrange funding of the trip before it is undertaken.

May I also request you to consider my Company being appointed as your products Sale Agents in Pakistan?. I hope you will be able to promote sales if you so desire. I hope you will consider the request favourably.

Dear Dr. Ana:

You will kindly recall that some time back, last year, I wrote to you about bringing my mother over to your Clinic and you were kind enough to send some details about your Clinic vide your letter No.PC/5054 dated 23.7.1975.

Due to some preoccupation in business I was not able to avail of this opportunity at that time. I have now decided to bring her over to your Clinic in the last week of July. I therefore request you to kindly reserve one room with bath for her and let me know the date by which she should reach Bucharest.

In addition to the above I would request you to kindly arrange a room for me in any first class hotel near the Clinic as I would like to stay there during my mothers treatment.

Awaiting your early response, I remain,

Yours sincerely,

(HUMAYUN FAREED)

Dear Mr. Rahim Bux Khan,

Thank you for everything-the Pakistan Handicraft which are marvelous, your letter and the book you sent me. I read it and I think it really is a guide for life to the young generation.

They have many things to learn from your failures and especially from the right principles - truth and dynamism - which are crossing your life like a red wire.

I am sorry I was abroad when Dr.(Mrs) Noor Jehan Hammed came to Bucharest.

I should be happy to pay a visit to Pakistan and to meet you in Karachi.

If I receive an invitation I might link it to other visits when I am near your country.

Thanking you for all your kind regards and hoping to hear from you again,

Yours sincerely,

Acad.Prof.Dr. Ana Aslan, M.D., D.Sc.

Our Ref. GD. 2114 *Date* March 13, 1978

Dear Professor Aslan,

You would recall that Dr.(Mrs)Noor Jehan Hameed, who is the wife of the Secretary of my Company, had been in correspondence with you to seek your advice in respect of her illness. I now understand that she is flying out tonight on her way to Bucharest, which obviously means that all arrangements are now set for her departure. I hope your wide knowledge and experience and the efficient method of treatment of various diseases will be of great help to her in her treatment also, for you must have treated numerous patients of their intricate diseases. The patient herself being a physician will, I hope, duly respond well to your therapeutic requirements.

I am pleased to avail of this opportunity in sending to you, through the courtesy of Dr.(Mrs)Noor Jehan Hameed, a couple of packets of Pakistan handicraft articles as my present and I hope you will oblige me by accepting same.

I hope in the meantime you also received the copy of my book " DYNAMISM - an Elaboration " which I had forwarded to you per regd. post, sea mail on 17.1.1978 Of course, the subject might appear somewhat dry, for it is intended to be diffused in a certain section i.e. the young men. Please do let me have your views, when you find time to go through it.

...2....

Please do let me know if I can be of any service to you from Pakistan and in the meantime I have been eagerly looking forward for you to pay a personal visit to my country, which is on very friendly relations with yours. So, let us, on personal level also try to further strengthen these ties. Therefore, Please do find some means to meet us in Karachi.

My health does not permit me to travel any more and it is due to eye sight as also the general feebleness of the physique. Otherwise, I would certainly have flown out to Bucharest for a few days stay at the Geriatrics Institute which has been helpful in restoring the health of so may people, as I know of.

With very kind personal regards,

Yours sincerely,

(RAHIM BUX KHAN)

Our Ref. GD. 2206 *Date* June 20,1977

Dear Dr. Aslan,

I am indebted to you for your prompt reply dt. May 25,1977 (which reached me on the 13th of June,1977) and for the concern that you have shown therein for my health. My daughter, Mrs. Kaisar Sultana Khan, has also requested me to thank you on her behalf for the information provided for her.

I am leaving for Germany, on the 23rd instant, accompanied by my wife, in response to a long standing invitation from my daughter, who is a medical practitioner there, although, as things stand, we both were not very fit to travel.

I am carrying with me a small souvenir for your goodself, as a token of friendship and affection for you which I would like to send on to you from Germany. I wonder if you have any contacts in Germany, or for that matter in Belgium who would help me in this regard. If so, please advise me of his address, at my daughter's place, as under:.

Dear Mr. Khan,

I am sorry to hear that you have no improvement in your eye sight. It is well at least that you have noticed an improvement of your general condition. I think it is better to continue the treatment according to the indications, and to keep us informed about your further condition.

As regards your daughter, Mrs. Kaisar Sultana Khan, she may order Gerovital H3 face-cream and lotion to our Foreign Trade Company - CHIMIMPORTEXPORT, Bucureşti 1, Bd.Republicii 10, tel.: 16.34.63 - 16.45.80. I have already informed them about her wish.

Looking forward to hear better news from you and wishing you all the best, I remain with my kindest regards,

Yours sincerely,

Our Ref. GD. 1981

Date May 16, 1977

Dear Professor Aslan,

I have to acknowledge with many thanks your kind letter of 14.4.1977 received on 29.4.1977 and I am grateful to you for the information conveyed by you that life activity and the clinic are functioning as usual and that your staff is also in pafect shape and form.

I think you are aware of the conditions prevailing in our country since the last Elections on 7.3.1977. The dispute is still continuing but efforts are being made to bring about a compromise between the ruling and the opposition parties and it is hoped that something definite will emerge out of the deadlock.

I am sorry that I have not been able to report to you after the completion of my fourth course of injections/medicine around the middle of February because, firstly, I had to wait for sometime for some results --that is according to your advice, so I was abiding by it and was not anxious to write till there was something tangible to report, and secondly I had asked my doctor, who attended me throughout the treatment, for a report on my condition which however was delayed owing to the conditions here. However, he has now given me a report which is addressed to you and is enclosed herewith. I am only sorry that this letter, which had been dictated about 10 days ago, could not be completed earlier.

Now, on my part, the things that I have to report are that I have very slightly improved physically; I am not feeling so weak now as I was, before the course of treatment of treatment prescribed by you. I do not find any perceptible change towards my eye sight which in the meanwhile has, as already reported to you earlier, fallen down considerably. The vision has become elusive, sometime making things look cearly while at other times it is quite blank from which I conclude that the condition of atrophy of the optic nerve has not improved. My only concern at the moment and for the future is some improvement in the eye sight and the surgeon who performed the operation says affirmatively that there is no likelihood of any improvement and nothing in the world can help me in this regard because of the atrophy of the optic nerve and the strenuous effort that the blood passage has to make for movement.

Dear Madam, I really do not know how to thank you for the attention and humane treatment that you have shown to me in my ailment, feeling sure at the same time that you will not hesitate to help me further if it lies in your power to do so. Onething I want to remind you is that the medicines sent by you to me so promptly and so considerately through the diplomatic channels has not so far been paid for by me. So, I would thank you to let me have the bill for same because I will have to obtain permission from the State Bank of Pakistan which, if granted, will enable me to remit the amount to you in due course of time.

I want to trouble you a little further to seek help from you for the sake of my daughter. Her name is Mrs. Kaisar Sultana Khan and she runs a famous Beauty Clinic by the name 'Kaisarin' in Karachi. She is a qualified Beautician from London, Paris and Germany and she has asked me to request you to find out about some sort of treatment for keeping in form the facial beauty and the skin of women. She had come to know of some sort of a cream or a lotion, said to be available in Romania and made there, but unfortunately she does not know any further details as to the origin, the source of availability and the like. But it is evidently very popular as an effective treatment. So, I shall be very grateful to you to let me know if you can help her in this respect. She will take up the Agency for the whole of Pakistan and if necessary, she may go to Romania in order to establish contacts in this respect.

Hoping to hear from you at your early convenience and with my most profound regards to your goodself and good wishes for your staff, I remain,

Yours sincerely,

Dear Professor Arsalan,

REGARDING MR. RAHIM BUX KHAN, AGE 84 YEARS.

Mr. Rahim Bux Khan is an old patient of yours. He has severe Ostio Ortharitist of the Back and Shoulders. For last 14 years, He has been suffering from Chronic Glaucoma of both eyes. A few years ago he was opperated upon his right eye for Chronic Glaucoma, but unfortunately lost its sight. The pressure in the left eye was kept in control but his vision slowly deterioreted as he developed Cataract. This Catract was removed last year and he started seeing better. But gradually vision deterioreted. The Eye Specialist under whose treatment he is, have diagnosed Atrophy of the Optic Nerve.

At this stage he wrote to you and you very kindly sent four cources of Aslavital Tablets and Injection which were given to him over a period of about 6 months. His vision is going down day by day and now he cannot see properly as his vision has become quite blurred. During this period hearing of Mr. Rahim Bux Khan also got affected and now he requires a hearing aid to help him.

I shall be grateful for your further advise.

With best regards.

Yours Sincerely,

Our Ref. GD.1981 *Date* May 16,1977

Dear Professor Aslan,

I have to acknowledge with many thanks your kind letter of 14.4.1977 received on 29.4.1977 and I am grateful to you for the information conveyed by you that life activity and the clinic are functioning as usual and that your staff is also in pafect shape and form.

I think you are aware of the conditions prevailing in our country since the last Elections on 7.3.1977. The dispute is still contiming but efforts are being made to bring about a compromise between the ruling and the opposition parties and it is hoped that something definite will emerge out of the deadlock.

I am sorry that I have not been able to report to you after the completion of my fourth course of injections/medicine around the middle of February because, firstly, I had to wait for sometime for some results --that is according to your advice, so I was abiding by it and was not anxious to write till there was something tangible to report, and secondly I had asked my doctor, who attended me throughout the treatment, for a report on my condition which however was delayed owing to the conditions here. However, he has now given me a report which is addressed to you and is enclosed herewith. I am only sorry that this letter, which had been dictated about 10 days ago, could not be completed earlier.

Now, on my part, the things that I have to report are that I have very slightly improved physically; I am not feeling so weak now as I was, before the course of treatment of treatment prescribed by you. I do not find any perceptible change towards my eye sight which in the meanwhile has, as already reported to you earlier, fallen down considerably. The vision has become elusive, sometime making things look cearly while at other times it is quite blank from which I conclude that the condition of atrophy of the optic nerve has not improved. My only concern at the moment and for the future is some improvement in the eye sight and the surgeon who performed the operation says affirmatively that there is no likelihood of any improvement and nothing in the world can help me in this regard because of the atrophy of the optic nerve and the strenuous effort that the blood passage has to make for movement.

Head Office: E/20, S. I. T. E., POLYTECHNIC ROAD, KARACHI-16.
Factories At: KARACHI, CHITTAGONG, BEIRUT, KUWAIT.

Dear Madam, I really do not know how to thank you for the attention and humane treatment that you have shown to me in my ailment, feeling sure at the same time that you will not hesitate to help me further if it lies in your power to do so. Onething I want to remind you is that the medicines sent by you to me so promptly and so considerately through the diplomatic channels has not so far been paid for by me. So, I would thank you to let me have the bill for same because I will have to obtain permission from the State Bank of Pakistan which, if granted, will enable me to remit the amount to you in due course of time.

I want to trouble you a little further to seek help from you for the sake of my daughter. Her name is Mrs. Kaisar Sultana Khan and she runs a famous Beauty Clinic by the name 'Kaisarin' in Karachi. She is a qualified Beautician from London, Paris and Germany and she has asked me to request you to find out about some sort of treatment for keeping in form the facial beauty and the skin of women. She had come to know of some sort of a cream or a lotion, said to be available in Romania and made there, but unfortunately she does not know any further details as to the origin, the source of availability and the like. But it is evidently very popular as an effective treatment. So, I shall be very grateful to you to let me know if you can help her in this respect. She will take up the Agency for the whole of Pakistan and if necessary, she may go to Romania in order to establish contacts in this respect.

Hoping to hear from you at your early convenience and with my most profound regards to your goodself and good wishes for your staff, I remain,

Yours sincerely,

(RAHIM BUX KHAN)

Dear Professor Arsalan,

REGARDING MR. RAHIM BUX KHAN, AGE 84 YEARS.

Mr. Rahim Bux Khan is an old patient of yours. He has severe Ostio Ortharitist of the Back and Shoulders. For last 18 years, He has been suffering from Chronic Glaucoma of both eyes. A few years ago he was opperated upon his right eye for Chronic Glaucoma, but unfortunately lost its sight. The pressure in the left eye was kept in control but his vision slowly deterioreted as he developed Cataract. This Catract was removed last year and he started seeing better. But gradually vision deterioreted. The Eye Specialist under whose treatment he is, have diagnosed Atrophy of the Optic Nerve.

At this stage he wrote to you and you very kindly sent four cources of Aslavital Tablets and Injection which were given to him over a period of about 6 months. His vision is going down day by day and now he cannot see properly as his vision has becoma quite blurred. During this period hearing of Mr. Rahim Bux Khan also gote affected and now he requires a hearing aid to help him.

I shall be grateful for your further advise.

With best regards.

Yours Sincerely,

M. Q. Qu

BUCHAREST (ROMANIA)

HEARTILY SYMPATHISE IN NATIONAL EARTHQUAKE
TRAGEDY STOP ANXIOUS ABOUT YOUR WELFARE
PLEASE INTIMATE - RAHIMBUXKHAN BUXLY "

The news of the widespread damage wrought by the recent earthquake jolts in the Eastern regions of Europe, with grim devastation in Bucharest and other Romanian cities, have shaken us up and we have been deeply grieved. The deep feeling of friendship that exists in Pakistan for Romanian people has therefore caused us all the more to feel concerned at the great loss and suffering.

I have naturally felt deeply concerned and anxious about the welfare of your goodself and your worthy colleagues and was therefore prompted to flash out the above cable to seek the news of your welfare. I hope when time permits you to do so, you will be kind enough to intimate to me about your welfare.

A few days ago, I received your letter No.300 dt.3.2.1977, to which I shall reply in due course of time after I hear from you.

With kindest thoughts and prayers for your welfare,

Yours sincerely,

Rahim

Dear Dr. Qureshi,

Thank you for Mr. Rahim Bux Khan's medical report sent to me. Of course it is very difficult to act in such a severe case. The medicine may improve his general condition however. So that I consider necessary for him to continue the treatment, according to the prescriptions. Some patients obtain results after a longer period of treatment, and I really hope that Mr. Khan will feel better.

With best regards,

Yours sincerely,

Date March 17, 1977

Dear Dr. Aslan,

I was very happy and immensely relieved to receive your telegram, conveying me the eagerly looked for news of your safety, reading:

" THANKS SAFE ASLAN "

I pray to God to bless you with long life and safety. So much of the good flows out from your head and heart to the suffering ones, bringing them happiness, that you are the repository of hope to many a human beings. Therefore, the safety and welfare of your goodself and your worthy colleagues is a very desirable factor.

The news of the great destruction caused by the recent earthquake caused us much concern. We are confident, however, that the brave people of Romania will tide over their woes very soon, to be up again on the road to progress and human welfare.

Kindly do let me know if there should be any means by which I could be of some service in mitigating the sufferings of any one in any way.

With kindest regards,

Yours sincerely,

Dr. (RAHIM BUX KHAN).

Our Ref. GD. 1143 Date Dec. 17, 1976.

Dear Professor Aslan,

First of all, allow me to extend to you, and to your other colleagues, my most warm Greetings of the Season and the best of wishes for your happiness, well being and prosperity in the coming year. Amen. You are one of those noble souls who have left a deep imprint on my spirit on account of generosity of heart and genuine affection for human welfare. May the true happiness of this world and that of the spirit be always yours. Amen.

I hope you duly received mine of October 2, which I had written on the conclusion of the first Course of medicines which you had so kindly sent to me. I have been faithfully and meticulously observing the schedule and the instructions given. My third course is now reaching its end and although myself or my physician could not detect any discernable signs of change, but recently I have observed a few subjective symptoms which I feel I must report. After the injections, I sometimes begin to feel a peculiar heat sensation in my forehead and also somewhat giddy. Of course this symptom does not last long nor do I find it perturbing to me. My physician is inclined to think that perhaps the medicine is now causing these phenomena and that the processing of cellular change appears to have been induced. Well, you are the best judge.

There hasn't been any improvement in my sight or hearing. In fact, the sight has fallen somewhat more, but the general health suffered no set backs during this period. I do also feel that the mental fog is also somewhat decreased. I can maintain the thread of thought longer now, without those apparent strains that were generated in the previous months, when I used to do any thinking a bit longer.

Actually, this is meant to be a second interim report, for the Fourth and the final course of injections/medicine is yet there for me to take. Allow me however to repeat here, what I had stated in my last letter, that...." I am recounting very hopefully on your treatment and maybe that something good is in store for me with your affectionate efforts and kind attention."

Head Office: E/20, S. I. T. E., POLYTECHNIC ROAD, KARACHI-16.
Factories At: KARACHI, CHITTAGONG, BEIRUT, KUWAIT.

Please continue, also, to pray for me. Thanks. I shall of course write to you again in detail, when the fourth and final course of medicines is over by which time I hope the results which you expect would start showing up.

Kindly do let me know if I could be of any service to you from Pakistan. It would be my privilege and pleasure.

With kind regards and best compliments,

Yours sincerely

(RAHIM BUX KHAN).

INTRARE Nr. 7660
1976 luna IX ziua 20

Our Ref. GD. 435

Date Sept. 8, 1976.

My dear Madam Prof. Dr. Aslan,

I have received your very kind letter dated 17th August 1976 (IT-6864) and I am mighty happy to have it. Please accept my hearty thanks, firstly for the reason that you still remember me well, inspite of the fact that you have to deal with numerous patients, and again for the promptness with which you have attended to my case, and giving me a ray of hope that my troubles may be mitigated if not entirely off set by adopting the course of treatment that you have prescribed for me.

The packet of medicines you sent to me, arrived a couple of days back. It was delivered to my residence. Incidentally the family doctor was also present. He is the same gentleman who treated me with your medicines ten years age and administered the injections. I have started with this treatment since Monday the 6th instant. I am hopeful that something good will come out of this treatment and I will feel it my duty to keep you in touch with the progress and to convey to you all the concerned information in this regard.

Now I wish to report to you about my physical condition which, to all intents and purposes and my age, appears to be good. Of course the oldage factors do remain there of the nature of which I am sure you are aware and I call these mostly temporal. With the cataract operation ~~a~~ I appear to have become deaf. My ears have been examined two or three times and the same medicines i.e. the pills which were prescribed by Dr. Wania have been prescribed for deafness as well. I am told that this is due to ganglion. The other doctor has gone to the extent of prescribing even a hearing aid for me but I have not yet accepted defeat. Maybe your medicines would help me in restoring my hearing also, to a reasonable degree.

Now so much for my case. Please do tell me something about your own goodself as I am sure you must be keeping good health and attending to your usual responsibilities of being the principal figure to run this great show of which you are the inventor, the spiritual and the physical guide.

...2....

I am sorry I have not been in touch with you during all these years but so far as I recollect, whenever my health has allowed I have not failed to remember you at the usual new year festivities by dropping a greeting Card. You are a great person and one who has come in contact with you even once, cannot forget you much less that I will, to whom you have always treated so kindly. I shall be happy to hear in reply to the correspondence that I may send you and also request you to please let me know if I can be of any service to you from Pakistan. I assure you it will always give me great happiness.

With my most cordial regards,

Yours sincerely,

(RAHIM BUX KHAN)

Karachi-16
WEST PAKISTAN

Dear Mr. Khan,

I had no news from you for a very long time. I am sorry to hear that your condition is not so good.

After reading Dr.Jamshed H. Wania's medical report, I would suggest you to try to undergo (besides the treatment already ~~indicated~~ prescribed by your physician) a treatment with Aslavital which is chiefly indicated in arteriosclerosis and in glaucoma. As the optic atrophy seems to be due to arteriosclerosis - according to Dr. Wania's opinion - the process of your disease might be slown down or even arrested. You can make it according to the following schedule: Aslavital ampoules and pills - one course of 12 injections (an injection of 5 cc every Monday, Wednesday and Friday); and 2 pills a day every Tuesday, Thursday and Saturday (one taken after breakfast and another after lunch). Follows a rest interval of two weeks, after which another course as above. To be continued according to the above schedule, with the prescribed rest interval between each associated course of pills and injections.

Awaiting with interest further news from you, I remain with my best regards,

Yours sincerely,

Acad.Prof.Ana Aslan, M.D., D.Sc.

Dear Madam Anna Aslan,

Perhaps you will recollect I was in your Gerovital Institute from 31st October to 11th November, 1966. I received some treatment for arthritis and my eyes were also examined. My right eye had already lost sight but the cataract was developing in the left eye. A suggestion was made to me that the cataract will be arrested if I continue with the use of the medicine provided to me (Gerovital H3 pills and Injections) which I brought home with me and used it until late in 1967.

The cataract had become fully matured and hard enough, demanding immediate removal and I underwent an operation for this purpose. I am enclosing herewith a copy of Ophthalmists report, who performed the operation. You will see from the report that my sight has not been restored and the reason given to me is " Optic Nerve Atrophy ". I have been using the medicines which were prescribed, but it has not helped me in restoring the sight. I cannot read or write, but I can manage-movements without any help, though with difficulty.

I wonder if you have any treatment for optic nerve atrophy as this is the only way with which I could hope to get back the sight--that is if you think if an improvement can be made on this atrophied or atrophying optic nerve. I shall therefore be very grateful to hear from you in reply to this whether you could do something for me. In the event of your reply being hopeful please write to me in detail whether the treatment can be done in Karachi which I would prefer, as it will be difficult for me to travel without an escort and to stay abroad for long. If not, then I would like to hear of your positive suggestions whether the object which I am aiming at will be achieved, even at the risk of travelling and being admitted into your clinic.

I hope this finds you alright, together with your capable assistants, Dr. David and Michael Catargi to whom also please convey my compliments, and

With best compliments and kind regards

for your goodself,

I am,

Yours sincerely,

(RAHIM BUX KHAN)

Mr. Rahim Buksh Khan.
Age 82 Years.

This patient is an old patient of chronic simple Glaucoma in the Left Eye with Cataract. He has lost his Right Eye post-operatively some 8 years ago. Since then he had been under conservative treatment for his Left Eye till as recently as December 1975 when a combined Traberculectomy with a broad base iredectomy and a cataract extraction with cryo unit was done Seven,8.0. Virgin Silk sutures were given and he had an uneventful recovery.

His tension has remained stationery at 17.3 in this eye.

Unfortunately he has an optic atrophy which in my opinion is due to arterio Sclerosis. With the field of vision very limited his best correctable vision is about 6/24 and his near vision to N10.

I have impressed upon him that there is nothing that can be done under the circumstances except that Vitamin B1, B6 and B Complex with a Vaso-Dilator either Nicotine Acid or Complamine could sustain his vision within the limitation that already exists.

He has also been seen by Mr.Patrick Trevor Roper who shares my view.

Virgin Silk sutures were given and he had an uneventful recovery.

His tension has remained stationery at 17.3 in this eye.

Unfortunately he has an optic atrophy which in my opinion is due to arterio Sclerosis. With the field of vision very limited his best correctable vision is about 6/24 and his near vision to N10.

I have impressed upon him that there is nothing that can be done under the circumstances except that Vitamin B1, B6 and B Complex with a Vaso-Dilator either Nicotine Acid or Complamine could sustain his vision within the limitation that already exists.

He has also been seen by Mr.Patrick Trevor Roper who shares my view.

BUCHAREST/Republic of Romania.

Dear Madam Anna Aslan,

Perhaps you will recollect I was in your Gerovital Institute from 31st October to 11th November, 1966. I received some treatment for arthritis and my eyes were also examined. My right eye had already lost sight but the cataract was developing in the left eye. A suggestion was made to me that the cataract will be arrested if I continue with the use of the medicine provided to me (Gerovital H3 pills and Injections) which I brought home with me and used it until late in 1967.

The cataract had become fully matured and hard enough, demanding immediate removal and I underwent an operation for this purpose. I am enclosing herewith a copy of Ophthalmists report, who performed the operation. You will see from the report that my sight has not been restored and the reason given to me is " Optic Nerve Atrophy ". I have been using the medicines which were prescribed, but it has not helped me in restoring the sight. I cannot read or write, but I can manage movements without any help, though with difficulty.

I wonder if you have any treatment for optic nerve atrophy as this is the only way with which I could hope to get back the sight--that is if you think if an improvement can be made on this atrophied or atrophying optic nerve. I shall therefore be very grateful to hear from you in reply to this whether you could do something for me. In the event of your reply being hopeful please write to me in detail whether the treatment can be done in Karachi which I would prefer, as it will be difficult for me to travel without an escort and to stay abroad for long. If not, then I would like to hear of your positive suggestions whether the object which I am aiming at will be achieved, even at the risk of travelling and being admitted into your clinic.

I hope this finds you alright, together with your capable assistants, Dr. David and Michael Catargi to whom also please convey my compliments, and

With best compliments and kind regards for your goodself,

I am,

Yours sincerely,

(RAHIM BUX KHAN)

Dear Mr. Khan,

I did not write to you till now being away from Romania for a quite long while and, on the other hand, having not received earlier the book you had the kindness to send me. As I just received it yesterday I am hurrying to let you know about it and to convey my warmest thanks for your attention. It will be a great pleasure for me to read it and to learn new and interesting things on your beloved contry.

Dr. David informed me that he answered your son's letters concerning the possibility of obtainigg the drug and sending it to you through your daughter.

Hoping you are feeling well, I am sending you my best wishes for the coming New Year.

Yours sincerely,

Prof.Anna Aslan M.D., D.Sc.

Our Ref. PA/F.18/3771

Date November 10, 1967

Dear Dr. David,

Please accept my thanks for your kind letter dated September 30, 1967 (received October 16, 1967) and as advised by you I am pursuing the course of treatment prescribed by you. As was stated in my previous letter that I do not have much of Gerovital H3 injections left with me. So far, I have undergone nine courses of injections, the recent one to finish on the 15th instant. I have now 12 tubes left which will carry me through another course, starting 8th of December and lasting upto 3rd of January, 1968. After this I have nothing to continue on the injections side of this treatment but I have sufficient number of tablets; more than a dozen bottles still left with me which, as prescribed by you, are to be continued, starting 12 days after each course of injections, at two tablets a day.

If the injections are a must then I have to request you to please arrange to deliver sufficient quantity to my son in Germany, whose address is given below:

Herr. Tasnim A. Khan,
287, Sandhofferstrasse,
68-MANNHEIM-Sandhoffen/(West Germany)

As for the payment towards the cost of the injections, please send me a bill and I will make payment by cheque through a bank in UK.

It appears that Professor Aslan either has not returned from her visits abroad or has had no time to write to me. The two books, one by me " MY BELOVED PAKISTAN " and the other, by President Mohammad Ayub Khan " FRIENDS, NOT MASTERS " must have reached her by now and I am confident that after she has read these she will undoubtedly express her opinion about same. Also, after she is through with these I request you to ask her to lend same to you so that you may also go through them and let me know your comments in due course. By no means I desire to be a burden on your heavy occupations with your duties but still I hope you will find time to go through the Books, as and when time may permit you to do so.

I wonder if Professor Aslan or your goodself had the opportunity to meet our President Mohammad Ayub Khan who spent five days in Romania and returned thoroughly satisfied with the friendly relations that already existed between our two countries,

Dear Rahim Bux Khan,

As our axknowledgement of your letter of August 29 must have been mislaid, this will answer both letters - Aug.29 (PA/F.18/2384) and Sept.19 (PA/F.18/2785).

Professor Aslan has been away on scientific duties in August-September, therefore I am not able to give particulars about reception of your interesting books. Being bound to return soon, she will certainly write you in this matter.

As far as your treatment goes, I have to give the following advice :

Gerovital H3 does not neutralize the effect of Diamox. This ought to be continued as a vital necessity, even should it diminish the effect of Gerovital H3, which should also be continued as it does not wholly clash with Diamox and I would suggest getting on with injections. The results of Gerovital H3 often require longer periods, not limited to few months. We had quite representative cases when patients with very heavy pathology have been completely cured after a period of three years. We consider that even if you did not get important results, yet the fact that no aggravation or progress of your ailments occured, shows an activity of Gerovital H3 treatment. It is a matter of perseverance which by and by tells, as was the case with many of our patients.

I feel sure that Professor Aslan will have opportunities to meet on his honorable visit President Ayub Khan whose remarkable personality is of world wide reputation.

Hoping to have good news of your health, and with my best regards to Dr.M.Q.Qureshi, I am,

Yours very truly

Cornel David,M.D.

CD

$G.H_3$ nu neutralizează efectul medicamentului Diamox.
Poate continua trat. cu GH_3 — rezultatele pot necesita perioade mai lungi care nu se limitează la câteva luni; noi am avut cele mai reprezentative cazuri în care pacienți cu patologie foarte încărcată s-au vindecat complet după 3 ani. Socotim că chiar dacă nu aveți rezultate importante, faptul că nu au apărut agravări sau semne de progres ale bolii, aceasta poate fi atribuită tratamentului.

Tratamentul cu Diamox trebuie continuat, el fiind vital chiar dacă el ar

Romania.

Dear Professor Aslan,

I have pleasure in informing you that at long last I have been able to procure a copy of the book: " FRIENDS, NOT MASTERS " (a political autobiography of the President of Pakistan, Field Marshal Mohammad Ayub Khan) of which I had mentioned to you in my letter of August 29 and it has been sent to you per separate post, under registered cover (sea mail). I am sure you will find it very interesting and informative on the political life and history of Pakistan. Thank God, we have got a strong man who has stabilised the country and given it a befitting place in the comity of nations.

It has been announced that the President, Mohammed Ayub Khan will be visiting Romania in the third week of October. Perhaps, you may get an opportunity to meet him in one of the State functions in his honour; if so, you can mention my name to him, as in a private talk I had told him about the treatment that I have received in Romania.

By the way, I wish to remind you that I have not yet received any reply to my previous letter dated August 29, 1967 sent to you under registered airmail cover, the receipt of which is certain. I am anxiously awaiting a reply to it and would be obliged to have your advice on the points mentioned in the above letter, because pending receipt of a reply from you, all Gerovital treatment is at standstill.

Hoping this finds you perfectly fit and happy,

I am,

Yours sincerely,

(RAHIM BUX KHAN)

Prof. Dr. Anna Aslan, M.D.,
The Gerovital Institute,
BUCHAREST /Romania.

Dear Professor Aslan,

I am very much indebted to you for your ~~your~~ kind letter of August 2,1967, which came on the 17th inst, as it was posted by airmail and I shall feel very grateful indeed if you will make it a point to airmail all your future letters to me. I have also received the copy of your letter of May 11 for which I thank you, but the original of which unfortunately has not reached me so far, because it was posted by seamail.

The Book, " MY BELOVED PAKISTAN " if already in your hands, must have received your attention and after going through it, I am sure you will let me have your impressions about same. Of course I am sure that whenever you receive the Book, you will not forget to favour me with an acknowledgement of same so that I feel at rest that the book is with you.

There is another book, which is just out in the market, written by our President, Field Marshal Mohammed Ayub Khan, ---" FRIENDS, NOT MASTERS ". This is a remarkable production which throws ample light on the struggles through which Pakistan had to pass for its consolidation as a State. The task is by no means complete yet but the enlightenment and the encouragement which the people of this country have been receiving from the Head of the State has started to nourish the tree of hopes which was planted under most difficult conditions in the year 1947 and is now blooming to bear the fruits of the toils of the people of this country. This book has been translated into several languages and the demand for it in Pakistan has been so heavy that even its second edition has disappeared from the market but I am trying to obtain one copy for you and as soon as it is to hand, I will be mailing it.

I am enclosing herewith a Report from my physician which speaks for itself. He had planned to start the sixth course of injections on the first of September but I am postponing it till I receive a ~~cable~~ reply to this letter from you. It occurs to me that the " DIAMOX SUSTETS", which is a

HEAD OFFICE :- E/20, S.I.T.E POLYTECHNIC ROAD, KARACHI-16.
FACTORIES AT :- S.I.T.E. KARACHI-16, CHITTAGONG (E. Pak.) & BEIRUT (LEBANON)

sulfa-drug preparation, has either been totally nullifying the effects of Gerovital H3 or atleast partially making them non-effective. In the schedule of treatment which was handed to me by your Institute to follow as the guide-line, it is stated that Diamox should be used only for five days at the end of the month. This I tried but the stoppage of the Diamox increased my eye pressure and also brought pain in the right eye which is totally without light. So I had to continue the use of Diamox off and on. Even now I am trying to discontinue it but it appears that with the total stoppage would not be conducive to healing glaucoma and pain in the right eye.

There is however one thing which I want to point out: The Glaucoma is under control and the cataract has become static, as it was last observed by the Institute ophthalmist, making no progress in the meantime. I am anxious to take full advantage of the treatment but the clash of Diamox and Gerovital H3 is perplexing me and I will not be able to overcome this painful point unless you should guide.

The injections are painful, yet I have tolerated them and if the remaining ones must be taken then please tell me if they can be avoided by using the tablets on a better regulated course. I am confident that you will reply promptly, by airmail.

I hope this finds you perfectly alright, and with Kind Personal Regards,

Yours sincerely,

(RAHIM BUX KHAN).

There are scars on left chest of Herpes Zoster. Mr. Khan in last week of April '67 had a sever attach of Herpes Zoster on left side involving 3rd and 4th thoraeic dermatones.

Mr. Khan does not feel any change to the better nor it is evident from the clinical examination. He has been on Gerovital treatment for about 9 months. During this period he had Five Courses of Injection and Five Courses of tablets.

As you are well aware that Mr. Khan is suffering from Chronic glaucoma. This he is keeping under control by the use of drops and Acetazolamide (Diamox) sustained release capsules. Acetazolamide is 2-acetyl-amino 1,3,4- thiadiazole-5 - sulphanamide.

I wonder whether this sulphonamide is inactivating Gerovital H3. It is practically impossible to stop acetazolamide because it is keeping the pressure of the eyes under controle.

I shall be obliged for you views on the use of Gerovital H3 under these circumstances.

We have been left with two course of Gerovital H3 Injections and 15 bottles of Gerovital H3 pills.

The next course of Injections is to be started from 1st Sept. 67.

Will you be kind enough also to let me have further line of treatment.

Thanking you.

Yours sincerely,

M. Q. Qureshi

Dear Prof: Aslam,

REPORT OF MEDICAL EXAMINATION OF MR. R.B. KHAN
ON 26TH AUGUST, 1967.

Mr. Rahim Bux Khan has been under my care for nearly 10 months. I am carrying out the treatment prescribed by Institute De Geriatric " BUCURESTI " During this period I have not been able to find any change in his general condition which is as follows :-

Wt :- 170 lbs.
There is no evidence of anaemia, jaundice or any glandular enlargement.

CARDIOVASCULAR SYSTEM:

Pulse 74/m regular normal volume and tension
B.P. 124/74 mm Hg.
Heart size within normal limits.
Heart sounds: No abnormality
Artery walls. Normal for age
Prepheral pulses - Dorsalispedis present
Anterier tibial present

RESPIRATORY SYSTEM:

No abnormality detected

Abdomen - Soft. Scar of Laprotomy
Spleen liver - Not palpable.
P.R. - Not done
C.N.S. - No abnormality.

LOCOMOTIVE SYSTEM:

Neck movements limited due to asteoarthritis
Rt. wrist and Rt. shoulder - limited movements due to arthritis.

DIAMOX*

ACETAZOLAMIDE

SUSTETS*

Sustained Release Capsules

● *DIAMOX acetazolamide SUSTETS Lederle are sustained-release capsules each containing 500 mg. of acetazolamide which provide for a reduction in frequency of drug administration by this simple, convenient dosage form. This established carbonic anhydrase inhibitor is effective in the treatment of certain types of glaucoma.*

ACTION

DIAMOX acetazolamide is the non-bacteriostatic sulfonamide (2-acetyl-amino-1,3,4-thiadiazole-5-sulfonamide).

It functions as an enzyme inhibitor, specific for carbonic anhydrase.

Although its diuretic activity may play a small part, the use of DIAMOX acetazolamide is effective in various forms of glaucoma by virtue of its inhibitory action upon carbonic anhydrase in the eye which results in a decrease in the amount of ocular aqueous humor secretion. This decrease in ocular inflow produces a decrease in intraocular tension. This is in contrast to standard miotics which act to lower intraocular tension by influencing outflow. A complementary effect is frequently obtained by using DIAMOX acetazolamide in conjunction with miotics.

DIAMOX acetazolamide SUSTETS provide a sustained-release dosage form which ensures continuous, effective blood concentration of the drug and hence, continuous drug action to maintain the desired inhibition of aqueous humor secretion.

DIAMOX acetazolamide SUSTETS are capsules, each containing 500 mg. of acetazolamide in granular rather than crystalline or powder form.

Studies of acetazolamide blood levels show that when DIAMOX acetazolamide SUSTETS are used, a peak concentration is reached between 8 and 12 hours after administration, compared to a 2 to 4 hour peak using DIAMOX acetazolamide tablets. As a consequence of this sustained-release phenomenon, a therapeutic effect of each capsule may be prolonged to 18 to 24 hours after its administration, in contrast to the usual 8 to 12 hours duration of effect obtained with tablets.

A very real advantage of DIAMOX acetazolamide SUSTETS therapy is, therefore, the reduction in frequency of drug administration afforded by this simple, convenient sustained-release dosage form. Patients are often freed from the necessity of awakening during the night to take medication. Furthermore, in some patients, undesirable side effects are diminished due to the slower, more uniform release of the active drug.

*Trademark

INDICATIONS

Glaucoma: Indicated both for short-term (1 to 6 weeks) and for long-term treatment of chronic simple (open-angle) glaucoma and secondary glaucoma.

DIAMOX acetazolamide is indicated as a preoperative measure in those cases of acute congestive (closed-angle) glaucoma where delay in definitive surgical treatment is desired in order to lower ocular tension. Such a reduction in ocular tension provides both a wider margin of safety for dilation of the pupil for ophthalmoscopic investigation of possible underlying pathology and an eye more suitable for surgery.

DIAMOX acetazolamide is of little use in severe glaucoma due to peripheral anterior synechias or in hemorrhagic glaucoma.

For further reference see, "Becker, Bernard and Shaffer, Robert N.: *Diagnosis and Therapy of the Glaucomas*, St. Louis, C. V. Mosby Co., 1961."

CONTRAINDICATIONS

DIAMOX acetazolamide is of little use in severe glaucoma due to peripheral anterior synechias, or in hemorrhagic glaucoma.

DIAMOX acetazolamide therapy is contraindicated in situations in which sodium and/or potassium blood serum levels are depressed, in cases of marked kidney and liver disease or dysfunction, suprarenal gland failure, and hyperchloremic acidosis.

Long-term administration of DIAMOX acetazolamide is contraindicated in patients with chronic noncongestive angle closure glaucoma since it may permit organic closure of the angle to occur while the worsening glaucoma is masked by lowered intraocular pressure.

PRECAUTIONS

Adverse reactions common to all sulfonamide derivatives may occur; fever, rash, crystalluria, renal calculus, bone marrow depression, thrombocytopenic purpura, hemolytic anemia, leukopenia, pancytopenia and agranulocytosis. Precaution is advised for early detection of such reactions and the drug should be discontinued and appropriate therapy instituted.

SIDE EFFECTS

Side effects during short-term therapy are minimal. Those effects which have been noted include: paresthesias, particularly a "tingling" feeling in the extremities; some loss of appetite; polyuria and occasional instances of drowsiness and confusion.

During long-term therapy, an acidotic state may occasionally supervene. This can usually be corrected by the administration of bicarbonate.

Other occasional adverse reactions include: urticaria; melena; hematuria; glycosuria; hepatic insufficiency; flaccid paralysis; and convulsions.

DOSAGE

The recommended dose is 1 capsule (500 mg.) 2 times a day. Usually 1 capsule is administered in the morning and 1 capsule in the evening. It may be necessary to adjust the dose but it has usually been found that dosage in excess of 2 capsules (1 Gm.) does not produce an increased effect. The dosage should be adjusted with careful individual attention both to symptomatology and intraocular tension. In all cases, continuous supervision by a physician is advisable.

In those unusual instances where adequate control is not obtained by the twice-a-day administration of DIAMOX acetazolamide SUSTETS, the desired control may be established by means of DIAMOX acetazolamide (Tablets or Parenteral). Use tablets or parenteral in accordance with the more frequent dosage schedules recommended for these items, such as 250 mg. every 4 hours, or an initial dose of 500 mg. followed by 250 mg. or 125 mg. every 4 hours; depending on the case in question.

Dear Sir:

Please refer to my letter of 19. November 67 and to my Father's letter of the 10. November 67 written to you from Pakistan.

In my last letter of the 19 instant, I forgot to introduce myself to you. I am the son of Mr. Rahim Bux Khan of Pakistan, presently residing in Germany.

In my last letter I had requested you to please send me the injections for my father to my address here, or the prescription of same. Unfortunately until today I have not heard from you. I shall be very much indebted to you if you would kindly send me the injections for my Father to me in Germany, or the prescription, in case I can buy them here.

I am pressing on you to send me the said injections as, at present, my sister is paying a visit to me, and on her way back home, she would be able to carry them along.

About the payment you can be rest assured that it will be paid to you on receipt of the medicin with return post, or any other way which may be earliest and convenient. I shall be grateful to you if you could attend to this matter at your earliest convenience, as my sister will be returning to Pakistan within the next 12 to 14 days.

I thank you in advance for your co-operation and hope to hear from you soon.

Yours faithfully,
Tasneem A. Khan

Date July 21, 1967.

Professor Dr. Anna Aslan,
The Geriatrics Institute,
BUCHAREST.
Socialist Republic of Romania,

Dear Dr. Aslan,

I am pleased to inform you that today I have mailed to you, per separate post, a copy of my Book, " MY BELOVED PAKISTAN " (Memoirs, 1946-66) which will prove a very valuable and interesting reading material to you. It concerns not only my life since I came over to this new country on its formation in August 1947, but it is also a documentary record of the struggle and progress of Pakistan. This Book will therefore satisfy your desire to know about Pakistan and its people.

Relations between Romania and Pakistan,-- political, cultural and economical-- are growing every day and I hope by the concerted efforts of the people and the governments of the two countries, these will grow stronger with the passage of time.

I also take this opportunity of inviting your attention to my two letters, sent to you under Registered covers in April and May 1967 to which I have so far neither received any acknowledgement nor a reply. These were written to you at the conclusion of the three monthly schedules of your prescribed courses and I had sought further guidance but it is indeed surprising that I should not have heard from you at all. In fact, since writing to you last, I have no more change or improvement to report but I am still continuing with your medicines. I however hope that you will write to me in this connection soon.

I hope when the book is received by you, you would write to me about your impressions concerning same.

With best wishes,

Yours cordially,

(RAHIM BUX KHAN).

Book: per separate post.

Dear Mr. Khan,

Excuse my belated reply to your letter of April 10th due to a journey in Gemany to attend international congresses.

In answer to your questions I inform you that the treatment with Gerovital H3 being a long-term treatment and acting as a cellular regenerator it must be continued according to the schedule we have recommended you on discharge. Examining the medical report you have sent to me I consider the results are satisfactory.

If your ophtalmologist considers necessary to apply you any special treatment it can be undergone together with our Gerovital H3 treatment.

Hoping to hear from you soon, I remain,

Yours sincerely,

Prof. Anna Aslan M.D., D.Sc.

Dear Professor,

re: Mr.RAHIM BUX KHAN of Pakistan

Our Governing Director, Mr.Rahim Bux Khan, who was hospitalised with your Institute from October 31st to November 12,1966 for treatment of his Glaucoma ailment wrote to you on April 12,1967 per registered letter, reporting about the results of the first three months of the Gerovital course of treatment, and had sought your further advice in respect of same. To this date, we have not had the pleasure of a reply from your goodself.

A further copy of that letter is enclosed herewith for your ready reference with a request kindly to let us have your reply at your earliest, if not already done.

With best compliments,

Yours truly,

Personal Assistant to
Mr. Rahim Bux Khan

April 12,1967

Dear Professor Aslan,

Now that the third monthly schedule of the Gerovital injections and tablets is over, I deem it proper to give you a picture about myself.

The month-wise treatment was carried out as follows:

First Course: From December 5,1966 to 30th Dec.1966
With pills and Vit. 'A'injection following and preceding, as prescribed.

Second Course. From Jan.20th to February 15th,1967.
Pills and Vit.'A' injec. as usual.

Third Course: From March 10th, to 5th April,1967
Pills and Vit.'A' injec. as usual.

All this was strictly in conformity with the directions given in your Medical Report of 10th November,1966.

The physician who has been administering this course of treatment examined me for the last time on the 7th of April and his report on the condition of my health is enclosed herewith for your perusal. (Enc: 1).

As regards the actual disease - Glaucoma - and the cataract in my left eye, I have to state that eversince my return I have been getting my eye tension checked three or four times a month. The pressure has remained more or less static i.e. between 20 - 25 on Schiotz tonometer, with a slight fall in vision due to cataract which, I have been told, has not advanced much since the treatment was started. This means that the condition of the left eye is, more or less, the same what it was in September 1966 when it was treated for the last time to bring the pressure under control through medication and drops.

The pressure in the right eye remains the same as it was last observed by the Gerovital Institute's Ophthalmist in Bucharest.

...2...

From the foregoing, you will observe that the Gerovital treatment has not revealed any perceptible or imperceptible changes whatsoever in the condition of my health and more particularly in the eyes, which is the basic object of this treatment. You were kind enough to suggest that probably after the 3 courses of these monthly treatments I will mark some change in my condition but unfortunately this has not been so. However, since the treatment is to last 12 to 14 months, I am very patiently going through the ordeal of these courses with faith and conviction that one day it may produce some results. I mean to see it through.

The object of writing this letter to you is to give you a report of the first quarter of this gerovital treatment and also to find out from you if you want me to continue with the same course of treatment or you would like to suggest such changes as you may deem necessary. My fourth course of treatment starts from 28th of April and runs upto 24th of May, followed by pills, to end on 2nd of June, 1967, and of course supplemented by vitamin 'A' tablets, as prescribed for the first ten days of the month, as usual.

I shall be happy if you will kindly post your reply to this letter by AIRMAIL, otherwise it takes more than eight weeks for the letter to reach me by ordinary (sea)mail, as it happened in the case of your Christmas card.

I hope this finds you perfectly fit and happy, and sincerely devoted to your scientific problems and their solutions, in alleviating the troubles of those who need your help.

With kindest regards to Doctors David and Dascal and to your goodself, I remain,

Yours sincerely,

(RAHIM BUX KHAN)

7th Nov. 6

TO WHOM IT MAY CONCERN

We hereby certify that Mr. Rahim Bux Khan, of Pakistan, has been hospitalized at the Bucharest Institute of Geriatrics for medical treatment from October 30th to November 11th, 1966.

Mr. R.Bux Khan has paid our Institute the total amount of $ 192.50.- (consultation and laboratory examination fees = $ 30.- 13 days hospitalization and treatment x $ 12.50 per day = $ 162.50.-).

Payment was made to us through the Exchange Office of the Rumanian Travel Agency "Carpaţi" of Bucharest.

CHIEF ACCOUNTANT,

Mr.Khan Rahim Bux

MEDICAL REPORT

Mr.Khan Rahim Bux, aged 71, of Pakistan, has been hospitalized at the Bucharest Institute of Geriatrics from October 31st to November 11th, 1966.

Clinical and laboratory investigations revealed:

- Chronic bilateral glaucoma, disabled visual acuity of right eye, cataract left eye, - satisfactory visual condition.
- Generalized arteriosclerosis.
- Arthrosis of spine and big joints.
- Latent postcholecystostomy sequelae.

Satisfactory general condition;normal interinal organs. Compensated cardiovascular system. Blood pressure 155/80.

General nutrition with tendency to overweight.

The clinical and laboratory general picture show general condition in accordance with age.

A regenerative biotrophic treatment with Gerovital H3 was undertaken, by way of daily intramuscular injections. The treatment was well tolerated.

Further treatment is advised according to the following schedule:

- Gerovital H3, ampoules, one course of 12 injections in four weeks (one intramuscular injection of 5 cc every Monday, Wednesday and Friday).

- Gerovital H3, pills, one course of 24 pills in 12 days (two a day, one pill taken two hours after breakfast and lunch).

- Follows an intermission of 9 days after which resume another course of 12 injections as above and continue according to the same schedule (alternating injections with pills) during 14 to 16 months.

Associate with every other course of Gerovital H3 injections: one ampoule of vitamin B_1 200-250 mg, one ampoule of B_{12} 50 gamma through the same syringe (12 injections).

Alternate one course of injections with Gerovital H3 only, and one course of Gerovital H3 associated with vitamin B_1 and B_{12}. - 2 to 3 tablets of vitamin A 10 days every month (from 1st to 10th); - 1 to 2 drops of a 2% solution Pilocarpine 2 to 3 times a day in both eyes (instillations); - two tablets of Diamox daily during the last 5 days of the month.

Diet: varied and moderate food.
Progressive loss of 4-5 kgs. weight is advised.

./.

Abundant consumption of vegetables, salads, fruit juices, fruit, skimmed milk and dairy products, lean fish and meat, vegetal oil. Moderate consumption of bread, sweets.

Daily walks on flat surfaces on sunny days wearing sun glasses.

D I R E C T O R,

C.David, M.D.

MINISTERUL ... Institutul National ... INTRARE/IEȘIRE Nr. 3832 ziua 11 1978

Our Ref. GD.3184

Date June 26, 1978

Dear Madam Dr. Aslan,

I was delighted to receive your kind letter of April 7, 1978, which reached me May 31st. Perhaps it is a matter of reciprocity that I am also sending a delayed reply - not that I was abroad; but the condition of my health, which has not been quite well recently. My sight has been worrying me quite a lot which has now reached a point of disappointment, but I am still carrying on with perseverence and courage. Thank God I am bestowed with this quality by the benign hand of nature. I have had a mild attack of bronchitis, followed by a virus fever which kept me in bed for a few days but now I have started attending office regularly once again.

Madam, believe me, I am always happy to hear from you and it will be very delightful indeed to see you in Pakistan. But due to my own incapacity for movements and mixing with the people who could have been helpful in arranging for an invitation for your visit to Pakistan, the matters have not moved much. Perhaps they now think that I have become like an inactive piece on the chess-board, and therefore not much attention has been paid to my request. As you know so well, most of the people around, in today's world, are engrossed in their own selfish ends and they have no respect for the higher values of life. However, I shall let you know in due course, if anything turns up favourably.

The Secretary of my Company, Mr.Hameed, whose wife had gone to Bucharest to meet you and which lady is now once again in the States, has requested me to communicate to you that he desires to be provided with copies of the clinical tests reports carried out on his wife, Dr.Noor Jehan Hameed. I shall therefore be obliged if you can ask your people to do so.

Dear Dr.Aslan, we had met only for a short time but I think I have earned your kindness and friendship, which I hope will be everlasting, and in the meantime, I remain,

Yours sincerely,

(RAHIMBUX KHAN)

Pakistan

International Institut. Dr. Noor Jehan Hameed Mai 1978 (Mithaela)

Dr.

Medical Report

The patient Noor Jehan Hameed aged 34 was admitted to our clinic for:
-marked physical and intelectual asthenia,diminished appetite,insomnia,
-pains in the lumbar area of the backbone and in the joints(knee,ankle)
-tremor of hands.

The personal pathological record mentions no disease,operation,fracture or accident until 2 years ago,when lumbar and articulary pains appeared as well as the inflammation of the knees and marked physical asthenia.The patient was hospitalised for 3 months ,a marked anemia was thus evidenced for which the patient received blood transfusions; subsequently jaundice appeared.(infectious hepatitis?hemolytic jaundice?-the patient does not specify).

The patient was subjected to cortison and phenylbutasone derivatives treatment and the above mentioned symptoms improved temporarily.

At present,the patient takes daily prednisolone 8 tabletsx 5mg and brufen 3 tablets.

The clinical examination pointed out:good general condition,no fever, normally coloured teguments and mucosae,normal adipose tissue,bilateral pretibial discrete oedema painful when pressed,slightly hypotonic upper and lower muscles,normal osteoarticulary apparatus,discrete dorsolumbar scoliosis,slightly inflammed knee joints,painful when moved,normally coloured mobile metacarpophalangean joints.

Respiratory apparatus:16 breathings/min.normally conformed thorax, equal amplitudes of the respiratory movements in both hemithoraxes. Vocal vibrations transmitted unaltered through the lungs.Normal pulmonary sound.Free cortodiaphragmatic sinuses during deep inspiration,manifested vesicular murmur.

Cardiovascular apparatus:no modifications of form in the precordial area,the apex in sp.Vi.c. at 10cm. from the mediosternal line,the heart right edge does not exceed the sternal right edge,rhythmical heart sounds,systolic murmur at the mitral auscultatory orifice, dyastolic murmur at the aortic auscultatory orifice.AV=66=TA=13/8cm.Hg. Palpable peripheral arteries,slight indurations.No hepato-jugular reflux.

Digestive apparatus:overt appetite,normal tongue and buccal mucosa, painless deglutition,flexible,painless abdomen.Liver - upper edge in Vi.c. right to the m.clav. line,lower edge-unpalpable.Unpalpable, unpercussive spleen.Free duodenal area.Normal intestinal transit.

Uro-genital apparatus:no modifications in the form of the lumbar area, unpalpable kidneys,painless renovertebral areas,spontaneous miction, normally coloured urine,free renal lodges,painful when bilaterally percused.

Normal behaviour,symetrical,expressive face,no meningeal sings,

difficult gait due to pains in the knee joints,cranial nerves:normal, normal active and passive motility, no extrapyramidal symptoms,normal ROT, no vasomotor ,trophic or sphincter disturbances,normal memory,logical reason,slightly diminished attention.

S.Romberg negative.Cerebellum tests within normal limits.Normal sgm. force.

The paraclinical examination pointed out:increased cholesterol and ~~uric~~uric acid levels as well as the blood sedimentation rate.

Diagnosis:

-cortison-dependent cardio-articular rheumatism,

-dyslipemic syndrome(hypercholesterolemia),

-dysmetabolic syndrome (hypermicemia),

-chrom-defficient anemia.

Because the short hospitalization which did not allow a thorough investigation and a complete diagnosis,the patient was subjected to one test to Gerovital (normal reaction).The treatment was not initiated .

Recommandations:

1.More correct investigation of the osteoarticular,cardiac and,particularly,renal apparata(ASLO,rheumatoid factor,presence of the C-reactive protein,electroforesis,urine tests,renal functional tests,phonocardiogram, total lipids,lipidogram,as well as all the tests the patient has already been subjected to in our clinic).

2.Biotrophic treatment with Gerovital:one series of 12 ampoules,3 i.m. shots per week,followed by an 18 days break.After the break one series of Gerovital tablets,2 per day ,2 hours after the main meals,that is at 10a.m. and 4p.m.A 15 days break follows,after which the treatment is resumed according to the above schedule.

3.To continue the prednisolone therapy(40mg daily)with the gradual decrease of the daily amount subsequent to the association of the Gerovital therapy.Control of anemia.

4.The correct use of the hyposodic diet-3-5gr. salt daily, as well as of the hypolipidic diet.

5.To avoid stress,cold,effort.Balanced life-style(rest).

6.Periodical medical check-ups.

7.The patient will return next year.

Mr. Sher Zaman Khan
Chairman
Public Accounts Committee
Civil Secretariat
(Block-I Room No.29)
Quetta Baluchistan
PAKISTAN

Dear Mr. Khan,

I am glad to hear that you are well after treatment. You should continue it according to the indications.

As regards your wife, if she cannot stand the injections, she may use Gerovital H3 tablets (courses of 24 pills in 12 days; two pills a day, one pill taken after breakfast and another after midday lunch), with rest intervals of 10 days between the courses.

I understand that you have still a few packets left of Gerovital. If the liquid in the vials is clear and without sediment and the pills have not changed their colour, you may use them.

You may order further supplies of medicines to one of our representatives on the enclosed list.

Waiting for further news from you, I remain with my best regards,

Yours sincerely,

Acad.Prof. Ana Aslan, M.D., D.Sc.

27th May' 1982.

Dear Doctor Ana Aslan

Kindly refer to the correspondence resting with your letter No.2846 dated 15th October 1980.

After obtaining the prescribed medicines as advised by you in your above referred letter I have continued to make use of Aslavital and Gerovital Injections. While Aslavital Injections have been used up the Aslavital Tablets which I brought with me along-with Gerovital Injections are still used by me.

My health continues to be as good as expected but my wife has been suffering from backache and complaining about her feeling weak. I am however sorry to say that she has not been able to make use of the Gerovital Injections. I have therefore been using the Gerovital Injections actually meant for her in order to avoid wastage. As far as she is concerned there appears to be no alternative but subject to your advice order Gerovital Tablets for her use as she cannot stand the Injections

I have still a few packets left from Gerovital and therefore seek your advice if they could still be made use of. On hearing from you I will order Gerovital and Aslavital Injections and Gerovital Tablets for my wife and also for my-self.

With regards.

Yours Sincerely,

(Sher Zaman Khan)

Dear Mr.Khan,

I received your last letter.

You have to continue the prescribed schedule as your troubles are not due to the treatment with Gerovital. The results appear after some series as it is a long term-treatment.

After finishing the 6 series, please write me in detail about your wife state of health.

In order to obtain your prescribed Aslavital, which was not supplied, please address to RUM-DEUTSCHE GES.: CONTICHEMIE - 6 Frankfurt am Main 1; Eschenheimer Anlage, West Germany - Tel.:55.02.21., Telex 41.48.64. , or to CHIMIMPORTEXPORT, Bd.Republicii No.10, Bucharest, Romania, Tel.:16.34.63 - 16.45.80.

Dear Professor Ana Aslan,

I am grateful to you for your letter No.2160 of 23rd June 1980. My wife is, as advised by you continuing the Gyrovital H3 Injections and the associated medicines. But her weakness is causing anxiety.

With regard to the treatment prescribed by you for us, while I am having Gyrovital H3 Injections, Aslavital Ampoules, have not been supplied by Mrs. Janita Popa of International Agency Bucharest. In addition to Gyrovital only six bottles of Aslavital Tablets were given to me.

In addition to Gyrovital Ampoules, you have also stated only 6 bottles of Aslavital Tablets in the certificate given for Export/Import purposes.

Will you kindly advise at your early convenience how to make up for the Aslavital Ampoules prescribed but not supplied?

Yours Sincerely,

Dear Professor Ana Aslan,

Kindly refer to my registered letter dated 26th July' 1980 copy attached for ready reference.

I would be grateful for an early reply. At present I am having the second monthly course of Gyrovital H3 Injections. If so advised, one month after the second course, I will take Aslavital Tablets instead of Injections for one month and will continue to do so in future by intervals.

Since writing my last letter there has been no change in my wife's state of health. Her backache troubles her, more so ~~xxxxxxxx~~ when she is not using Corset. The use of Valium5 has become a regular feature with her. At times she takes an over dose to sleep longer. She has become more nervous and her weakness continues. She will be starting her second course of Gyrovital H3 Injections on the 4th of this month after a pause of one month.

With regards,

Yours Sincerely,

(Sher Zaman Khan)

Hader Markt 11
b. Paul Gstatter
WEST GERMANY

Dear Mr. Zamankhan,

I received your letter of June 12th and I am sorry to hear that your wife felt bad after the injection. Probably it was injected very close to a nerve, and her blood pressure increased because she was frightened. But I think that Mrs. Zamankhan may continue the treatment without fear. The injection should be done by a physician or a qualified nurse who knows quite well the respective area in the muscle. If she is too sensitive, she may start taking Gerovital H3 pills (two a day, for 12 days). You can take the pills from our representative in West Germany: Deutsche Chefaro-Farma, 4628 Lünen, Stadttorstrasse nr.3, Postfach 1330.

I shall be glad to give you any further information or whatever advice you might require.

Yours sincerely,

Acad.Prof.Ana Aslan, M.D., D.Sc.

Dear Professor Dr: Ana Aslan,

This morning soon after my wife had an injection of Gerovital she felt giddy, felt bad & was unable to stand up or walk for good one hour. I had to bring her back home in a Taxi. The doctor here has advised to stop the injections, at least for some time. Her blood pressure was 150/80.

I would be grateful if you could advise if the

Gerovital Injections should be taken by her after Sometime or you would advise her taking Gerovital Tablets instead. If so kindly let me know from where these tablets can be obtained in West Germany. We will be leaving for Pakistan next month & I would Therefore request for an early reply.

We were sorry that we were unable to see you & say Goodbye before leaving Bucharest.

With kind regards.

Yours Sincerely

MEDICAL REPORT

Mr. Khati Sher Zaman Khan, aged 78, of Pakistan, was hospitalized in the clinic of National Institute of Gerontology and Geriatrics from May 21st to June 2nd, 1980.

The patient comes to us for the second time after 2 years of biotrophic treatment. He mentiones the positive effect of the treatment on his general condition which allow him to start again his activity.

He complaints now of: an accentuated auditive deficiency, dyslipemic troubles, vesicular troubles of dyskinetic type moderatel; diminished in comparison with the previous period.

The subjective symptoms and the electric signs of ischemic cardiopathy disappear, very decreased memory and concentration troubles.

Clinical diagnosis: Bilateral otosclerosis.
Vesicular dyskinesia with urinary infection.

Physical examination. Height = 180 cm. Weight = 82 kg. Integuments with normal elasticity, moderately thickenad in the extremities, nails of increased consistency, hypertrophic.

Locomotor apparatus: lumbalgias and gonalgias (intermittent), crepitations at knee mobilization.

Respiratory apparatus: normal according to the age.

Cardio-vascular apparatus: Blood pressure (excepting the day of his arrival = 160/90 mm Hg) between 130-140/80 mm Hg. Regular AV, breathing Ist sound, IInd sound marke in the aorta.

Digestive apparatus: normal.

Excretory apparatus: dysuric troubles (intermittent). During his hospitalization, the patient had an onset of urinary infection treated with Septrin.

Neuro-psychiatric examination: normal.

We recommend:

Hyperlipidic and hypoglucidès diet; reduced consumption of salt.

Treatment:

- GEROVITAL H3 - 3 injections/week, 12 injections in 4 weeks (an intramuscular injection of 5 cc every second day) and ASLAVITAL 1 pill/day, for 6 days.

Rest interval of 3o days after which:

- ASLAVITAL 3 injections/week, 12 injections in 4 week (an intramuscular injection of 5 cc every second day) and ASLAVITAL 1 pill/day, for 6 days.

Rest interval of 3o days and the patient should continue according to the above schedule.

It is advisable periodic urologic control.

Cardio-pulmonary x-ray: bilat.hilo-basal fibrosclerous modifications. Slightly increased heart. Unrolled and opacified (IIIrd degree) aorta.-

Urologic examination

Diagnosis: Status post-prostatectomy. Clinically no pathology. It is recommended a biotrophic treatment.-

Pakistan

Yutarvath

May 30th, 1980

MEDICAL REPORT

Mrs. Zakia Sher Zaman Khan, aged 77, of Pakistan, was hospitalized in the clinic of National Institute of Gerontology and Geriatrics from May 21st to June 2nd, 1980.

The patient comes to us for the second time after a year biotrophic treatment, presenting an improvement of osteo-myalgic symptomatology and she took 2 kg in weight.

Last year it appeared a depressive-anxious syndrome, important memory and concentration disorders, physical fatigability, troubles of equilibrium. The osteomyalgias appear again.

Clinical diagnosis: Systemic atherosclerosis.
Involutive depressive-anxious syndrome.
Diffuse osteoporosis.
Secondary hypoanabolic syndrome.

Physical examination. Weight = 37 kg. Height = 150 cm.

Integuments: pale-serous, palpebral infiltrations, very diminished elasticity, dry on arms and legs, diffuse wrinkles, senile lentigo on arms and thorax; subcutaneous cellular tissue disappeared in all the areas. Cutaneous fold persistent 10 seconds.

Cervical, inguinal, axillary palpable and mobile microganglions.

Locomotor apparatus: paravertebral pains, dorsal kyphosis, lumbar rectitude, Heberden's nodes; pains at latero-cervical and dorsal pression. Limited cervical mouvements, crepitations at the mouvement of the great articulations.

Respiratory apparatus: normal.

Cardio-vascular apparatus: rhythmic cardiac sounds, of diminished intensity, bradycardic. Blood pressure oscillates between 150/80-120/80 mm Hg. Peripheral arteries of increased consistence, permeable.

Digestive apparatus: normal.

Excretory apparatus: normal.

Neuropsychiatric examination: Romberg ±. Rigid gait, diminished balancing. Noica + on the left. Pal-chin reflex present. Indifferent plantar cutaneous reflex. Slightly deficient psychical functions, hypomnesis, depressive mood, irritability, dark thoughts in connection with the age, anxious about her memory and concentration power.

We recommend:

- Hypercaloric diet, 5-6 meals a day.

Treatment according to the following schedule:

- GEROVITAL H3 ampoules: one course of 12 injections in 4 weeks (an intramuscular injection of 5 cc every second day, 3 injection/week).

Rest interval of 3o days after which another course of injections as above.

- Associated medication:

Redoxon 2 g/day.
Polyvitamins (B group) 3 tablets/day.
Amitriptylline 5o mg/day, for 2 months.

- It is advisable a periodic neuropsychiatric control.

May 23rd, 8

MEDICAL REPORT

Mr. SHER ZAMAN KHAN, aged 76, of Pakistan, was hospitalized in our clinic from May 9th to 23rd, 1978.

On his arrival, the patient presented: bilateral hypoacusia, troubles of memory and concentration, precordial opression of effort sometimes of repose, troubles of lipidic metabolism, urinary troubles.

Pathologic personal antecedents: Adenoma of prostatis operated 1972. Chronic ischemic cardiopathy 1969.

The patient presents the biochimical and clinical syndrome of a systemic atherosclerosis, especially coronary and cerebral. The urinary troubles appeared after the intervention for adenoma of prostatis.

Diagnosis: Systemic atherosclerosis. Dyslipemia.
Extrasystolic arrhythmia.
Incipient otosclerosis.
Vesicle dyscinesia.

Physical examination: Overweight. Segments with moderately reduced elasticity, dry legs.

Locomotor apparatus: lombalgias at the anterior flexion, gonalgias, disappearance of physiologic curvatures of the column, crepitations at knee mobilisation, sensibility at the pression of sacro-iliac articulations.

Cardio-vascular apparatus: Vascular pedicle 3.5 cm. Extrasystoles with tendency to Dl and trigeminism. Blood pressure 13o/8o mm Hg. AV = 68/min.

Excretory apparatus: slow flux, difficulty in mictions, nicturia, dysuria.

./.

Neurologic examination: S.Noica ++, concentration of short time, troubles of fixation and reproduction memory, state of intermitent depression.

During his hospitalization the patient underwent a treatment with Gerovital H3.

Recommended treatment: Aslavital injections, 12 in 4 weeks, 6 courses a year.

It is advisable: Diet for atherosclerosis (enclosed).
Cardio-vascular, ORL and urologic control.

Internate Inst.

May 23rd, 8

MEDICAL REPORT

Mrs. Zakia SHER ZAMAN-KHAN, aged 75, of Pakistan, was hospitalized in our clinic from May 9th to 23rd, 1978.

The patient presented on her arrival: dorso-lumbar para-vertebral pains, underweight, marked frilosity, state of anxiety.

Pathologic personal antecedents: Myomectomy at the age of 39 with precocious menopause. Repeated cystitis.

The vertebral painful phenomena appeared about a year ago being accentuated by the coldness.

Diagnosis: Degenerative chronic vertebral rheumatism.
Diffuse osteoporosis.
Hypoanabolic syndrome.

Physical examination:

Subcutaneous cellular tissue much decreased in every area, diminished elasticity, dry integuments, diffuse wrinkles.

Locomotor apparatus: Kyphosis with upper dorso-lumbar scoliosis. Prominences of spinous process T9-12 with pains at their pressure as well as latero-cervical. Diminished anterior flexion of the column.

Cardio-vascular apparatus: Vascular troubles of cerebral circulation, blood pressure 14o/7o mm Hg. AV = 76/min. with ample cardiac sounds, few extrasystoles, peripheral arteries of increased consistency, permeable.

Digestive apparatus: Descending colon spastic. Sometimes abdominal distension, flatulence.

Neurologic examination: Myotic pupils, anisocoria. Slight tremble of fixation, Noica ++.

During her hospitalization, the patient underwent a treatment with Gerovital H3, vitamin B1 and B6.

./.

The recommended treatment: Gerovital H3 pills - 2 a day, for 15 days a month.

Associated treatment: Decadurabolin one bottle a month. Ca Sandoz + vitamin C - 10 tablets a month.

Diet: hypercaloric, rich in vitamins.

It is advisable: medical gymnastics, elastic belt; periodic medical control (locomotor and cardio-vascular).

Dear Madam,

I and my wife are planning to visit Bucharest during the second half of April 1978 for a General Check-up by you. I would be very grateful to know if you could give us the required "check-up" at that time and also intimate the time needed for the purpose. I would also like to have some idea about your charges.

I and my wife are over 70 years of age and except for odd complaints on rare occasions we are keeping fairly good health.

With high regards,

Hoping to be favoured with an early reply,

Yours truly,

(SHER ZAMAN KHAN)

Dear Madam,

I and my wife are planning to visit Bucharest during the second half of April 1978 for a General Check-up by you. I would be very grateful to know if you could give us the required "check-up" at that time and also intimate the time needed for the purpose. I would also like to have som idea about your charges.

I and my wife are over 70 (seventy) years of age and except for odd complaints on rare occasions we are keeping fairly good health.

With high regards,

Hoping to be favoured with an early reply,

Yours truly,

(SHER ZAMAN KHAN)

Dosan

Dear Prof. Aslan,

Thanks for your letter of April 13, you mailed to me on my Pakistan address. I believe, I informed you, that I and my wife were leaving in May for U.S.A, and that I shall let you know when exactly we shall be able to reach Romania.

Now we have made our reservations, according to which, I and my wife, are scheduled to reach Bucharest by AIR FRANCE Flight No: AF 718 at 2.0 p.m on Wednesday August 12, 1987. Seperately, I am sending you a cable also, which will reach you much earlier than this letter.

I request you to please make arrangements for our stay and treatment accordingly. Flora Hotel will be alright.

Thanking you,

Yours Sincerely

Kahkashan, Clifton
Karachi. Pakistan.
May 7th, 1987.

Dear madam Aslan,

Thanks for your letter of April 13, 1987. There is some change in our programme. Instead of going to Europe in June, we are now proceeding to USA on May 12, via Japan. From USA, we shall visit you some time in the first fortnight of August 1987. We shall let you know exact dates of arrival in Bucharest 3-4 weeks in advance, as advised by you. Kindly reserve accomodation for me and my wife on the dates to be notified by us.

P.T.O.

Thanking you,

Yours Sincerely

Dr. S. Koreja.

Dear Mr. Korejo,

I received your letter and I am glad to hear that you and your wife want to come to us in June.

We generally recommend a two week stay necessary for a medical examination, laboratory tests and a course of treatment under our supervision. Afterwards you may continue it at home according to the indications received here.

Enclosed herewith you have our conditions.

Please, be so kind and let us know 3-4 weeks in advance the exact date of your arrival in order to make a reservation for you and your wife.

Waiting for your decision, I remain

Yours sincerely,

MEDICAL REPORT

Mr. Man Maqsund, 46 years old, of Pakistan, was examined at the National Institute of Gerontology and Geriatrics on July 5th, 1982.

The patient presented, at the age of 39, crises of bronchial asthma and ocular disturbances of inflammatory type probably at the same time, as he is under dexamethasone treatment 1.5 mg/day, for 2 months, for both diseases.

At the same time with cortisone treatment he begins to present tachycardia with unsystematic precordialgias, osteo-myalgias, edemas of legs, the increase of dyastolic pressure to 95-loo mmHg. Since 1977 it appears a depressive mood treated until now with amitriptiline, tofranol, anafranol and other anti-depressives with partial and inconstant improvement of depression.

From his antecedents we also mention: a duodenal ulcer at the age of 21.

Now he complaints of memory and concentration disturbances, feelings of burns in legs, constipation, intermittent tachycardia, tendency to fattening, diminished appetite, inconstant muscular cramps in legs at prolonged walks, fatigability.

Physical examination reveales a patient with normal weight, integuments with maintained elasticity. Gerontoxon +. S.Aslan +. Crepitations at great joints mobilization. AV = 8o/min. with a few extrasystoles. Blood pressure = 12o/9o mmHg. Permeable peripheral arteries. Digestive and excretory apparata clinically normal. Normal periosteal-tendon reflexes. Slight superficial hypoesthesia of legs. Palm-chin reflex positive on the right. S.Noica +.

Diagnosis: - Hiden depressive syndrome.
- Chronic arthrosic rheumatism with postcortisonic osteoporosis.
- Intermittent extrasystolic arrhythmia.
- Dyslipoidemia of IV-th type (postcortisonic).
- Peripheral neuropathy with burning feet syndrome.

./.

We recommend the following treatment:

- ASLAVITAL ampoules and pills: one course of 12 injections (an injection of 5 cc every Monday, Wddnesday and Friday) and ASLAVITAL pills (2 pills a day, every Tuesday, Thursday and Saturday, for 4 weeks. Rest interval of 30 days after which the patient repeats the associated course of injections and pills.

- Associated medication: It is advisable to remove the anti-depressives. To take Vitamin B6 250 mg/day and Vitamin E 100 mg, 20 days/month. Also Bepanthene – 3 tablets/day.

Periodic general check up.

GENERAL DIRECTOR,

Acad.Prof.Ana Aslan, M.D., D.Sc.

Consultant physician,

Speranţa Băbeanu, M.D.

Sinus rhythm, 78/min. QRS axis at -15°. Troubles of antero-lateral repolarization.

Cardio-pulmonary x-ray: Hila with fibrous changes. Heart and aorta of normal aspect.
X-ray of thoraco-lombo-sacral column: Slight T-L dextro-convexe scoliosis. Tendency to marginal osteophytes. Tendency to disk-arthrosis at the level of L1-L3, with very slight intraspongious hernias, with very slight anterolisthesis L2-L3. Incipient osteo-arthrosis of L-S post.small articulations.

MEDICAL REPORT

Mrs. SCHACHIN MASOUD, aged 38, or Pakistan, was examined at The National Institute of Gerontology and Geriatrics of Bucharest on 24th March 1989.

The patient complains of diminished integument tonus with their dryness and a beginning of diffuse wrinkles.

She has no pathologic history, excepting the tendency to overweight.

Normal menstrual cycles.

Physical examination revealed: dry integuments with persistent cutaneous fold, cold extremities. Normal locomotor apparatus. Subcutaneous cellular tissue with deposit dominantly on the lower half fo body with slight infiltration at lower limbs level.

Blood pressure 12o/8o mmHg. Cardiac rhythm 8o/min. with respiratory arrhythmia.

Digestive and excretory apparatus: normal.

Neurologic examination: Absent abdominal cutaneous reflexes. Symmetric periosteal-tendon reflexes. Present palm-chin reflexes.

We recommend a prophylactic general and cutaneous treatment according to the following schedule:

1. Gerovital H3 - 2 pills/day, for 15 days/month.
2. Cutaneous use of Gerovital H3 cream by mild facial massage as well as maintenance massage at body level.

Medical gymnastics for muscle strenthening.

Hypocaloric diet rich in vegetables, fruits, alternating with proteins.

DIRECTOR,

Mircea Dumitru, M.D., D.Sc.

Attending physician,

Dr. Speranţa Băbeanu

MEDICAL REPORT

Mr. MIRAG PHALID, aged 70, of Pakistan, was examined at The National Institute of Gerontology and Geriatrics on 24th March 1989.

The patient complains of paresthesias and pains at gait at the level of the left leg external face, intermittent pruritus especially at night followed by integument hyperpigmentation, physical fatigability, mild disturbances of memory and concentration.

Physical examination revealed a patient with normal hight and weight, moderately dry integuments, axillary erythrasma, pityriasis and zone hyperpigmentation at left arm level. Normal phaners.

Locomotor apparatus: pains at the compression of left external leg area with negative sciatic elongation, lumbar rectitude without lumbar contraction, diminishing of leg muscle tonus. Chiray-Roger sign: positive on the left. Crepitations at mouvement of the right shoulder.

Respiratory apparatus: rare cough. Thoraco-pulmonary hyper-sonority. Rough bronchial rales to both bases.

Cardio-vascular apparatus: Blood pressure 155/90 mmHg. Regular cardiac rhythm 72/min., short apical and aortic systolic souffle without irradiation. Permeable peripheral arteries.

Digestive apparatus: Slight abdominal meteorism. Liver: the lower border palpable 2 cm under under arch, slightly increased consistence. Normal spleen.

Uro-genital apparatus: Unpalpable kidney. Normal mictions. Mild disturbances of sexual dynamics.

Neuropsychic system: Diffusely diminished periosteal-tendon reflexes, absent patellar reflex bilat. and left Achilles tendon-reflex. Disturbances of superficial sensitiveness on left external popliteal sciatic nerve. Slight disturbances of concentration and memory. Normal sleep. Affective equilibrium.

./.

Clinical diagnosis:

Lombodiskarthrosis with left radicular compressive syndrome L_5-S_1. Chronic bronchitis due to smoking.

Treatment recommendations:

1. Gerovital H3 - 3 injections/week, alternating with Aslavital - 2 pills every second day, 3 times/week, for 4 weeks.
   Rest interval of 30 days and the patient repeats the schedule.
2. Clorocalcin 3 x 5o drops/day, 2 bottles, after which Cedecalcin 3 pills/day, 2o days/month.
3. Vitamin E 2oo mg/day, 2o days/month.
4. Apilarnil 3 pills/day, for 2o days. Rest interval of 10 days and the patient repeats it.

We recommend decontracting electrotherapy and kinetotherapy.

It is also advisable to give up smoking.

In order to establish the subsequent therapy we recommend the rachimedullary investigation by nuclear magnetic reconance, electromyogram of lower limbs and periodic rheumatologic and neurologic examination.

22 December 1978.

Dear Professor Mme Aslan,

As a practising physician of Bangladesh I wish to extent my along with my other fellow co-physicians our heartiest congratulations for your miraculous success of developing an ant-ageing drug "Gerovital". In the history of medicine, surely we would all share the pride of your invention, and would feel proud of in our ages for such a notable achievement in the progress of medical science.

In fact, to market the drug when you visited the Philipines, I wished very much to express my congratulations then, but your Embassy in Bangladesh took unusually long period of time to inform me your address. Only yesterday I received a reply from the EMBASSY OF THE SOCIALIST REPUBLIC OF ROMANIA IN BANGLADESH, and therefore writing you today.

On the other hand, I too wish to use the drug on myself. Indeed I am not exactly 'old', and born in 1933. But somehow I look little older than my class-friends, with whom I read in the schools and who are actually contemporary of mine. Besides, I have no ambition of growing old even at old age.

I therefore wish to test the drug on myself, and wish to include my name in the list of your 'test patients', which can also help you if there is any intereference due to environmental difference. But the drug 'Gerovital' is neither available, nor, I pressume, will be available in foreseeable future. I can therefore never avail the same, unless you kindly send me the drug for a full course of treatment either directly through the post or through your Embassy here on 'gratis'.

I shall be much obliged if you kindly therefore send me a course of the drug for "professional use" free of cost, and oblige.

Thanking you,

Yours sincerely,

28 January 1979.

Dear Professor Aslan,

Your invention of "Gerovital", an anti-ageing drug, has brought a miraculous revolution in the history of both medicine and mankind. Being a clinical physician I instantly felt congratulating you for your success and to share the marvelous achievement.

But I could not do so earlier as The Embassy of the Socialist Republic of Romania in Bangladesh took unusually time to inform me your address, and it was only on 18 December that the Second Secretary thereof, Mr. Valeriu Simion, kindly informed me your address, and I instantly wrote you on 22 December 1979. I am, however, sorry that till today I haven't received the reply for my own ambition.

I am not an 'old' as such, and born on 1934. But I do look pretty old and frequently behave like the old. It is for this reason alone, I hoped if I could ever try that 'Gerovital' for myself also. But there are number of problems for this. Firstly, This drug 'Gerovital' will perhaps not be available in this country for some more years to come. Secondly, financially I am not well enough to afford the cost of importing the drug from Romania or from other countries, where that is available. For these ~~xxxxxxxx~~ limitations I requested you on 22 December in case you can show me the very personal favour. I can only try the drug myself provided showing me the favour you kindly send the medicine to me 'on gratis' as 'professional sample' or send the drug for full dose through your Embassy here in Bangladesh. I shall be grateful if you kindly extend your such a favour and kindness to me, and let me be benefitted by the drug.

Yours sincerely,

Nr.8112

Dr. Noor Jehan Hameed
255/1/10, Garden West,
Ruby Street,
Karachi, 3
PAKISTAN

Dear Dr. Hameed,

In answer to your letter, I inform you that you may continue the treatment with prednisolone in small doses and to associate a treatment with Gerovital H3 according to the following schedule.

First a tolerance test: first day - one suboutaneous injection of 1 cc; second day - one intramuscular injection of 2 cc. If after this test you do not present any allergical phenomena, you may begin the real treatment as follows: one course of 12 injections in 4 weeks (an intramuscular injection of 5 cc every Monday, Wednesday and Friday). It follows a rest interval of two weeks after which a course of 24 pills of Gerovital H3 in 12 days (two pills a day, one pill taken two hours after breakfast and another pill after lunch). To be continued by alternating courses of injections and courses of pills as above, with the prescribed rest interval between each separate course.

I should appreciate if you will keep us informed about your further condition.

Yours sincerely,

Acad.Prof.Ana Aslan, M.D., D.Sc.

Dear Professor Aslan,

I am a doctor (physician) but now I am addressing this letter as a patient, with great confidence, as I have heard a great deal about your medical acumen, knowledge and experience through the courtesy of Mr.Rahim Bux Khan, Governing Director ofBuxly Paints Limited, Karachi.

In short,I have been suffering from severe pain in knee and back. Firstly, I had an attack of pain in back, about six months ago, and then gradually it shifted to my know and now to ankle also. Originally,my attending doctors took this as an ordinary attack of pain and therefore they tried to treat it accordingly. But, within a short span of time my condition worsened and I grew anaemic. When the attending physicians could not detect the causes, they suggested prednisolone which gave good results at high dose levels but as this drug is not considered free of other involvements, they advised me to proceed to United Kingdom for further examination. I therefore went to London and reported at the Royal Postgraduate Medical School, Hammersmith Hospital, London.

I take the liberty of enclosing a photostat of their report dt. 14.7.1976, prepared by their Consultant Haematologist, which is self-explanatory. As suggested by the Consultant, I have tried to reduce the dose after completion of two months at 5 mg but no sooner I had reduced the dose by a little, say about one quarter of it, I had been attacked by severe ankle and knee pain on the left side, extending upto shoulder. Consequently, I was forced to restore it to 5 mg daily and have been continuing at this dose. It seems to me from experience that if I took 5 mg prednisolone daily, I felt better and relieved of pain but the day I reduce the dose, there comes the attack of pain with unusual dullness. My Haemoglobin and Urine are normal, with little retention of water, most probably due to continuous use of prednisolone. Therefore, it seems almost impossible to stop it at this stage when even a little reduction in the dose causes severe pain in knee and ankle. Further, I start feeling tenderness in both breasts atleast 15 days before the menses I know it not whether this has any connection with pain in knee and ankle but I am having this for the last two courses.

Since prednisolone is not free from side effects I am afraid of continuing with this drug for long, while it is also

...2...

not possible to stop it, because of fear of immediate attack of pain. In the circumstances, I shall be grateful if you will kindly suggest any other medicine which will be helpful in keeping me free from pain —knee and ankle— and will also help me to maintain normal health including perform my daily duties which are conducting classes in pharmocology for about two to three hours daily, in a medical college and other normal household work.

Thanking you, and looking forward to the pleasure of hearing from you soon,

Yours cordially,

Jehan

TO WHOM IT MAY CONCERN

Dear Sir,

Re: Dr. Noor Jehan HAMEED

I saw this patient in the Outpatients Department on June 29th 1976 and although she gives rather a curious history (her illness began on May 3rd 1976) I confirmed that she is suffering from autoimmune haemolytic anaemia, now well controlled on 7.5 mg prednisolone daily.

In view of her sex, age and the serological findings of the AIHA, it seems likely that the anaemia is associated with systemic lupus erythematosus and the ANF level (25 units) confirms this. She has no other stigmata of SLE at the moment (except perhaps occasional pain in the knee). Her urine is normal on routine tests, and her blood urea is 3.5 mmol/l and creatinine 53 µmol/l. However, she should be carefully watched and perhaps a kidney biopsy done.

She could reduce the steroids to 5 mg daily now and should maintain this level for at least two months. If her haemoglobin is still well maintained and no other symptoms of SLE have developed it could then be gradually stopped.

Yours faithfully,

Sheila Worledge

Dear Colleague,

Thank you for your information regarding Begum Nusrat Bhutto, which I consider most important for the continuation of the biotrophic treatment with Gerovital H3.

Of course, being confronted with such a reaction, it is advisable to take it into account as an allergical compound and to stop any parenteral administration of Gerovital H3 (injections) for 2 months.

After this period, you could try it and if there are the same results, give up all the procain preparations administered parentally.

If there are no signs of allergical intolerance at the oral administration, I advise her to take only Gerovital H3 pills, 1-2 pills daily, for 12 days every month.

I shall be very grateful to you if you give me further information about the evolution of her condition, so that I could indicate you the treatment that is to be continued.

Yours sincerely,

Acad.Prof.Dr. Ana Aslan

Dated 01 November 1975

Dear Dr. Aslan

Reference your examination on 24 October 1975 of Begum Nusrat Bhutto.

I have to inform you that before starting the Gerovital-H.3 injection Skin Sensitivity test was done on Begum Nusrat Bhutto. It was found that an immediate wheal appeared over the test site compared to the control, lasting for more than 4 hours and accompanied by redness of eyes. In addition the old sensitivity test done by you also showed a blue Ecchymotic spot at the area when examined here. Therefore, the injection treatment has been postponed so that your advice in this regard may be taken. However, the oral treatment has already been started.

I shall be obliged if you could advise me about the use of Gerovital-H.3 injection.

Yours sincerely

Mehboob

Dear Mr. Farid-ul-Haq,

In answer to your letter of July 5th, we have to inform you that your wife should come to Romania for a combined treatment of pneumology and our treatment. It is better for her to come until October when the weather is still good.

Mrs. Farid-ul-Haq may stay at the Otopeni Clinic where she will have the best accomodation. For our treatment we generally recommend 2-3 weeks necessary for investigations, laboratory tests and treatment. But there will be necessary another two weeks in a Clinic of Phtisiology or a clinic for infectious diseases.

Please, let us know the exact date of her arrival.

Yours sincerely,

Acad.Prof.Ana Aslan, M.D., D.Sc.

Soția va veni în octombrie.

Dr, Prof Ana Aslan,

Geriatric & Gerontologic National Instiute,

BUCHAREST-ROMANIA.

Dear Prof Dr, Ana Aslan,

My wife is suffering from BRONCHITICS ASTHAMA for the last 15 years. The broncal tubes are in a bad shape. The E.S.R is 130 and feaver remains 100° constantly. The colour of the sputum is yellow and is quite thick. The quantity of the sputum which she is able to discharge by the postal drainage is quite sufficient.

She has been taking a lot of antibiotics which gives her temporary relief.

I shall be grateful if you send me details of the expences including boarding and lodging during her stay in the clinic. I am enclosing herewith the medical history of the patient for your kind perusal. I shall also appreciate if you can send or suggest some medicines for the time being before she flys for Romania. We can also send you any test report which may be required by you.

Thanking you,

Yours Faithfully,

Faridul Haq

Lahore
Pakistan

Dear Mr. Hak,

I am answering your letter on behalf of Professor Aslan who is abroad giving lectures in differeht countries

We agree with your coming to our Institute for treatment with Mrs. Hak. A stay of two weeks would be necessary for thorough medical examinations, laboratory tests and a period of treatment under our direct control. The treatment has to be continued afterwards at home according to prescriptions. All arrangements for your stay in clinic can be made through a local tourist agency or directly with the Romanian Tourist Office "Carpati" of Bucharest, Blvd Magheru 7. Herewith our general informatio concerning the treatment as well as folders of the tourist agencyin case you might be interested in visiting the country. We advise you to make reservations at the Otopeni clinic which is 17 kms from Bucharest in a nice park. Cost of treatment from $17 to $25 per day for one person according to accomodation conditions. For contractual prices further information will be obtained from the tourist agency.

Hoping you will inform us when you come, we remain

Yours sincerely,

Doctor C. David M.D., D.Sc.
Assistant Director

Nov 1.197- Lahore - 10391

Dear Prof. Anna Aslan,

Some friends of mine are full of praise for Your treatment in your Sanitorium. I intend coming to You with my wife, sometime in April 1972.

I am 55 years, a diabetic case, though fully controlled through diet and one Tablet of Diabenese. I am in the Government Civil Service & now retiring in June '72. First thing that occured to us was to go to You for the pleasure of meeting You, & to know what useful work You are doing in the field of Geriatrics.

May we know what will be Your charges etc & how much time You would want us to stay in Your Sanitorium.

We are a simple couple with simple & regular habits & have led a healthy life so far.

If you are kind enough to send us some advance literature we wd' appreciate that so that we come fully prepared I am sure you wd' also like to give us some information about Bucharest/Romania as shd/be made available to tourists or strangers so that we don't miss anything.

With regards,

Yours Sincerely,

Said. K. Hak.

Dear Prof. Anna Aslan,

H-3.

I am very much interested about the above element, news of which were splashed in some of the Local News Papers recently.

I am wondering whether it would be possible for your goodself to enlighten me with more facts about the said medicine as a number of my other friends are also interested in it.

I can also assure your goodself, agreeing with your noble motive behind preparing this medicine, that I would strictly follow your principles in this respect in the interest of common people here who are struggling hard in this days of unfavourable circumastances.

I would be too pleased if I can play my part towards your goal, for implimentation.

I am confident that I will be favouredwith an early reply,

Meanwhile I have the Honour to remain,

Yours Truly,

MAli Dawd

Dear Mr.Dotiwala,

In anser to your letter, I want to inform you that you can give your mother 2 pills of Gerovital H3 every day for 12 days, have a rest interval of 10 days, after which she can repeat another course of 24 pills. She can take 8 courses every year.

The treatment that I had indicated to her, alternating pills with injections was more efficient than only with pills, for her age.

My secretary will send you herewith enclosed the addresses where you can order Gerovital H3.

Awaiting your further news, I remain,

Yours sincerely,

Acad.Prof.Dr. Ana Aslan

PAKISTAN.

November 3, 1975.

Dr. Anna Aslan M.D., D.SC.
Ministerul Sanatatii,
Institutul De Geriatrie "Bucuresti"
Str. Minastrirea Cardarusani, 9 - Sector 8,
Bucharest,
ROMANIA.

Dear Doctor,

In your letter of August 6, 1973 you Had recommended for my mother, aged about 85, a course of 12 Injections in 4 weeks (5 cc injection every second day) followed by 24 pills in 12 days (2 pills a day) with a rest interval of 10-14 days between the course of Injections and the course of pills and this cycle was to be repeated with due attention to the prescribed rest period. However, my mother flatly refuses to take injections and I will appreciate if you will kindly advise an alternative prescription consisting of the pills only. Please also advise a Tolerance Dose of Pills if a Tolerance Test is necessary even in the case of pills also.

The reason why the treatment of Gerovital could not be started till this day is that my mother was taking an Homeopathic treatment and was not ready to give up that treatment until she was satisfied that Homeopathy will be of no further use to her.

Your prescription of Injections and Pills as per your above refered letter of 6/8/1973 was based on the case history of my mother which I had sent to you in 1973. I wanted to send you her history again this time but I could not find a copy of it, and I hope that my failure to repeat the history this time will not make any difference. However, to repeat this history from my memory, my mother had thromobosis in her leg, has osteo-arthritis, she is shrinking and now she encounters difficulty in breathing. She also suffers from burning sensation in arms and legs and a strong pulling sensation in her stomach - her stomach has caved in very badly. She also has developed a hump in her back.

I would now fervently request you to kindly reply as urgently as possible because due to foreign exchange and other problems here it will be quite some time after the arrival of your reply that we will be able to obtain Gerovital, while day by day my mother's health is failing very rapidly.

Anxiously looking forward to receiving your reply in the nearest future and wishing you a large measure of health and a greater success and fame,

Very sincerely yours,

(PURVEZ D. DOTIWALA).

Mr. Purvez Dotiwala
Noshirwan Naman,
Parsi Colony,
Karachi 3
PAKISTAN.

Dear Mr. Dotiwala,

We have received your letter and we send you our apologies for the delay in answer because of the great number of letters received recently.

In your mother's case, it is advisable the following schedule of treatment: one course of 12 injections in 4 weeks (an injection of 5 cc every second day); follows a rest interval of 10-14 days after which one course of 24 pills in 12 days (two a day, one pill taken after breakfast and lunch); follows a rest interval of 10-14 days after which another course of injections as above. To be continued by alternating courses of pills and courses of injections as above, with the prescribed rest interval between each separate course.

Treatment by injections only is more efficacious at advanced ages (7 to 8 courses in one year).

A tolerance test must be carried out before commencing treatment although intolerance is very low - 1 per 3,800 cases. First day: 1 subcutaneous injection of 1 cmc; second day 1 intramuscular injection of 2 cmc. If after this test the patient does not present any allergical phenomena, she may begin the real treatment as above. There are no other contra-indications apart from simultaneous administration of sulfonamides, eserine or neostygmine.

Unfortunately we cannot send you Gerovital free of charge. We send you herewith the list of addresses where you can obtain our product Gerovital H3.

We shall be glad to give you any further information or whatever advice you might require.

Yours sincerely,

/Prof. Anna Aslan, M.D., D.Sc.

Prof. Dr. Ana Aslan,
Institute of Geriatrics,
Bucharest
Romania

Dear Dr. Aslan,

My poor mother who is now 80 years old has almost never seen any comfort or happiness in her long life and now her miserable life is made more miserable by a failing and poor health. She is shrinking, is suffering from Osteo-arthritis and is stuck down with all the old age sicknesses. Her stomach and chest region constantly get unbearable strains and pulls and she gets terrible pain in her legs. A few year ago she also had trombosis in her leg. She cannot eat well and feels very weak.

My mother is not able to bear all these strains and pains any more and breaks down crying very often and that hurts me very much. I was, therefore, hoping and praying for some miracle drug to come along when I happened to read about your marvelous invention Gerovital and I now appeal to you in the name of humanity to be kind enough to send me that much quantity of Gerovital which you can conveniently send and which would prove sufficient enough to cure my mother of all her troubles at least for a reasonable lenght of time. Since this request is for a ~~mother~~ mother, dear Doctor, I have not got the slightest doubt that you will be moved by my appeal and will be compassionate enough to oblige me with a sufficient quantity of your wonderful drug, Gerovital.

I am requesting you to send Gerovital free of cost because, being a man of very moderate means, I cannot afforded to pay for it but if it is just not possible to send Gerovital free, please send me Proforma Invoices for an experimental quantity of it for my Doctor to ascertain its effect on my mohter. Or, if possible please send an experimental quantity to my family doctor as a free sample.

My family doctor's name and address: Dr. K.B. Mody
451 Kutchery Road,
Karachi/Pakistan

When you send Gerovital, kindly enclose the necessary medical literature ~~thm~~ in English. But if no lietrature is available, at least please send an instruction on deseage etc.

I now urge you to kindly comply with my request at your earliest convenience becuase I amy have to leave the city for few months and once I leave, there will be none to handle with sincereity this worthy matter of alleviating my mother's suffering.

Meanwhile, I wish you a greater measure of success in your noble mision of fighting the scourge of sicknews and pary for your health and prosperty,

Sincerely yours,
PDotiwala

Dear Mr. Hak,

I have received your letter of March 21st and I am glad you are interested in the sale of Gerovital H3 in your country. I inform you that a copy of your letter was sent to the Romanian exporters in order to get in touch with you and to send you full information in this respect. The Institute is dealing with scientific matters and we could not be able to give you the adequate information regarding the conditions you could be the representative for sale of the product.

Hoping you will be able to obtain the agreement of our authorities and be able to send the medicine in your country, I remain

Yours sincerely,

Dear Dr. David -

Yours of Nov. 30. 1971 received few days ago. The delay appears to be due to disturbed political conditions here. Thank God it's all over now.

We will come as soon as Govts' restrictions on foreign travel are removed. Thanks for your courtesy.

It is for your kind consideration to appoint me on Agency terms for the sale of Gerovital H3 as I find this medicine is sold through representatives in other countries. I would be able to push its wide sale in Pakistan. I have made preliminary survey after showing what material you had sent to me. I can undertake its serious business study further if you approve of this idea, firstly, in principle. I will abide by your instructions in this matter completely.

Dear Sir

I wrote to you some three weeks ago asking whether you could take my wife and myself for two weeks in January 1978. As I have not yet received a reply it seems that the letter may not have reached you.

We now plan to arrive about Tuesday 10 January, but I will in any case telegraph the flight number and the date and time of our arrival.

I should be grateful if you could confirm by telegram whether you can take us at that time.

When we were at Otopeni in November 1975 our doctor was

Dr. Esperança Marinescu. We hope that she will be able to take care of us again.

Yours faithfully

James Ilett

Dear Dr Aslam

My wife and I have read of your treatment which slows down the process of aging. We are interested in the possibility of having this treatment.

My wife is aged 56. She is vigorous and active but has various infirmities. She has to take thyroid pills (thyroxin sodium) daily; she has a nervous weakness which occasionally causes dizziness; she has a hiatal hernia; she has a skin sensitivity due to taking chloroquin phosphate in the tropics for long periods. All these matters have been fully investigated medically and do not require further specific treatment. She also has a hereditary tendency to arthritis.

I am aged 57. Generally I am very fit, with no more than a touch of arthritis in my knees and a tendency to varicose veins. I also have some occasional ear trouble, probably as a result of a lot of flying. I have to have a series of cortisone injections in my nose twice a year. This enables me to keep travelling, which my job requires.

We should be able to visit Romania towards the end of November, after I have finished my present work here. I should be grateful if you would tell whether you could take us at that time, how long we should need to stay, approximately how much it would cost (I should be paying, through your exchange control, in dollars or sterling), and any other relevant details. The Romanian Embassy here has kindly given me some tourist literature, besides your address; so we have some general idea of the facilities and attractions of your country.

Could I ask you to be good enough to reply by air mail ?

Yours sincerely

My respected Doctor, 184/111-79 90 Nawaz Garden, Lahore, Pakistan 28-12-78

I wish you a happy New Year. May The Almighty God bestow upon you a long life of happiness, health and prosperity. I recently read an article about the wonderful Gerontal drug invented by your Honour after long researches. The drug is reported to be good against Asthama, ailments of bones, joints etc. It will alleviate sufferings of ailing humanity and will ever remain a noble and shining example of selfless service to humanity.

2) I may be allowed to bring to your kind notice that my wife of about 45 years has been suffering from pain & swelling of joints in her body for the last 15 years. Allopathic medicines have not only failed to cure the disease but also adversely affected her health. She cannot digest eggs fish or starchy food. Even light food taken in small quantities cause gas in stomach. She is suffering from loss of apetite. She is unable to get natural sleep and is an addict to Diazapam for getting scanty sleep at night. Her health has deteriorated considerably and she has become old prematurely at the age of 45 years. She cannot walk or exercise which make her bodily joints very painful and swollen. All available drugs in Pakistan have been tried but without any relief. The drugs have only damaged her digestive system considerably. I am at my wits end and worried about her failing health daily.

3) I am a helpless and worried man who is forced

No.2256

Mr. M. Nawaz MALIK
97-A Block,
New Muslim Town
Lahore - PAKISTAN

Dear Mr. Malik,

I received your letter and I am sending you enclosed herewith for your information a brochure regarding the geriatric cure in our country. Generally we recommend an associated treatment with injections and pills which is more effective than pills alone. But if for special reasons injections cannot be associated, pills alone can be administered (courses of 24 pills in 12 days - 2 pills a day, one taken after breakfast and another after lunch) with ten-days intermission between the courses.

We do not deal with the export of our products, so that I advise you to order Gerovital to one of our representatives on the enclosed list.

I would appreciate to receive further news from you.

Yours sincerely,

Acad.Prof.Ana Aslan, M.D., D.Sc.

Dear Doctor,

I enclose herewith copy of an abstract from a local newspaper regarding your "Gerovital" anti-ageing pills. Considering this as a general tonic for health, as it appears to be, I would like to know further details such as duration of use, doses, price etc.

Looking forward to your response, I remain,

Yours faithfully,

(M. NAWAZ MALIK)

Anti-ageing pill

BUCHAREST, Dec. 28: There is a pill against unwanted life, anti-baby-pill. There is no pill against death out there is now a pill said to delay ageing or so it is claimed by Rumanian physician Ana Aslan. She has developed two drugs at her Bucharest — 'Otopeni' clinic which have given her international fame.

The better known of the two is 'gerovital' which she wants to be seen not as a 'medicine' as it does no 'cure' anything, claiming that it acts 'somehow like vitamins.

As proof of the effectiveness of drugs, Prof. Aslan points to herself. She is 81, still practising medicine and has been asking her 'gerovital' since she created it in 1957.

In 1952, she had founded the world's first geriatric research institute here.

Reading pamphlets accompanying the frail, octogenarian professor's prescriptions, one begins to think of a near-miracle drug. 'Gerovital' is supposed to be also good against asthma, ailments of the bones and joints and, last but not least against balding.—DPA.

MEDICAL REPORT

Mr. Syed Wali Ahmed Maulai, aged 50, of Pakistan, was examined in the National Institute of Gerontology and Geriatrics on 27th June 1985.

The patient presented pleurisy at the age of 10, and afterwards amebic dysentery for about 30 years with repeated episodes of acuteness, the last one being 6 months ago. Also in 1972 he presented repeated renal colics on the background of a lithiasis treated homeopathically.

Present complaints: hypogastric pains at walking or at prolonged orthostatism, the patient having a sedentary life; falling hair on his head since the age of 35; sometimes nycturia at coldness.

Physical examination reveals a patient with orthoger aspect, onychomycosis of left big toe, subdulness at the left lung basis. Blood pressure = 120/80 mmHg. Cardiac rhythm = 80/min., sometimes with periods of sinus arrhythmia. Unpulsatile right dorsal artery of the foot. Flexible abdomen, descending colon, colic cord; relaxed, meteoric cecum. Liver, spleen within normal limits.

Thyroid within normal limits. Chwostek ++. Very brisk bilateral osteo-tendinous reflexes.

Diagnosis: Chronic enterocolopathy
(chronic amebic dysentery).
Secondary hypocalcemia.

We recommend the following treatment:

GEROVITAL H3: 3 injections/week, 1 injection every second day, for 4 weeks. Rest interval of 2 weeks after which:

GEROVITAL H3: 2 tablets/day, for 12 days.

Rest interval of 1 week and the patient repeats the schedule

Associated medication: Calcium supplements.

It is advisable repeated treatment of amebiasis.

Respected Madame,

I am pleased to inform you that I shall be reaching Bucharest on Wednesday, June 26,1985 by Tarom, Romanian Airlines.

I look forward to meet your goodself and discuss matters of mutual interest. I would like to record an interview of yourself and other prominent Doctors working in your Institute.

Moreover, I would like to visit your great Institute so that I may collect first hand information. Please arrange to supply me informative literatures and photographs.

I shall be grateful if you kindly acknowledge receipt of my letter.

Thanking and assuring you of our best attention at all times and in the meantime with best wishes and kind regards, I am

Respected Madame,

I am in receipt of your kind letter dated March 4, 1985 and thank you for the same.

I am pleased to note that you appreciate my humble efforts in publicising your special system of treatment. I am sure you will receive many more tourists who will visit Romania for consultation and treatment.

I would like to visit Romania after May 10, as advised by you. There is one hinderance and that is I shall not be able to arrange a return air ticket for Bucharest and back to Karachi. You know my resources are very limited and it will not be possible for me to buy an air ticket.

I would request you to kindly advise the Romanian Embassy in Islamabad, Pakistan to provide a return air ticket so that I may travel by Tarom, Romanian Airlines.

Thanking you for your kind assistance and with best wishes, I am

Economic Cooperation Organisation

BY RATIFYING their earlier decision to revive the RCD as a new institutional framework — Economic Cooperation Organisation (ECO) — Pakistan, Iran and Turkey have given a new impetus to the move to institutionalise their economic and trade cooperation. The first session of the High Council of ECO was held in Tehran earlier this week. The move for a trilateral framework for cooperation, either within the old RCD or under a new arrangement, was first mooted by Iran early last year and was welcomed both by Islamabad and Ankara. However, under the new arrangement the scope and function of the ECO have been somewhat limited. A pragmatic approach has been adopted and the three parties hope to implement effectively projects in a few and selected areas rather than expand the field of cooperation so that it becomes unwieldy and no positive plans can be actually carried out. Thus the number of technical committees has been reduced from seven to four and cooperation is to be limited to infrastructure, technology and industry, agriculture and education.

If the new organisation is to be a success, it will have to display far greater dynamism than the old RCD. Despite all its declared aims, no concrete efforts were ever made to make the RCD an effective organisation. As a result the volume of trade among the member countries never exceeded two per cent of their total trade. Similarly a number of other projects, such as the RCD Chamber of Commerce and Industry and the RCD Reinsurance Centre, proved to be non-starters. The situation is, however, different today. Turkey and Pakistan have emerged as Iran's major trading partners over the last few years. Pakistan's trade to Iran and Turkey was 15.5 per cent of its foreign trade in 1983-84. Although the increase in intra-regional exchanges has come about on account of external economic and political factors rather than through the concerted efforts of the regional countries themselves, advantage should be taken of the situation which is more favourable for regional cooperation than ever before.

Although the economies of the three countries are not complementary, their industrial and agricultural development in the last two decades has created an opening for them to cooperate with each other in various fields. Previously the economies of the three countries were dominated by their economic, political and military links with the West, which limited the scope of regional cooperation on the basis of self-reliance. Today the emphasis is on South-South cooperation generally. Given the independence which now marks the policies of the ECO's member countries and the tariff barriers which obstruct the free flow of their trade which the industrialised countries, Iran, Turkey and Pakistan should find the conditions more conducive for cooperation among themselves. Particularly since the economies of the three countries have reached the level where mutually agreed integration of production in various sectors could be quite feasible. One other point that needs to be kept in mind is the necessity of developing the basic infrastructure needed for economic cooperation. This would include the development of the communications system, banking facilities, payment arrangements, etc. The committee on infrastructure could perhaps begin work by seeking to complete the RCD Highway and fill in the missing links of the railway network between Pakistan, Iran and Turkey.

The one-minute million

By Russell Baker

THE kid is in television, which is big, Larry, very big, as you know, and I am proud of him. My kid. "In television," I tell people, and they say, "Ah, TV, huh? Very big. You must be proud."

Sure, I'm proud. Listen, Larry, like you, I have always been small potatoes. My whole family, like yours. And what did we talk about? Small talk, right?

And now, thanks to this kid, I can finally have some big talk. "Come on over," I say to him on the phone. "Come on over so I can have some big talk."

Naturally he's embarrassed. I like that. It shows I raised him right. He reads, even if he is in television. He has read Fred Allen's line about New York being a place where "small men sit around enjoying big talk," and maybe he thinks I am trying to make a monkey of him.

"Why don't we just watch Gunga Din again on the VCR?" he says.

***

But I am not teasing the kid, Larry, because, honest to God, I really like hearing the big talk. It gives me such a sense of the scope of history and change in the world. For example, he got me thinking about how sad it is, what's happened to A Million Dollars in my lifetime.

A Million Dollars — I still say it with awe myself. You too, probably. Remember when we were kids what it meant? A Million Dollars.

Remember who had A Million Dollar, Larry?

Daddy Warbucks had a Million Dollars. John D. Rockefeller had A Million Dollars. That Saturday afternoon we went to the movies — remember the newsreel shot of John D. Rockefeller in which he was celebrating his 95th birthday, or something close, by giving out dimes to all his servants?

***

It sounds cheap now, but it looked pretty good at the time, eh, Larry? I remember you saying, "Wow, if we worked for John D. Rockefeller, with our happy-birthday dimes we'd be able to go to another movie."

Nowadays, though, the old fellow would have to give each servant $10,000 or so, or we'd denounce him for stiffing the help. Please notice, Larry, that I am engaging in big think. It results from big talk I heard from the kid.

"Did you know that TV commercial time during the Super Bowl cost A Million Dollars a minute?" he said.

"You wouldn't fun your old daddy, would you?" I said.

Even when the idea — maybe they call it a "concept" nowadays

Why t

PERHAPS, the reason which caused the breakdown of the UN-sponsored talks on the Mediterranean island of Cyprus was the classic Greek-Cypriot penchant of creating an opening and then when things start moving, add new conditions, making it difficult to proceed.

Or were the strings, this time, pulled from behind by Athens? Exasperated at the long drawn-out negotiations with the UN envoys climaxed by four days of face-to-face encounter with the Greek-Cypriot President Spyros Kyprianou in New York a week ago, the President of the Turkish Republic of Northern Cyprus, Rauf Denktash complained that the break came because Kyprianou "had raised new objections".

These related to a "draft agreement" hammered out by the UN Secretary-General, Javier Perez de Cuellar in extended rounds of patient negotiations last year with the two Cyprus leaders.

From carefully planted "leaks" in sections of the British and the American Press, it seems obvious this was no ordinary "draft" but had high-level endorsements.

The Secretary-General, for instance, had taken the precaution of enlisting American support for his efforts to remove a potent source of bitter conflict between two NATO allies — Greece and Turkey.

Concessions

Last autumn, according to these "leaks", President Reagan himself had won from Turkish President Kenan Evren sizable "concessions".

Presumably, these related to the return of nine or 10 per cent of the 40 per cent territory, now held by Turkish troops in northern Cyprus, the so-called panhandle (the handle of the frying-pan, an apt description).

The area was seized by Turkish troops in July, 1974 when they landed on the island to prevent the massacre of the Turks and the merger ("N ENOSIS") of the island with Greece following the coup against the Government of President Makarious by a pro-ENOSIS Greek-Cypriot thug, Nikos Sampson and the Cyprus National Guard.

Secretary-General de Cuellar's "draft agreement" proposed that the exchange of population that had, at that time taken place (about all 120,000 Turks are now in the Turkish-controlled enclave and *out 495,000 Greek-Cypriots in* Greek areas) was not to be forci

Withdrawal or redeployment

the Cyprus talks collapsed?

By Mohsin Ali

to sweeten the deal the Secretary-General proposed with the concurrence of the parties. The US was to finance a 500 dollars rehabilitation plan in two packages.

Half the funds was to help rebuilt the Greek tourist resort and port of Farmagusta in the south-west, just below the Turkish line. Its 40 hotels and casinos which served a thriving tourist trade were to be modernised to perk up the economy.

The other 250 million dollars of US assistance was to underwrite a Central Purchasing Fund — to help Greek-Cypriots buy, on favourable terms, homes, businesses etc they had left behind in the Turkish Areas, where, according to the Greeks, the local Turkish population has swelled by arrivals from mainland Turkey, only 40 miles away.

American aid

Understandably, "The Guardian" termed the US gesture "an aid package to buy peace in Cyprus".

The UN draft envisaged the island as "independent and non-aligned with no foreign bases and no military force of its own".

Presumably, the two "sovereign" RAF bases now in Cyprus at Dhekelia and Akrotiri were to be dismantled.

The British Press, though, has spoken of "a fall-back facility" for the US Rapid Deployment Force in the Turkish areas to be held for use in a contingency.

Interestingly, just before the President Kyprianou met Rauf Denktash, he had flown to London for talks with Prime Minister Margaret Thatcher amid reports he was seeking gurantees of the future constitutional set-up from the Commonwealth "which includes several Muslim countries". Or else from the Security Council.

Rauf Denktash, of course, had always insisted on a guarantee from Turkey which he felt was the only effective insurance against the sort of genocide his people faced in 1964, when a 1,800-man United Nations Peace-keeping Force in Cyprus (UNFICYP) was first inducted to prevent Turkish massacre and hold the warring factions at bay. The mandate of the Force has since been regularly renewed.

The UN draft envisaged the constitutional setup of the island "as two autonomous communal "states" linked to a federal centre" responsible for a specified number of common subjects. There also was to be a "federal zone" jointly administered by the United Nations and representatives of "the Fed-

plunged post-independence Cyprus into its worst orgy of political and diplomatic crisis.

Under that constitution, the President was to be a Greek-Cypriot, the Vice-President a Turkish Cypriot (with veto powers to prevent abuse of the rights of the minority community), the bicameral legislature was to have parity in the upper house and 70:30 representation in the lower houses for the Greek and Turkish-Cypriots.

Since the de Cuellar draft had circulated for sometime last autumn among all the parties, including Athens and Ankara, Rauf Denktash assumed when he met Kyprianou in New York two weeks ago that all that remained was to sign the "draft agreement" and setup working parties to thrash out the obstacles.

Figuring as "obstacles" were three main issues: the precise territory to be turned over by the Turks, the time-schedule of the pull-back of the Turkish troops and the international guarantees of the settlement.

Deadlock descended when President Kyprianou instead of signing demanded "to renegotiate many of the issues settled in the draft".

The British Press, better informed on Cyprus then the American media (Britain ruled the island for 81 years; the Turks for 400 years) has speculated on why the talks were scuttled.

Determined to block or slow down American arms flow to Turkey, badly needed by Ankara, the Government of Prime Minister Andreas Papendreau in Athens, it said, feared a Cyprus settlement which it thought might persuade the US Congress to lift the current restrictions on shipments to Turkey.

A British correspondent asked an aide of the UN Secretary-General if he thought President Kyprianou was under pressure from Athens to backtrack?

The unnamed aide replied: "Pressure? We are now afraid it might not be possible to solve the Cyprus problems except in terms of a Greek-Turkish conflict."

Rauf Denktash also appears to think so. The first thing he did on return home was to announce fresh elections next June to the 40-member Turkish-Cypriot Parliament. Causing concern in several capitals, he also announced that the "concessions" his people had offered now stood withdrawn and that he would not meet President Kyprianou until the UN Secretary-General had done "a good preparatory" work.

Ever the diplomatic optimist, the UN Secretary-General just before he left for Vietnam last week, however, talked hopefully of "the resumption of the Cyprus talks" in

Letters to the Editor

Pension anomalies

Numerous letters have appeared on the pension issue but without tangible results. In the Dawn of April 20, 1984, January 8, 1985, and January 16, 1985, letters captioned, 'Justice for pensioners', 'Pensioners' plea,' and 'Plea to Ombudsman', respectively, have given sound proposals, which, if implemented, could give some redress to the grieving pensioners.

These would, however, still fall short of proper and equitable justice towards old pensioners who had retired from meagre 1972 scales of pay i.e. before the pay revisions of 1977, 1981 and 1983.

Though the pensioners continue to be the responsibility of the Government, (otherwise why the grant of 10% ad hoc increases of 1981, 1982 and 1983?), they have not been looked after with as much sympathy as those in service.

Whereas, to cater for the ever-increasing cost of living, salaries of employees have been revised upwards a number of times, (to wit four times after 1962), and were doubled or even trebled, only small 10% ad hoc increases were doled out to the old pensioners. This has created an unhealthy disparity between members of the same class retiring at different times.

This point has been touched upon, in general terms, in para 3 of the letter "Pesioners' plight" in the Dawn of Janaury 20, 1985. Not only do the retirees of the same grade and length of service, draw more pension than their predecessors, even persons retiring later from a lower grade draw more pension than one retired earlier from a higher grade. This the erstwhile seniors, who retired before revision of pay, were granted less pension than their juniors retiring after revision of pay scales.

The following figures highlight the disparity in pension granted in a sample case, where persons havig alike particulars of service retired at different times. Calculation has been made on the basis of 30 years' service and having reached the maximum of the scale. The amount of present gross pension, is, including the portion surrendered for gratuity and commutation, if any.

Pre-1972: Rs. 1497.37
1972: Rs. 1613.83
1977: Rs. 1800.17
1981: Rs. 2040
1983: Rs. 2510

These figures are based on the scale for Grade 18, whereas a Grade 17 employee retiring now will, as the orders stand, receive a pension of Rs. 2128, i.e. more than that for pre-1983 Grade 18.

This, indeed, is a very unhealthy disparity, and is likely to create rancour among the old pensioners besides being against all norms of justice, equity and fairplay, which demands that along with any revision of pay scales, calculation of pension also should be revised accordingly.

To arrive at the present net pension the above gross pension has to be reduced by about 25 to 30 per cent for pre-1972 pensioners, because of gratuity and commutation. Deduction of ¼ pension for gratuity was then compulsory, and was made optional in 1972. Its restoration, therefore, is strongly called for after the total amount paid has been deducted from the monthly payments of pension. Besides levelling the different treatment (of compulsory and optional gratuity), meted out to the old and the new pensioners, this will indeed be a generous act of welfare on the part of the Government.

The old pensioners, especially of the pre-1972 grades, being the lowest paid, are extremely hard hit. Aged already in their 80s, if still living, their number must only be quite few. Whereas God has been gracious in prolonging their life span, the disparity in the rates of the old and the new pensions has turned it into a poor quality life. A very strong appeal is, therefore, made to the Government for improving the quality of that life, by levelling the old and the new pensioners with the removal of the disparity in their pensions; and by restoring the portions deducted for gratuity and commutation, when the benefit thereof has been offset.

Mass transit

It has been observed that amongst the heavier expenditures of foreign exchange is our import of fuels. To bring the nation together we have depended on air travel and road travel, both items which consume more fuel per person than railways.

Should we not consider improving the railways so that inter-city travel is facilitated and petrol consuming cars are restricted to "within" the cities?

Now that we have our own steel mill, it should be possible to make and lay rails, fabricate rolling stock etc. entirely with our own resources. Dual tracks between Karachi, Hyderabad, Quetta, Lahore, Islamabad and Peshawar would revolutionise inter-city travel for people as well as goods. Cargo movement is presently preferred by more expensive trucks simply because rail shipments are so uncertain and time-consuming. If more tracks are laid, and adequate rolling stock installed, it should be possible to move cargo by rail economically with enormous saving in fuel imports.

Rail schedules can be so ar-

THE failure of the Naqoura talks between the military leaders of Israel and Lebanon has at least produced one positive result. It has laid bare the Israelis' designs in South Lebanon. It is now clear that their much trumpeted three-stage "unilateral" withdrawal is, in the last analysis, a programme for redeployment of forces. When the Lebanese confronted them with their demand for a withdrawal time-table, the Israelis could only commit themselves to the February 18 deadline for leaving the Sidon area. Thus they hope to keep the door open for their continued occupation of the Lebanese border area, if not directly, then by proxy. According to Israeli plan, which is no more a secret now, the occupiers do not want the Lebanese army or the UNIFIL anywhere in the area from the border to the Zahrani River. This region is to be controlled by Israel itself through the 1,500-strong SLA (South Lebanon Army), financed and armed by Tel Aviv. Since the SLA is a predominantly Christian militia and cannot survive in a Muslim majority region the UNIFIL is to man the area between the Zahrani and the Awali rivers to shield the SLA from anticipated harassments and attacks by the Muslim challengers of the occupation.

The Israelis are seeking to retain a toe-hold in Lebanon for any further military action they might plan in the future. Moreover, Israel would, thus, have a say, even though indirectly, in the settlement of the Lebanese problem. So far as the Arabs and the Lebanese are concerned, this is a completely unacceptable position. The real aim of the Israeli invasion was simply not that of removing the threat of PLO attacks from Lebanon. Israel was interested in redesigning Lebanese politics by force. It tried to set up a Christian-led government in Beirut, drive out the Syrians, subdue the Muslim majority and dictate a peace accord on its own terms. It also hoped to crush the Palestinian resistance and end Arab opposition to the Zionist absorption of West Bank and Gaza strip. Israel's ambitions have remained unfulfilled. The resistance to Israeli occupation today remains as strong as ever though it is not spearheaded by the Palestinians, but the Shiite Muslims. The Israelis have been forced to fall back to redeployment as they find the cost of invasion and occupation too high: so far 607 dead, 3,500 wounded, besides the big financial investment involved. It would indeed be in Israeli interest and in the interest of peace and security if the Israeli leadership were to recognise the grave dangers inherent in such military and diplomatic interventions which are in violation of international law and the norms of diplomacy.

Deserving doctors

THE refusal of Oxford University dons to grant an honorary doctorate to Prime Minister Margaret Thatcher is only the second time in the history of such awards that an ex-student of the University, who subsequently became Prime Minister has been rejected. In making their decision the Oxford University dons broke an age-old tradition of automatic patronage and opted to reserve the award of honorary degrees to those who genuinely deserve it for some positive contribution to higher education, scholarship or service to humanity.

Others too should learn from the Oxford University dons. Too often, in too many educational institutions the world over, honorary degrees are awarded with a readiness that only serves to devalue them. Ruthless dictators have been awarded degrees; politicians or government officials with effective lobbies or with whom, educational institutions for one reason or another wish to curry favour have also been recipients; flamboyant "public personna" with nothing but effective PR behind them have assumed Ph D status in defiance of all the laws of probability. It is heartening to note that one of the premier educational institutions in the world has decided to put an end to the farce. Simply achieving a high station in life or being in the public eye should be no criterion for being awarded an honorary doctorate from one's alma mater. It is not success that should be rewarded, but scholarship dedication, courage and service to the cause of humanity and justice.

Even when the idea — maybe they call it a "concept" nowadays — even when the concept sank in, I didn't really cry. Just sat there getting quieter and quieter and filling up with lugubrium, or lugubriousness, or whatever you call it when the melancholy for glories that are past is seeping into your marrow.

That A Million Dollars had come to this. And in my lifetime. A sum once possessed only by the earth's titans — Warbucks, Rockefeller, the Sultan of Hyderabad — my childhood's monetary symbol of magnificence was now so trifling that it could buy only a 60-second opportunity to hawk snake oil between touchdowns.

Larry, Larry, what has the world come to? And in our lifetime? While the kid was destroying the sense of values on which I'd built my life, I started remembering other proof of the galloping decay, and I don't just mean Weinberger and those Pentagon airheads talking about $50 billion like it was money for Jujubes.

***

Something came back to me, something so monstrous I'd forgotten it until the kid activated my brain. It was a row house I saw in Manhattan last month. It was smaller, more decrepit and located in a dumpier neighbourhood than that similar row house you bought in 1956 in Baltimore for $24,000.

The Manhattan row house was priced at A Million Dollars, plus a little change; to wit, $200,000. I remember saying to the real-estate agent, "You mean for A Million Dollars, plus $200,000, you cannot buy Calumet Farm and half the rest of Kentucky, but only a $20,000 Baltimore row house?"

I guess the shock was so bad I immediately blacked it out until the kid came over and started talking football commercials. What I'm saying, Larry, is, what's the point of being a Millionaire anymore?— **Dawn-NY Times Service**

Body opiate may help stroke victims

SAN FRANCISCO (UPI) — Dynorphin, one of the body's natural opiates, helped prolong the life of cats who have suffered strokes and may have implications for human stroke victims, University of California medical school scientists say.

The researchers said dynorphin prolonged the survival of six out of 10 feline stroke victims given a synthetic version of the opiate. There were no survivors among 12 cats in the control group.

The university said that the researchers think synthetic dynorphin and analagous compounds may be of possible clinical use in treating human stroke.

out 495,000 Greek-Cypriots in the Greek areas) was not to be forcibly reversed but humanitarian assistance was to be provided to the Greek-Cypriots for loss of property.

(Cyprus about half the size of Thatta district, has a total population of 645,000).

American generosity was offered

Surinam

"THEY wanted a union and they ended up with a country," said one observer about the 16 sergeants who seized control of Surinam in 1980. But though they didn't have much idea of what to do with the country once they had it, the ambitious NCO's did include one man who discovered he liked power: Sergeant-Major (now Colonel) Desi Bouterse.

Bouterse once ranked just behind Grenada's Maurice Bishop and Nicaragua's Sandinistas on Washington's hit-list of dangerous Marxists in the Caribbean region, but he is trying hard to be a good boy these days. He has to: during February the UN will publish the results of its investigation into the human rights situation in Surinam (especially the massacre of opposition leaders in 1982), and Bouterse's survival probably depends on getting a relatively good report.

Until quite recently Surinam's 350,000 people had one of the highest standards of living in South America. Bouterse's barracks-room coup has never had a popular base of support, despite his rhetoric about creating "a truly revolutionary government in which the working classes and the oppressed can recognise themselves" — but what is gradually emboldening the population to defy his guns is the steady fall in their incomes.

Condition for aid

Bouterse's great problem is that the Netherlands, the former colonial power, suspended its annual aid payment of $90 million after the 1982 killings. That comes out to a loss of over $1,000 a year for each family in Surinam — and the Dutch have made an investigation of the massacre by the UN a precondition for restoring their aid.

In recent years the Dutch government has taken a benevolent and generous interest in Surinam — which is only fair, because the

and representatives of "the Federal Government".

Other provisions of the Secretary-General's draft followed closely the old constitution of Cyprus based on the London and Zurich agreements of 1959-60 whose abrogation by the late Archbishop Makarious in 1964 first ever, talked hopefully of "the resumption of the Cyprus talks" in February.

With the painstakingly thrashed out UN draft agreement for the reunification of a divided and unhappy land, having gone overboard, the situation on the ground is apparently back to square one.

m: the human rights situation

By Gwynne Dyer

Dutch created most of its problems in the first place. Like neighbouring Guyana, Surinam's population is an arbitrary mixture of peoples brought from the far ends of the earth as slaves or indentured labourers in colonial days.

The mixture is preposterous: 36 per cent Hindus from India, 30 per cent Christian 'Creoles' (black and mulatto), 15 per cent Muslims from Indonesia, 10 per cent 'Bush Negroes (descendants of escaped slaves who retain much of their original West African culture); plus native Indians, Chinese, Europeans and others. All that unites them is geography and a Dutch lingua franca, and by the time of independence in 1975 local politics was totally polarised along racial lines.

Despite its internal racial splits, Surinam before 1980 was a highly literate and relatively prosperous little country, with a free press, little violence, and democratic elections — and then came the sergeants. The 'revolution' grew out of a dispute between the elected government and the army over the soldiers' right to form a trade union, and culminated with the sergeants simply taking over everything.

However, it is no longer considered an adequate justification for seizing power to say simply that 'there was nobody who could stop us'. So the sergeants, hazily aware of political fashions elsewhere in 'revolutions', declared themselves Marxist and asked the Cubans to send advisers. Havana readily complied.

But the sergeants soon fell out among themselves over the division of power: there were four attempted coups in the first two years of the 'revolution'. Meanwhile the population grew more and more restive at being governed by arrogant, self-appointed amateurs. In late 1982 the national trade union federation, the Moderbond, launched a series of strikes demanding the return of civilian rule.

Desi Bouterse responded by sending his troops to burn down two radio stations, a newspaper, and the headquarters of the union, and arrested dozens of civilian leaders. In December, 1982, 15 leading civilians, including the Moderbond's leader, the head of the national lawyers' association, the chief editor of the local news agency, three other journalists and three former cabinet ministers were "shot while attempting to escape".

New stage

Bouterse then arranged for the popular deputy army commander, Major Roy Horb, to 'hang himself' in prison in January, 1983, and emerged from the turmoil apparently the master of all he surveyed. "Nobody asks us about the killings," boasted Sergeant-Major Badressein Sital, his Marxist mentor. "The masses are not interested. We are entering a new stage."

But in October, 1983, the United States invaded Grenada and Bouterse took fright: the 100-odd Cuban diplomats and military advisers were sent home at once, and Sergeant-Major Sital followed them into Cuban exile soon afterwards. Then the 'masses' started giving trouble — a five-week strike brought the country to a halt in early 1974 — and Bouterse had to form a new cabinet, including trade unionists and conservative businessmen.

Bouterse's only long-term hope of staying in power, however, is to restore Surinam's devastated living standards, which primarily means getting renewed access to Dutch aid. So he allowed the UN human rights commission to come in last autumn to investigate the killings and the current situation, and promised to "implement new democratic structures" this year.

The Dutch Government is no longer insisting on Bouterse's departure as a condition for renewed aid, and Washington is no longer in a panic about his 'leftism', so if the UN report due in February is not too bluntly damning about the political executions he may survive — for a while. No matter which way he twists and turns, however, there is probably no long-term future for Desi Bouterse.

Health tourism

In your editorial, 'Pakistan-Romania co-operation' (16.1.85) you have rightly pointed out the significance of oil and gas exploration in which the Socialist Republic of Romania has also agreed to collaborate. It is hoped that cooperation with the friendly country in this field will go a long way in helping Pakistan to be able to meet its energy requirements very soon.

It is regrettable that the matter of health tourism did not come up for discussion in the Ministerial meeting and hence, was not included in the agreement recently concluded in Islamabad.

Romania, among other fields where it has shown great progress, is particularly renowned for the treatment of the aged by the eminent professor, Dr Mrs. Ana Aslan, and her team at the reputed National Institute of Gerontology and Geriatrics in Bucharest. She has made remarkable contribution in the field for which she is internationally known and respected.

Many years of experiments, researches and clinical trials have led Prof. Aslan to invent Gerovital H3, which is active in the prevention and treatment of ageing as well as in the diseases of old age. This medicine is based on the discovery of the rutrophic-regenerative properties of procaine applied in long-term treatment, activated by the addition of Kions and by a lowered PH value.

Prof. Aslan was the first to apply procaine intra-arterially in the treatment of arthritis and arthrosis and to test the action of this substance in arthritis experimentally induced in rats. Arthritis was cured in 85 per cent of the cases; in certain cases the prophylactic treatment with novocain was noticed in animals — white mice. A particular shining of the fur as well as an increase in body weight was noticed in the treated animals. Using the intra-arterial treatment, Prof. Aslan noticed a general eutrophic effect in the aged organism. This fact determined her to introduce procaine in the prevention and treatment of ageing.

The ancient system of acupuncture, which originated in the Peoples' Republic of China, has now come to be practiced by the doctors the world over. In the same way, Dr Aslan's system of treatment should be introduced and popularised in all other countries, including Pakistan.

It is hoped that the Ministry of Health will take the initiative and request their counterpart in Romania to introduce Dr Aslan's specialised system of treatment in Pakistan. Arrangement may also be made for the availability of medicines. This will not only benefit the aged population in Pakistan, but will also promote health tourism in our own country.

S.W.A. MAULAI
Karachi

saving in fuel imports.

Rail schedules can be so arranged that it should be possible to travel overnight, between 8 p.m. and 6 a.m., between any two cities so that businessman would preferably travel overnight rather than use the more expensive airline.

Within the cities there should be "walking" areas on week-ends, more permits should be freely given for buses and taxis with provision for buses and taxis to be permitted to stop at pre-designated stations to pick up passengers to fill their load.

If enough buses and taxis are issued permits, it will automatically do away with the overloading syndrome which ruins the vehicles and the mood of the passengers and conductors. Taxi stops and bus stops should be separately demarcated so that people have a "choice" in their mode of travel, and fuel consumption per person is regulated. Ultimately, it should be possible to do away with the pollution-creating rickshaws and replace them with 12 seater taxis, and 24 seater buses.

'Boat Basin'

It is a great misfortune the authorities have to be repeatedly reminded of their responsibilities and in this context I refer to the letters, "Boat Basin" appearing on January 1 and January 20 in your exteemed issues.

How long the poor residents will tend to suffer because of encroachers, insanitation, mosquitoes and flies, deafening music, errant driving — all leading to an unhealthy and frustrated society? Cleanliness and peaceful environment are the basic prerequisites of a prosperous and progressive nation. Do we not like to be one?

I request the KDA, the KMC and other authorities kindly to help us emerge out of the problems we face.

Dr. TAHERA IQBAL KAZI
Karachi

Right to work

On roads and in public transport vehicles we daily see beggars of different kinds some professionals, some very old and some even disabled. In last category, there are many who have the handicap of one hand but otherwise are healthy enough to be engaged in any hard job.

I remember an ordinance which has reserved a certain percentage of employment for disabled persons, and also its poor results.

I, however, hope there will be people who will try to rehabilitate these persons who can serve as watchmen, lift operators and Naib Qasids. This will not only help the beggars lead a respectable life but will also make the society healthier.

Shopkeeper robbed

By Our Staff Reporter

KARACHI, Feb 1: A shopkeeper was robbed of Rs 2,200 on Thursday night, the police said.

According to details, three armed men kidnapped one Nazeer from Saddar where he owned a shop at Empress Market. The armed men pounced on him while he was trying to get into hs car. He was later taken to the University Road where he was relieved of Rs 2,200. He was also forced to sign on a blank paper and threatened with dire consequences if he complained to the police.

Section 144 in District East

KARACHI, Feb 1: The District Magistrate, Karachi East, has under Section 144 Cr.P.C. prohibited the assembly or meeting of five or more persons in a public place for any purpose including raising slogans, carrying of placards, except such religious congregations in mosques which have been permitted in writing by the District Magistrate.

The action to this effect has been taken to prevent any breach of the peace, danger to human life and property and disturbance of public peace during the electioneering.

'Govt abs all do

KARACHI, Feb 1: The Provincial Secretary Health, Prof. Dr Mohammed Saleh Memon, has said all the 3,000 medical graduates produced every year could not be absorbed in Government service because of lack of infrastructure facilities.

Addressing a radio news conference the Health Secretary said there would be no utility of doctors if they were absorbed in Government cadre without the availability of required infrastructure.

He said seats in medical colleges in the Province were not reduced during this year and the policy for next year would depend on circumstancse prevailing at that time.

The Government, he pointed out, did not want the standard of medical education in this province to

98 perso in bloc

By Our Sta

KARACHI, Feb 1: Ninety-eight alleged criminals were rounded up in a crack-down by District South police during block raids on Thursday night.

The raids continued into the small hours of Friday morning.

An official spokesman of police while briefing newsmen, said the raids were conducted under the supervision of two ASPs, Mr Abdul Rauf Yousafzai and Mr Falak Khurshid, on the directive of SSP (South) Mr Niaz Ahmad Siddiqi.

Several hideouts of suspected thieves and burglars were raided to flush them out, besides police patrol of main roads for search of suspects resulted in the arrest of 98 persons, following recovery of stolen property worth about Rs 5,00,000 at their pointation.

Recovered property included, TV sets, sewing machines, VCR sets, motorcycles, a car and other household articles.

Eight of the arrested persons, according to police, are burglars who were wanted in several cases of houses and shop break-ins.

Crack detected in windshield of PIA Airbus

KARACHI, Feb 1: A PIA airbus, which took off from Lahore for Dahran (PK-247), returned to Lahore early Thursday morning

Planetarium: round-the-year use planned

By Our Staff Reporter

KARACHI, Feb 1: The PIA is finalising a schedule for round-the-year utilisation of the country's first planetarium in Karachi, particularly for the benefit of the students, researchers, and astronomers.

By the very nature of it, the planetarium has greater education and information value than pure entertainment.

For this reason, it can be fed with as many films and programmes to suit different types of viewers.

In fact, programming is done to match the age groups, educational standards, and such other factors to suit best the viewers.

The schedule now being examined by the PIA proposes to arrange exclusive shows for various Karachi schools in groups according to class and age groups.

Similarly there would be programmes for the colleges, the universities etc and special shows for the researchers and students of astronomy etc.

Shows may be arranged for the other groups and professionals but there seems no chance of the planetarium being thrown open as a place of public entertainment just for money sake, sources said.

Bus owners demand raise in fares

By Our Staff Reporter

KARACHI, Feb 1: The Karachi Bus-Owners' Association has demanded an immediate increase in the bus fares, following the increase in the fuel prices and cost of maintenance of buses.

The demand was made in the form of a resolution passed at the General Body meeting of the Association which was presided over by Choudhuri Mohammad Ismail.

The meeting in another resolution demanded a separate bus terminus for private buses in the city to carry out maintenance and repairs and bank loans for purchasing new buses, to improve the transport service in the city.

The meeting was also addressed by Malik Feroz Awan and Syed Irshad Hussain.

Biochemistry course at JPMC from today

AIOU to introduce new courses

By Our Staff Reporter

KARACHI, Feb 1: The Allama Iqbal Open University (AIOU) will offer new art subjects for students taking "credit courses" in its October 1985 semester, the AIOU Vice-Chancellor, Mr G. Allana, said in Karachi.

For the first time this year, the Open University will also issue degrees in time to enable students to take admission in other educational institutions, he told "Dawn", in an interview.

This year the AIOU had undertaken a partly commercial venture with the British Overseas Development Association, to film the land, people and cultural heritage in Sind, Baluchistan and the NWFP.

With BODA help, the AIOU now plans to make Urdu-learning cassettes for foreigners and overseas Pakistani children.

He said that during the last decade the AIOU had issued 46,466 degrees or certificates for "credit courses" — 1500 at the Intermediate Arts level, 1,270 at the BA level, 27,357 for teachers training, 7,336 for electricians/electrical wiring, 3,113 for shorthand/typing, 236 for English language teaching/training, 71 in training management, and 5,583 in Arabic teaching/training courses.

Replying to a question, Dr Allana said only two AIOU degree-holders out of 300 new students were admitted to Quaid-i-Azam University last year.

Sind and Multan universities have a few AIOU graduates, he said but noted that the Open University was still struggling to get its degree recognised by Punjab University.

The "hodge podge," of course combinations offered so far for degree students could be the problem, he felt. Late or non-issuance of AIOU degrees could be another hurdle. There are still some who have not received their degrees, he added.

The new courses, he said, aim at "improving the foundation".

'Iranian society fully transformed'

By Our Staff Reporter

KARACHI, Feb 1: Iranian Consul-General Hussain Kashani said on Friday that Iranian society had been fully transformed during the last six years following the Islamic revolution.

Addressing a meeting at Khana-i-Farhang-i-Iran to celebrate the sixth anniversary of the Islamic revolution, he said the evil influences of the Shah's disguised modernisation, which bordered on blasphemy, had been wiped out and the younger generation was working for national reconstruction.

Mr Kashani also charged that former President Bani Sadr had manipulated to reverse the Islamic revolution.

The Director of Khana-i-Farhang-i-Iran, Syed Majid Roointan, said the tumultous welcome accorded to Ayatullah Khomeini on his return to Iran after 15 years of exile was unprecedented in Iranian history.

Prizes were warded to the winners of the essay competition held to mark the anniversary. First prize was won by Mr Agha M. Akbar while the second and the third prizes went to Syed Muhammad Haroon Rasheed and Mr A. Rahman Munshi, respectively.

2 candidates rearrested

By Our Staff Reporter

KARACHI, Feb 1: Two Provincial Assembly candidates from Karachi, Ms Zahida Zaidi and Mr. Aslam Natha, were rearrested on Friday by the police following cancellation of their bail by a military court on Thursday.

They were picked up from the respective residences in the early hours of Friday. They were first arrested on Tuesday night after a shootout between the supporters of the two candidates in a Liaquatabad Provincial Assembly constituency.

They have been charged with

cial ADP at a meeting on Wednesday, at which Maj-Gen F.A. Burki, Chief of Evaluation and Inspection, gave the latest position.

The Governor asked the concerned department and the Inspection Team to continuously monitor all ongoing schemes to remove bottlenecks and ensure completion of projects within the stipulated time.

He also directed that spadework for future development programmes should be undertaken well in time, and for proper coordination frequent meetings of the concerned agencies be held.

Italian offer ignored

By Our Staff Reporter

KARACHI, Feb 1: Italy's offer made a year back to help, repair monuments in Pakistan, as well as train personnel, so far remains ignored.

The offer was made to the Directorate-General of Archaeology for the repairs of Gandhara sculptures in Swat and fresco paintings at Lahore Fort, as well as training of personnel in Pakistan and Italy.

The offer was made by the world's most prestigious research institute, ISMEO (Instituto Italiano Per Il Medio Et Estremo Oriente), which has been associated with Pakistan's archaeology for more than two decades and has conducted excavations in Swat, first started by the late G. Tucci.

course on modern biochemistry will start at JPMC from Saturday, in collaboration with the International Union of Biocheistry, says a JPMC Press release.

An international team of four instructors will conduct the course. They are, Prof Frank Vella, Prof of Biochemistry University of Saskatchewan, Canada; Dr O. J. Bjerrum, Director, Protein Laboratory, University of Copenhagen, Denmark; Prof Ala H. Mehler, Laboratory of Enzymology, Medical College of Wisconsin, USA and Dr E. J. Wood, University of Leeds, UK.

It is expected that about 60 teachers of biochemistry of medical colleges and universities from different parts of Pakistan will participate in the course.

Noorani advised to avoid strain

By Our Staff Reporter

KARACHI, Feb 1: Maulana Shah Ahmad Noorani has been advised by his doctors to avoid strain as far as possible.

Mr Musheer Ahmad Peshimam and Mr Rafi Butt called on Maulana Noorani at his Saddar residence.

Mr Ghulam Mustafa Jatoi also phoned the Maulana, saying he would meet him soon.

Dawn Lahore Bureau: The defunct Jamiat Ulema-i-Pakistan will deliberate on the question of joining the MRD, at its central shoora meeting here on Feb 7.

Maulana Shah Ahmad Noorani is expected to reach Lahore a day earlier.

They have been charged with making attempts to disturb the public peace and order, endangering life of people by opening fire at crowded places, rioting and attempted murder.

The Liaquatabad police will present a challan in a military court on Saturday against 19 persons, including Aslam Natha and Rais Alam, for allegedly raiding the police station, damaging the public property and assaulting government servants on duty.

Sham-i-Ghazal held

By Our Staff Reporter

KARACHI, Feb 1: A "Sham-i-Ghazal", and rendering of classical and folk songs marked the second anniversary celebrations of "Sargam", an academy of fine art, here on Friday.

Besides the students of the academy, some noted singers also participated in the function.

The cultural event concluded with brief comments by the founder of the academy, Mr Muslim Raza Syed.

Reception

KARACHI, Feb 1: Mr Habibuddin Junaidi, Secretary-General of the Habib Bank Workers' Front (CBA), has said that he would continue to protect the legitimate interests of the employees of the bank.

He was addressing a reception in his honour by the employees of Habib Bank, Saddar Zone.

What the Qur'an teaches

O ye who believe! When it is said, Make room! in assemblies, then make room; Allah will make way for you (thereafter). And when it is said, Come up higher! go up higher; Allah will exalt those who believe among you, and those who have knowledge, to high ranks, Allah is informed of what ye do. O ye who believe! When ye hold conference with the messenger, offer an alms before your conference. That is better and purer for you. But if ye cannot find (the wherewithal) then lo! Allah is forgiving, Merciful. Fear ye to offer alms before your conference? Then, when ye do it not and Allah hath forgiven you, establish worship and pay the poor-due and obey Allah and His messenger And Allah is Aware of what ye do.

—HOLY QUR'AN—AL - MUJADALAH

MORNING NEWS

JAMADI-UL-AWWAL 3, 1405 A.H. FRIDAY, JANUARY 25, 1985.

PAKISTAN BORDER VIOLATIONS

AS the time is approaching for indirect talks on Afghanistan issue in Geneva under the auspices of the United Nations, the Soviet-backed Karmal regime has intensified its negative attitude towards a peaceful solution of the five-year-old problem. The shelling and bombardment from the Afghanistan side deep inside the territory of Pakistan will only vitiate the atmosphere. According to an official handout, two Afghan aircraft violated Pakistan's air-space and dropped two bombs 500 yards from the border, in an area one kilometre south-east of Arandu. Pakistan lodged a strong protest with the Afghan Charge d'Affaires at this unprovoked Afghan attempt. He was asked to inform Kabul that if such attacks did not cease, the entire responsibility for the serious consequences would rest on the Afghanistan authorities.

The indirect talks on Afghanistan are scheduled to be held in Geneva shortly. What the Karmal regime should have done was to help prepare the ground for making the talks meaningful and productive. Instead of demonstrating the conciliatory attitude, the regime has not only generated the heat of vengeance against Pakistan, it has also started levelling a false and mischievous charge of violating Afghan border by Pakistani border militia personnel. The Kabul authorities, in fact, persisted in concocting such fabrications in a clumsy attempt to hoodwink international public opinion and shift the blame on Pakistan for events within Afghanistan. Pakistan, it may be pointed out, has been exercising restraint in the face of such provocations in the hope that the Kabul authorities will show goodwill to this country. Pakistan also hopes that the solidarity expressed by friendly countries and the international concern voiced over the repeated incidents would help bring this intolerable situation to an immediate end. Although Pakistan has till now refrained from resorting to retaliatory measures, it will, however, have no alternative but to defend its territorial integrity with all its strength and resources in case the flagrant viola-

The Islami account

By IRSHADUL

WE reap what we sow. The responsibility for human action is determined by man's violation and intent. In Ayat 4 to 6 of Sura Ateen, Allah explicitly says: "We have, indeed, created man in the best of moulds. Then do We place him as the lowest of the low. Except such as believe and perform righteous deeds of their own accord, they shall have a reward unfailingly."

Allah has given man the purest and best nature, and man's duty is to preserve the pattern on which Allah has created him. By making him His viceregent, Allah exalted him even higher than the angels; for the angels had made obeisance to him, and being the crown of the creation, Allah granted him free will and direction, so that he could either be rewarded for a virtuous use of his will and independant power of action or punished for making a wrong use thereof.

SALVATION

Thus, man's success, his prosperity and his solvation entirely depend upon himself, on his keeping his soul pure as Allah Allah is Omniniscient and nothing is hidden from Him. He knows each and every thing with its minutest details. Whatever we do is being recorded and we shall be responsible for every action in this world. Hence the right conduct is enjoined on us and indecency forbidden. (Ayat 104, Sura Ale Imran).

And, according to Sura 114 of Ale Imran, only those conduct their lives in conformity with the Will of Allah who believe in Allah and the Day of Judgment and vie with one another in good deeds — and only such are pious and righteous in the eyes of Allah.

Muslims are the best community that has been created because they act upon the right conduct and forbid indecency; and they believe in Allah Hence, according to the teachings of Islam whoseever commits sin commits not only against himself but also sows seeds

the Holy Quran: "Thinketh He that none hath power over Him".

"And he saith I have destroyed vast wealth."

"Thinketh he that none beholdeth him."

"Did we not assign upto him two eyes and showed him both the ways of good and bad."

"And a tongue and two lips and guide him to the parting of the mountain ways".

In fact, those who do not believe in the life hereafter cannot conduct their lives righteously in the real sense. We should not enjoy this life, as the lustful people do, nor furnish it with all possible comforts and remain busy in supplying them, for they all are sure to pass away at last and to be reduced to such a nonentity as if they were none-existant; but we should try to prepare it for the endless and eternal life where no joy, pleasure or comfort is available without the piety of this world gives full meaning to our present life and enables us to shun all the vices and gives us. Incentive to practise all the virtues on which the amelioration of our socio-economic and politico-cultural life depends.

In fact, spiritual-piety is the only basis of morality and solid foundation of all values of ethics in human life. The concept of our accountability aims at the purity of soul, and the well-being of individual and collective life is subservient to it. Allah knows fully well whatever we do in our private and public life.

"And every man's augury have We fastened to his own neck, and We shall bring forth for him on the Day of Resurrection a book which he will find wide open (And it will be said to him) read thy book. Thy soul sufficeth as reckoner against thee this day. Whosoever goeth right; it is only for (the good) of his own soul that he goeth right and whosoever erreth, erreth only to his hurt. No laden soul can bear another's load. We never punish until we have sent a messenger (Ayat 13-15 Sura 17 of the Holy

HAQ QUDDUSI

A few gems of wisdom

By JIHAD KHAZEN

I ASKED him how life was treating him, and he said he had demanded a written apology from it.

I asked him if he had attained his goal in life, and he said he hadn't, but he was at least close enough to it to recognise it.

I listened with great interest to this desk-bound philosopher over the next hour and selected a few gems from his conversation to pass on to you;

"Books have been the greatest influence in my life," he said, "especially the books I haven't read."

He said: "The most theft-proof security system is the possession of nothing."

And he said: "The magnitude of a problem depends entirely on whether it is your problem os another's."

Also: "The difference between a professional and an amateur is that the amateur knows that half of the employees are crooks and the professional knows which half."

And: "They say a politician is the servant of the people, and you know what the servant problem is like these says."

"Staying healthy is a costly thing," he said, "but getting sick is costlier."

He asked: "If necessity is the mother of invention, why do we have so many unnecessary inventions?"

He also had a few thoughts about time.

"Only yesterday," he mused, "we used to call today tomorrow."

And he said, "Sure, the future may prove me wrong, but who says the future is right?"

"The only thing that time hasn't changed," he added, "is that the people who were my age yesterday are still my age today."

He put it to me that "silence is indeed better than talk, because if you talk about yourself you're conceited, and if you talk about ohter people you're a gossip."

To which he added: "Some people's talk reminds me of a plane trip. A non-stop plane trip."

I concluded that he was married, And I was right.

"But if they had invented the the electric blanket then, I would still be bachelor now," he told me, and lapsed into an unconceited, ungossipy silence.

LETTERS

Pak-Romania cooperation

Sir,—It is heartening to note that Pakistan and Romania have recently signed an agreement in Islamabad which will cover oil and gas exploration, agriculture and bilateral trade. The most significant is oil and gas exploration in which Romania has agreed to collaborate. It is hoped that co-operation with the Socialist Republic of Romania in this field would go a long way in helping Pakistan to be able to meet its energy requirements very soon.

It is regrettable that the aspect of realth tourism did not come up for discussion at the Ministerial meeting and, hence was not included in the agreement recently concluded.

Romania, among other fields where it has shown great progress, is particularly renowned for the treatment of the aged by the eminent expert, Prof. Dr. Mrs. Ana Aslan, and her team of doctors at the reputed National Institute of Gerontology and Geriatrics in Bucharest. She has made remarkable contribution in the field of geriatrics by her researches and discoveries for which she is internationally known and respected.

It is hoped that the Ministry of Health, Government of Pakistan will take the required initiative and request their counterpart in Romania to introduce Dr. Aslan's system of treatment in Pakistan. This will not only benefit the aged population in Pakistan, but will also promote health tourism in our country.

Karachi

Centenary

Sir,—The Karachi Goan Association will be celebrating 100 years of its foundation in 1886.

Then known as the Goa-Portuguese Association, its name was changed in 1936 to the Karachi Goan Association.

It is hoped that whoever happens to be the President of the Association will be one who has both visited Goa and knows the Goan or concani language.

In Mr. Louis B. Rodrigues, a prominent businessman, we had a good leader and now in Mr. Angelo v. Dopes, a top managing official of the Mid-East Bank, we have another good leader who, it is hope, will continue to be President—voted in again and again to be that.

PAUL MENEZES
Karachi

tan does not want this to take place as it is conscious of the geo-political realities and the imperatives of good neighbourly relations with all the countries of the region, including the Soviet Union.

Pakistan is of the view that the fourth round of indirect talks on Afghanistan would result in a significant advance towards success. Moreover, the demonstration of the world community's massive support for a peaceful settlement of the Afghanistan question represents a positive factor in favour of negotiations through the UN Secretary-General's personal representative. What is most heartening to note is that during the last debate in the UN General Assembly, Pakistan received a wide support representing a convincing vindication of its principled stand on Afghanistan problem. Such a massive support has proved that despite the prolongation of well over five years since the Soviet intervention in Afghanistan, there has been no diminution in the concern and interest of the international community over the Soviet action in Afghanistan.

Now that the indirect talks in Geneva will start shortly, Pakistan firmly believes that the Karmal regime will change its provocative policy and demonstrate the policy of goodwill and understanding for the promotion of peace and security in the region.

Trade ties with Switzerland

INAUGURATING a seminar on "Blister Packaging for Pharmaceutical Industries", the Consul-General of Switzerland in Karachi has expressed the desire of his country to further develop the cordial commercial exchanges with Pakistan He also mentioned about the existing friendly and cordial relationship between his country and Pakistan.

In view of its avowed policy of friendship with all, Pakistan has been enjoying a cordial and friendly relations with Switzerland. Apart from the growing relationship with Pakistan, Switzerland recently offered a soft-term mixed credit of 80 to 90 million Swiss francs to Pakistan. Part of the credit to be supplied will be on a zero interest basis and part of it to be supplied will be at a low interest. During the period, 1983-84, Switzerland invested around Rs. 130 million in Pakistan, particularly in the fields of pharmaceuticals, and has helped Pakistan in establishing three institutions, including Pakistan Design Centre and Pak-Swiss Precision Instruments Institute.

It is also hoped that the volume of trade will increase between the two countries. But in order to expand the quantum of exports from Pakistan, the exporters must make efforts to supply high quality goods. Switzerland has also expressed its willingness to import textile goods from Pakistan.

'Economic disparity root cause of communal riots'

ISLAMABAD, Jan. 24: The Indian Prime Minister, Mr Rajiv Gandhi has said economic disparity is the root cause of the communal riots that erupt in India off and on.

He said his Government would try to solve the problem once and for all by starting from the beginning, All India Radio reported.

Speaking in the Indian Parliament he also referred to the Punjab and Assam issues and said he hoped that the Government would be able to come forward with some news about solving the problems.—APP

made it; and his failure, his decline or his perdition depends on choosing evil. Those who purify their souls with good deeds are crowned with success in their worldly life and the life hereafter, and those who corrupt their souls with their misdeeds have to encounter failures in both spheres of life.

We are answerable to our Creator for what we do. Allah has shown us the ways of ice as well as virtue. His prophets adopted His teachings in their lives for the guidance of their followers. Hence the man who feels no responsibility is devoid of the sense of accountability. He thinks he can do what he likes in this world and he forgets his responsibility to Allah. He boasts of his power and self in fact he bases his hopes on insubstantial things. He spends his substance on self-indulgence and thereby he puts himself into snares that are sure to debase and destroy him. of evil for the whole society human beings.

"And whosoever doth good an atom's weight will see then" (Ayat 7 of Sura Alzilzala)

"And whosoever doth ill an atom's weight will see then" (Ayat 8 of the Sura Alzilzala) of Para 30 ofythe (Holy Quran).

"And whosoever of you submissive unto Allah and His messenger and does right, We shall give reward twice over, and we have prepared for him a rich provision" (Ayat 3, Sura Al-Ahzab, Para 22 of the Holy Quran).

Those who believe in Allah have been advised by Him to guard their duties to Allah and speak words straight to the point Allah would adjust our deeds for ourselves and would forgive our sins. Whosoever obeys Allah and His messenger, he verily has gained a signal victory.

Allah says in Ayat 5-10 in Sura Al-Balad of 30th para of

KARACHI DAY BY DAY

PROFESSOR Ahmad Ali strongly urged upon Pakistani Urdu poets to take to the Haiku form of writing poetry, and contended that they would find that it would eliminate in the process the confusion that had resulted in their vision, because of a senseless imitation of Western poets.

He pointed out that there was no need to elaborate a theme or a feeling when the same expression was possible briefly. Needless to say that Pakistani poets present at the Haiku Mushiara felt encouraged to hear this from a man of his standing.

Professor Ahmad Ali was speaking as the chief guest at the 3rd Haiku Mushaira organised by the Japan Cultural centre, Japanese consulate general, at its premises on Tuesday night. It was exceptionally well-attended, bearing in mind that the next day was a working day. I wish the mushaira had been held on a weekend. It would have been still more rewarding.

Professor Ahmad Ali who spoke at the outset of the mushiara explained the difficulties of form that this three line beautiful poem involved, in case Urdu poets would try and adapt it. He complimented Mohsin Bhopali and Saleem Kausar in particular, for the results that their translations had been able to attain, and observed that the translations generally showed the similarities of form there were between Haiku poets and "us".

I might mention the 18 minute beautiful documentary that was shown before the mushaira began, which depicted the strength and the status of the Haiku form in modern Japanese society. It brought out the concerted efforts that the Japanese were making in trying to maintain the Haiku tradition and how even children were taking to it.

The documentary, which was characterised by a certain softness of approach, a gentleness of tone, the breeziness of spring, suggested to the viewer that it was possible to adapt Haiku into foreign languages and cultures. But there was one precondition: that each culture should try and find its own symbols for communicating thought and feeling. It would not be enough to Employ Japanese symbols in Urdu poetry.

Professor Ahmad Ali in his remarks also said that both Mir Taqi Mir and Ghalib had written short poems, which could be compared to the Haiku. He then lauded the Japanese Cultural Centre for having begun this literary project two years ago. From the results available, it appears that the enthusiasm has grown over the years.

Some of the poets who read

the soul. Death is the line of demarcation, beyond which nothing but the spritual pleasures or pains begin. The pleasures of the body, even in this life, last so long as the stimulus for them is at work. The moment the stimulus is removed, the pleasure ceases to exist. Hence the prophets of Allah, to save the people from polluting their soul by indulging in physical pleasures taught us to practise piety of soul in this life, so that even here and hereafter we may enjoy permanent bliss.

The concept of accountability guards us against all immoral and material temptations and leads us to piety. To live for pleasures at the cost of piety is to dominate the body over the soul, upsetting the scales of values and making life topsy-turvy.

Belief in the life after death and the concept of our accountability before Allah for whatever vice or virtue we do in Qurah).

FREE FROM EVILS

Islam is as much concerned with the individual as with the society. Islamic teachings also apply to those aspects of the universe that are covered by the problems of human society. The Islamic doctrine of life after death is in certain aspects independent of the human society or even humanity. Hence Islamic concept of accountability guards us against all vices and leads us to all virtues.

Allah has commanded us not only to abstain from what is not right but also help one another unto righteousness and pious duty and not help one another unto sin and transgression but follow Allah's guidance in this world so that we may save human society from evils in this world and also save ourselves from the wrath of Allah in the world hereafter.

Haiku form of poetry

y out Urdu translations from the Japanese originals (written first into English) were Raghib Muradabadi Sehba Akhtar Sehr Ansari, Jamil Naqvi, Shahida Hassan, Rasa Chughtai,, Dr Pirzada Qasim Saleem Kausar, Mrs. Ada Jaffery, Sarshar Siddiqui; Mohsin Bhopali, KTV producer Iqbal Haider. Khawaja Razi Haidar of the Quaid-e-Azam Academy, and Himayat Ali Shair who was also the compere for the proceedings.

The Japanese Consul General Mr. K. Itabashi also spoke on the occasion and said that "I am very impressed to learn tha writers of Urdu poetry also adopted to the syllabic form while composing or translating Haiku. Haiku has offered a new trend to Urdu poetry and the holding of a Haiku mushiars has enabled Haiku to acquire a style of presentation. Therefore, I must say that Haiku mushaira is playing a remarkable role in the cultural exchanged programme between Pakistan and Japan."

He went on to say that "In order to bring our brotherly people closer, trade and industrial ties are not merely enough To create better understanding between people, it is necessary to create awareness of history culture, traditions and customs"

He then referred to the Haiku film and said that "you might have noticed from the film that over one million people in Japan write and read Haiku and over a thousand people make their earning through it. Japanese newspapers regularly print Haiku columns and there are many organisations and associations established in Japan with the object of promoting Haiku."

Then Mr. Sehar Ansari a teacher of Urdu literature at the Karachi University also read out his paper on the theme of Haiku poetry, after which began the Mushaira, and continued midnight.

There were two notable absentees if one may employ this description. The director of the Japan Cultural Centre Mr. Y. Koga, who is on leave until the first week of next month, and for whom Mr. Azmat Ataka, the assistant director was deputising with such zeal. The other was Prof Abul Khair Kashfi, of the Urdu Department, Karachi University. He had also read a paper at the second Haiku Mushaira. I wonder why he didn't come.

I wonder how many people know that he writes a regular rachi's weekly, which appears faithfully, and is edited by Mr. Mohammad Owais.

As one is on the subject of poetry, and because I did not take down any quotes from Haiku that evening due to my eye infection here are instead two quotes from two lovely Nature posters in the auditorium of the American Centre, Karachi.

The first one is:
"Covery my earth mother four times, with many many flowers.
The second one is:
Let us a little permit Nature
To take her own way.
She better understands her
Own affairs than we."

Put as I try and recollect that evening, at the Japan Cultural centre, it is so easy to remember the images of flowers falling off the trees. Japanese people watching the cherry blossoms fall Watching in silence Not loneliness.

Chinese acrobatic team due on Feb 1

ISLAMABAD, Jan. 24: A 16-member Chinese acrobatic team will pay a three-week visit to Pakistan from Feb. 1 to Feb. 21, under the cultural exchange programme between Pakistan and China.

The Chinese team will give performances at Karachi, Hyderabad, Lahore and Rawalpindi.

The team will give the first performance in Pakistan at Pakistan Arts Council, Karachi on Feb. 3. It will also give performances there on Feb. 4 and 5.

On Feb. 6, the team will proceed to Hyderabad and will give performance there on Feb. 7 and 8 at the Government Girls College, Hyderabad.

The team will arrive in Lahore on Feb. 9 and will give four performances at Al-Hamra Arts Council there from Feb. 11 to Feb. 14.

Similarly, the Chinese acrobatic team will give four performances in Rawalpindi at Liaquat Memorial Hall from Feb. 16 to Feb. 19.—PPI

6m. dollar US aid for Baluchistan

ISLAMABAD, Jan. 24: Representatives of the Government of Pakistan and the Government of the United States yesterday signed an agreement to provide an additional six million dollar in grant funds for the Baluchistan area development project.

This amount is the second instalment of a planned 40 million dollars grant from the United States Government to finance the implementation of the Baluchistan area development project. With this agreement 11.1 million have been provided, according to a Press release of the United States Information Service.—APP.

'Priests & prices'

Sir,—Reference my letter published on Dec 8, 1984 a very pertinen line was inadvertently omitted — it should have read "Had his interes not only been confined to the Letters Column in any newspaper he would cerainly know that almost daily some item or the other has gone up in price for 'lay-folks'. This only goes to prove hat he only has eyes for the 'letters column' having had his letters published within 4 days of mine (on 12.12.84)

Mr. Paul Menezes takes exception to my signing myself "A Ca holic" and not disclosing my name. Does he not know that letters are some imes writ en under a pseudonym for several reasons and not necessarily to hide one's identity? Can only a revealed name answer ques ions? Let him put the questions and if I find hem worthy of answer I shall do my best.

He has probably read between the lines for nowhere have I said that the subject of priests should never be brought up in the Press.

Ano her thing — Cardinal Gracius whom he quotes was born and bred on Karachi soil. He was one of the several Karachi young men who had risen to elevated and dignified offices in the Ca holic Church. He was ordained a priest when Sind and Bombay were in the same Presidency.

If he finds the fees for saying a Mass too heavy for his pocke he should not offer any Mass. And if he thinks my letter childish and irrelevant I think the same about his. He seems to have completely missed the point of "Pries s and Prices".

Vrea să vină în vizită în Buc. aprilie-mai 1985, dacă sînteți în Buc.

October 24, 1984

Aprobat se va da după anul nou.

Prof.Dr. Ana Aslan,
Director General,
National Institute of Gerontology & Geriatrics,
Bucharest,
Socialist Republic of Romania.

Respected Madame,

Thank you very much for your kind letter dated june 12,1984. I am pleased to note tha t you appreciated my Magazine of April,1984, which I had sent you earlier.

It is my earnest desire to visit your great and friendly country. I could not visit in August,1984 due to pre-occupations. I intend to visit Bucharest in April/May,1985, next year.

It will be appreciated if you kindly let me know your programme so that I may see you in Bucharest in April/May,next year,1985.

I am enclosing a complimentary copy of September,1984 issue of Pakistan Hotel & Travel Review for your reading.

I hope this letter will find you and your family in good health and happiness.

I would request you to kindly send some informative literatures, write-ups and photographs of your renowned Institute so that the same may be published in my Magazine.

With best wishes and kind regards, I am

Sincerely yours,

S.W.A. Maulai
Editor.

ROMANIA.

Dear Madam,

We would like to inform you that we are the publishers of Pakistan Hotel & Travel Review, being published monthly from Pakistan. The main purpose of the magazine is to promote travel and tourism, both domestic and international.

We have come to know that you are the pioneer in the Geriatic treatment. Due to your international reputation quite a number of ailing tourists from all over the world visit Bucharest for the treatment and consultation with your goodself.

We would like to highlight in our Magazine the salient features of the system of treatment you perform in your renowned Institute. This will enable our readers to know about your mode of treatment which you have introduced so uniquely.

It will be appreciated if you kindly provide the following material/photograph to enable us to publish the same in our magazine free of charge:-

1. A brief write-up on the system of treatment.
2. A detail about Geriatic Institute.
3. A photograph of Dr. Mrs. Aslan.
4. A photograph of Geriatic Institute.

We will be pleased to send you a few copies of our magazine in which the detail about your Institute will be published.

With best wishes, I am,

Dnei Prof. Dr. A. Aslan
Directorul Institutului de
Geriatrie - Bucureşti
România

Stimată Doamnă,

Am dori să vă informăm că noi sîntem editorii revistei pakistaneze Hotel and Travel, care apare lunar în Pakistan. Principala menire a revistei este aceea de a promova călătoriile şi turismul atît intern cît şi internaţional.

Am luat cunoştinţă de faptul că Dvs. sînteţi pionierul tratamentului geriatric. Datorită reputaţiei de care vă bucuraţi pe plan internaţional, un număr foarte mare de turişti bolnavi din toată lumea vizitează Bucureştiul pentru a fi consultaţi şi trataţi de onorata dumneavoastră persoană.

Am dori să facem cunoscut în cadrul revistei noastre principalele caracteristici ale tratamentului pe care-l realizaţi în renumitul dumneavoastră institut. In felul acesta cititorii noştri vor avea posibilitatea de a lua cunoştinţă de felul tratamentului cu totul deosebit pe care l-aţi introdus.

Vom aprecia în mod deosebit dacă veţi avea amabilitatea să ne furnizaţi următorul material/fotografii pentru a le publica la rîndul nostru în revistă în mod gratuit.:

1. O descriere succintă a sistemului de tratament.
2. O informare detaliată asupra Institutului de Geriatrie.
3. O fotografie a Dnei Dr. A. Aslan.
4. O fotografie a Institutului de Geriatrie.

Ne-ar face plăcere să vă trimitem cîteva exemplare din revista noastră, în care vom publica amănunte despre Institutul Dvs.

Cu cele mai bune urări,

al dumneavoastră, cu stimă

The Aga Khan University Hospital
LABORATORY MOUNT SHEET

Top edge of report form

HOW TO SHINGLE REPORTS

Mount Laboratory reports which have the same tests.

Use separate sheets for different types of Laboratory reports.

Begin at the right, placing the "Result" column of the report over the "Results 1" column, matching the lines at the RIGHT, TOP and BOTTOM with corresponding edges of the report.

Tape the LEFT edge of the report to the mounting sheet. DO NOT USE PASTE; DO NOT TAPE THE TOP OR BOTTOM.

The next report with the same tests is placed with the "Result" column beside the first. Match the lines of the two result columns before taping the LEFT edge of the next report.

Reports which have results written across the width of the form cannot be shingled. They must be taped to the sheet without covering any of the information. In this case, 2 reports will fit on one sheet. DO NOT MISTAKE COMMENTS FOR RESULTS.

Bottom edge of report form

TO WHOM IT MAY CONCERN

RE: NIGHAT SARTAJ KHAN
Medical Record NO: 03-76-60.

This patient has a painful stiff right hip. She relates it to her last pregnancy five years previously.

The hip is quite painful with restricted movements.

X-rays shows destruction of the head. Most likely this is primary avascular necrosis of the head of the femur.

It is unlikely to be tuberculosis because the disease has not progressed during the last five years.

In my opinion, a biopsy should be done to exclude an infective process and once this is excluded a THR should be considered. Because she is young, may be a bipdav prothesis should be done in case she needs a revision later.

We only have a limited choice of prosthesis here at present so she would prefer to have this done abroad. This procedure should be done as soon as possible.

Dear Madam,

A news item appeared in a local daily of this country "PAKISTAN" that you have been successful in developing a miracle medicine named "GEROVITAL" which comprises more of vitamins than a medicine. It has also been noted with interest that it is also beneficial to the patients suffering from "Asthma". I am a patient suffering from the above mentioned disease and am interested to use your invention at whatever cost it may become available.

I have been roaming about famous medical stores of this country to know whether the requisite medicine has been imported by them or not. But I am sorry that it is not available in my Country.

Kindly let me know the procedure of getting this medicine

Yours

Vrea să vină

January 31,1977

Dear Dr.Ana Aslan,

I have yet to thank you for your letter Nr.8112 of November 2,1976 wherein you had suggested that I should use Gerovital H3, in association with prednisolone.

In the first place, it took me long to import the medicine (injections) from London, which have just arrived. But, in the absence of any technical data accompanying it or any technical literature on the said medicine, its composition, toxicology and contra-indications etc, the physicians here are hesitating to try it in association with prednisolone. I shall therefore be very thankful if you could kindly arrange to send me a copy of pertinent literature on Gerovital H3 in English language for my use.

Mai bine să vină acă.

As for my present condition I might as well advise that there hasn't been any improvement since I wrote to you last. In fact, I have grown much anaemic and very weak indeed. I have been taking prednisolone two tablets daily, regularly since. It has not brought about any improvement or recovery. Only that it has apparently held the condition static.

I would even be prepared to take a trip to Romania to undergo treatment as indoor patient. For this purpose I would request you to please let me know the details of residencial facilities available for indoor patients, the proposed or estimated duration for which I would be likely required to stay in, and the expenses for treatment and residencial facilities involved. Also, what would be the most suitable time for my visit to Romania, for this purpose.

Your early attention in the matter will be highly appreciated, and I thank you once again most sincerely.

Yours sincerely,

Jehan

To,

Dr.Anna Aslan,
c/o Old Age Research Institute,
BUCHAREST/ROMANIA.

Dear Dr.Anna Aslan, I take this opportunity of offering you my congratulations for your discovery method of rejuvenating old people and treatment of 'Arteriosclerosis' with a drug related to Novocain------'H3'. I am confident this will go a long way in increasing the life expectancy and making the end less hazardous and crippling with the destructive march of atherosclerotic process -es on cardiac cerebral and peripheral vessels.

I have about six patients between ages of 65--85 who have manifestations of arteriosclerotic disease of peripheral, caronary and cerebral vessels They have volunteered to undergo your treatment of rejuvenation. I would be much obliged if you could kindly send me this drug for clinical trial with a detailed literature on its use toxicity etc. I shall gladly report to you the results of treatment. I thank yoy and hope you will excuse me for the trouble

Yours sincerely,

(Dr.M.Abbasi, Hon.Physician B.M.
Parsee General Hospital, KARACHI)

Therapiewoche

Bucharest, November 14, 1957

Dr. M. Abbasi
Hon. Physician, W.B.
Parsee General Hospital
K a r a c h i 3
Pakistan

Dear Doctor Abbasi,

Thank you for your letter of October 24 and for your interest in our work.

Our treatment is indeed effective in cases of arteriosclerosis and related processes. I am sending herewith a reprint of "Therapiewoche" where you shall find details concerning our researches and their results. Also indications with regard to treatment.

I am sorry not to be able to send you any documentary material in English at present as we have no available reprints left, but I will mail recent material in French and German as soon as issued from press.

In Rumania, our own produce namde H$_3$ is exclusively used by the Institute of Geriatrics for the treatment of its patients. This substance is not yet commercialized. Small quantities have been dispatched abroad, to various foreign institutions wishing to apply experimental treatments, or to physicians and a number of private persons. As a substitute, and with satisfactory and nearly similar results, a 2 percent solution of Novocain - Procaine - can be used.

Kindly let me know if you decide to apply this treatment and send your observations regarding its results.

Sincerely yours

Prof. Dr. Anna Aslan
Director of the Institute of Geriatrics
"C.I.Parhon"

Dear Dr. Aslan,

I thank you for your letter dated 21st. September 1964 and the reprints regarding your preparation Gerovital H3.

I requested Messrs "CHIMIMPORT" BUCHAREST to send us some samples of Gerovital H3 Ampoules and tablets for clinical trial which I hope they will be good enough to do. I am also arranging to import Gerovital H3 through our Bankers.

My father is ~~also~~ having second course of Gerovital H 3 Injections and I can say that there is by the Grace of God slight improvement in him.

I hope you will keep in mind my invitation to visit our country as and when your engagements allow you to do so.

Yours Sincerely,

(Dr. M.Monawar Ahmad)

4 September 21st

Dear Dr. Monawar Ahmad,

Having been away from Bucharest I read your two letters at my return and apologise for this late answer.

Of course I would be delighted to cooperate in your suggested application of our treatment in your hospital and shall do my best to be of any asistance. UnfortunatelyI am unable to supply you with Gerovital H_3 myself, as the product is exported by the Governement company "CHIMIMPORT". The best would therefore be to send them a letter asking for samples of ampoules and tablets for clinical trial and specifiyng the required number. Herewith I am sending you some reprints which I hope may be of some use for you in your experiments.

Concerning your father's case, the treatment with Gerovital H3 has given favourable results in similar cases. I would suggest a prolonged treatment of 7 courses of injections yearly (a course consists of 12 injections) with a rest period of 10 days between each course of injections. Our treatment is also beneficial in premature aging in which case we recomend 4 - 5 courses of injections yearly with one month intermission between each course of injections.

It has always been my desire to visit your wonderful country, and thank you for your kind invitation but I shall not be able to do it this year as my schedule of foreign congresses and visits had already been established. It hope this is only a postponed plan.

I also thank you for your kind appreciation of our work and for your belief in our favourable results which make me continue to work for the benefit of aged people everywhere.

Yours sincerely,

A. Aslan

Dated 30th July, 1964.

From: Dr.M.M.Ahmad,M.B.B.S.,
Chief Medical Officer,
Fazle-Omer Hospital,Rabwah(West Pakistan)

To Professor Ana Vasilichia,
Margiret Aslan,
Director of the C.I.Parhon Institute of Gerietrics
Bucarest, Rumania.

Dear Doctor Aslan,

Before coming to real buisiness I have to introduce myself to you. I am a doctor in medicine and I am incharge of a Private Hospital in a small town in West Pakistan.

Our Hospital though small is an up-to-date unit with all the medical facilities,and although it has fourty beds for inpatients the out patients number is more than three hundred daily. The Hospital gives free modern medical treatment to every patient.

I happened to read a Book written by Olga Franklin of Daily Mirror London on your treatment by H3 and I was so fascinated by it that I could not help writing this letter to you.

As a matter of fact I am very much interested with H3 for several reasons.

1.Firstly:

Because my father who is the head of a world known Community had a mild stroke in 1955 from which he recovered almost completely but again he had a relapse in 1959 which affected mostly his higher mental faculties i.e. recent memory,concentration interest in his surroundings,emotions etc. and since then he is bed-ridden with almost complete lack of interest in his surroundings lack of concentration and loss of recent memory with extreme sensitivity to touch and change in weather.

Physically there is dystrophy of both leg

TELEPHONE : 61

Fazle Omar Hospital

RABWAH, DISTT. JHANG WEST PAKISTAN

Ref. No._____ (2) Dated_____

muscles and muscles of left arm and ankylosis of both the knees and left shoulder and elbow joints.

I am very much worried about his condition but on reading an account of your success in such cases a hope has kindled in me.

2. Secondly:

This town is a town of poor population and there are several hundred cases who belong to the same catogory of cases whom you have treated with H3, therefore I intend to start treatment of these cases with Novocaine and I intend to make this Hospital a centre for treatment of such patients with your marvellous drug H3.

But very unfortunately your preparation is not available in our country, therefore until such time that we get Covernment sanction to import it I request you to please send us samples of your preparation H3 Gerovital ampoules and Tablets as much as you could possibly send.

I have to further request you that if it could be possible for you to come to our country and examine my father and see things for yourself I shall be personally gratefull to you.

If you agree to do so we shall arrange for your air travel etc. and we shall pay all your expenses.

In the end I may add that I have developed a special attraction for you and your preparation and Im hope you will not let me down by not giving due consideration to my requests.

I am myself a case of premature aging because of heavy responsibility put on my shoulders by the prolonged illness of my father and though only 46 years old I feel symptoms of premature aging and get exhausted very soon and I am very vulnerable to upper respiratory infections with allergy.

I therfore hope you will please send some H3 Tablets for me also.

I have taken much of your precious time but I am confident that this letter written by a professional

Dr Mr. Faruque,

I was very pleased to hear from your letter of May 4th that you are interested in GEROVITAL H3 and would care to popularize this product in your country.

As our Institute is only concerned with research and medical work, all the commercial side of the question is handled by CHIMIMPORT, Bulevardul Republicii 10, Bucharest. I therefore would advise you to get in touch with them and I am sure they will do their best.

Enclosed you will find a pamphlet which may prove useful as a first source of information.

Yours very truly

Dr. Prof. Mrs. Academician Ana Aslan,
Institutul National de Gerontologic,
Bucharest,
ROMANIA.

My dear Prof. Mrs. Ana Aslan,

I was in Manila when I came to know about the Therapy you have originated yourself and practicing with great success and good results.

My brother, Dr. A. Hasnat, working with Asian Developing Bank at Manila was using your Geriatic preparation prescribed by some Doctor at Manila. He is Diabetic and has had Hypoglycaemic attack about four years back. He was in coma and almost pulseless. He was removed to a Clinic and regained his consciousness after about 24 hours. Since then he feels that he cannot concentrate as before and he finds that reaction time has increased. He consulted and took treatment from Neurophysician, but failed to get any satisfactory response. But since the use of your Geriatic preparation he feels appreciable change.

That is how I got interested in your therapy and I request you if you please permit me to visit your Academy and if that is possible, kindly allow me to practice it in Pakistan.

Moreover, I would request you to kindly find out some time and give appointment to my brother in the month of June, 1982, preferably in the first week. For this purpose I have already made a request to :

Agency for International Tourist Services,
Magheru Boulevard,
Bucharest 7,
ROMANIA.

An early and favourable reply will be appreciated.

Thanking you,

Sincerely yours,

MEDICAL REPORT

Mr. [illegible]med RIAZUDDIN, aged 62, of Pakistan, underwent examination and treatment in the Clinic of National Institute of Gerontology and Geriatrics.

Diagnosis: Infecto-allergic bronchial asthma.
Chronic urinary infection.
Prostate adenoma.
Cholic diverticulitis.
Irritable colon.
Vitiligo.

During his stay in our country in January 1981 catches an acute bronchitis with marked bronchospasm, which required an intensive antibiotic therapy: Ampicilin, Septrin, majorr antiallergic.

The patient being corticodependent, we used hydrocortisone hemisuccinate.

At the same time, the patient presented cardiac depompensat reduced after the cure of pulmonary process.

We recommend the following treatment:

Gerovital H3 - 3 injections a week, in 4 weeks.

Rest interval of 7 days after which:

Gerovital H3 - 2 pills a day, for 12 days.

Rest interval of 7 days and the patient repeats the schedu

Associated medication: Zaditen 2-3 capsules/day and Aminophylline o.3o g/day in the period of asthma remission.

The crises of asthma will be treated by his physician.

Pneumologic periodic control and cardiologic control.

The treatment for cholic diverticulitis was indicated by the Gastroenterology Center.

Dear Professor Mrs. Anna Aslan,

Unfortunately I have received your letter from 3rd March o n l y yesterday.

I am leaving Karachi in September and I shall be with my wife and my little daughter in Bucarest on the

15th September 1969 (evening 21.15h)

Therefore, I kindly ask you to book

one room with 3 beds

if possible in the Clinic and if my letter reaches too late than please book in a nearby hotel. I have no car.
Now, as I am taking this letter to the post office, I shall send you a cable.
If you write to me, p l e a s e a i r m a i l.
Thank you ever so much.
I should be very grateful to you if you could c o n f i r m this letter and please let me know how much (about) I have to pay for the treatment and lodging.
Thanking you in advance, I remain

Yours very truly

Dear Mr Bianchi,

We have reserved provisionally for you a room in our clinic for the month of September. But you have to cable us during this month -as expressed- your confirmation in order to make sure your places. We take this measure, because of the great number of demands,

If you want to come earlier and there are no free places in our clinic, you may live in a hotel and take the treatment as outpatients.

Sincerely yours,

Professor Anna Aslan, M.D., D.Sc.
Director of the "Bucharest" Institute
of Geriatrics

Karachi 8, 22nd January 1969

Dear Miss Dr. Aslan,

I read in a magazin about your Clinic and I am very much interested to come for 2 weeks to Bucarest.
I am working in Pakistan for the European technical help for underdeveloped countries and most probably I shall go with my wife and my little daughter for my european home leave in the month of June or September.
I shall know the exact date at the end of March.

10.2.69

Also my wife would like to have your treatment. Both of us with the child, we wish to stay in one room in your Clinic.

Please inform me if it is early enough when I contact you
during the month of March
as to reserve a room in your Clinic.

Looking forward to your news, I remain, dear Miss Dr. Aslan,

Yours very truly:

P. Bianchi

4 November 16th

Dear Sir,

I was pleased to see the interest you take in our work and I gladly give you the following general informations:

Gerovital H3 - vitaminic, eutrophic factor and regenerator in the treatment of old age phenomena, in the prophylaxis of old age and other trophic disturbances - has a favourable influence on the general condition and the central nervous system. Gerovital H3 is also efficient in several affections.

I regret to be unable to dispatch samples myself, as our Institute is only engaged in scientific research and clinical activity and does not look for the commercial angle. The sale of our drug is handled by the Rumanian sole exporters CHIMIMPORT, 1o, Bld. Republicii, Bucharest, who send supplies on request.

Herewith you find literature and our general informations concerning the way to obtain supplies, ithe cost and the way of payment.

I would be willing to give you any further information.

Sincerely Yours

Prof. A. Aslan, M.D., D.Sc.,

Dear Professor, Aslan,

It gives me a great pleasure to address this letter to you. It is to day that I have read in the News Papers that you have invented a Medicine, H 3, which has cured many people in their old age.

I am certain you will be kind enough to send me a sample of the medicine along with some Literature on it.

In case it is not possible for you to send me a Sample of the medicine owing to its cost, do please let me know by return of Post the price for it. Looking forward, an early reply.

Yours faithfully

Karachi - I
Pakistan

Dear Sir,

Thank you for your letter of February 26 and for the interest expressed concerning our work.

In answer to your questions, I inform you that novocaine treatments have been and are applied since a number of years with very favourable results in a whole series of affections, without involving addiction or any toxic effects.

Our experiments have proved the eutrophic and rejuvenating action of novocain - procain - and its effectiveness in cases of arteriosclerosis, arteritis, arthroses, degenerative rheumatism, arthritis, certain nervous disturbances, certain skin diseases (psoriasis, vitiligo), alopecia, and others.

Our own solution, named H_3, is still exclusively used by the Institute of Geriatrics of Bucharest, for its inmates or out-door patients, and is not yet on the market. A 2 percent solution of novocain can be used as a satisfactory substitute, with practically similar results. I am including directions.

For your information, I am including reprints and the translation into English of a report published in "Medizinische Klinik". Should you require further details, please write, I shall willingly answer your demands.

Thanking you for the suggestion of making use of our material in the book you intend to publish, I remain, with best wishes,

Sincerely yours,

Aslan

February 26, 1958.

Dear Prof.Aslan,

I have read with great interest your articles on experiences with Novocain in elderly persons in the "Die Therapiewoche" ~~and "Der Landarzt"~~ and I am very much impressed by the striking results achieved by you. I would very much appreciate if you could supply me further data, published or unpublished, on the subject and also if you could send me the photographs of your patients showing the results achieved.

Do you try to desensitize those patients whom you find by your preliminary tests to be hyper ~~per~~sensitive to Novocain? If so with what percentage of success?

Have you come across any case of addiction?

Have you tried this drug in large doses and continuously without any pause in animals or human beings? If so with what untowards or toxic effects?

I am writing a book in which I would like to make use of the material published by you and also that which you would very kindly supply in response to this request. Of course due credit will be acknowledged when your work or material or photographs supplied by you are included in the proposed book.

With best wishes,

Yours sincerely,

The Money Buildings

5518/12.7.57.

DIRECTOR:
Prof.Dr. Anna Aslan

Bucarest, 12 July, 1957.

Sir,

I have received yout letter dated from the 5th of June, and read it with utmost care and special interest.

I send you here-unto annexed an pamphlet containing the text of a lecture given by me last year in Karlsruhe. It is a summary of our researches regarding old age ailments.

I deeply regret not to be able to send you at present our product "H_3", owing to the numerous formalities required by the conveyance.

Meanwhile you may employ the Novocaine available at your chemists shops, in a solution of 2%, provided that it be frish, that is to say, not yelowish and containing no adrenalin. You will be able to obtain results almost similar to those obtained by the use of "H_3".

At the beginning of the treatment, in order to test the tolerance of your organisme you will be given, on the first day, a subcutaneous injection of 1 cmc and the next day another one - this time intramuscular. If no allergie occurs (urticaria) you may begin the treatment, according to the following technic :

Three times a week an inztamuscular injection of 5 cmc in a solution of 2%. Consequently 12 injections in 4 weeks, followed by a rest of lo days, after which one begins a new series of 12 injections and so on.

The longer the treatment, the more efficient its results.

Strictly speaking, there is no special diet, but you should follow the diat suitable to your ailment and avoid exciting and sour food (alcohol, coffee, strong tea).

The treatment must be followed under medical supervision.

./.

wishing you a speedy recovery, we request you in case you should use our method of treatment to let us know the changes you notice after the first series of injections.

With my kindest regards

yours truly

July 28, 1973

Prof. Dr. Ana Aslan,
Institute of Geriatrics
Bucharest
Romania

Dear Dr. Aslan,

More than six weeks ago, I sent you a letter with a friend who had posted it to you from Amsterdam. In that letter I had appealed to you for your famous drug Gerovital for my old and ailing mother. I don't know if that letter reached you or not but since then I have been anxiously waiting for your reply.

My mother, who is about 80 years old, has hardly ever known any happiness in her life and as if she hasn't seen enough unhappiness, misfortune chases her even in her old age to wreck her health with unbearable ailments.

My mother suffers the most from aches and pains in legs, a terrible burning sensation in legs and arms which does not allow her to sleep and constant and unbearable strains and pulls in her stomach and chest. About 5 years ago she had thrombosis in one of her legs and she generally has high blood pressure. According to the family doctor, she is shrinking and suffers from Osteo-arthritis and now since last few months she has developed a breathing problem - she seems to suffer from Bronchospasms.

Even with her poor health my mother takes rather active part in domestic work but having gone very weak, she can't bare all these aches and pulls and burning and often breaks down crying which hurts us all here very badly.

Dear Doctor, I am a man of moderate means and it is impossible for me to bring my mother to your clinic in Bucharest. Also I hear that your treatment is costly and it is absolutely out of question for me to pay for a complete Gerovital treatment of my mother. I will, therefore, be deeply grateful to you if you can conveniently afford to send me free of cost and which would recuperate my mother at least for a few years.

Since this request is for a mother, dear Doctor, I have not got the slightest doubt that you will be moved by my appeal and will be compassionate enough to oblige me with a quantity of your wonderful drug, sufficient to reconstitute my mother at least for a few years.

If you wish to check anything, you can please write to my family Doctor Dr. K.B. Mody, 451 Kutchery Road, Karachi, Pakistan. Besides our language, we only understand English here. A medical literature in English will therefore be necessary but if English literature is not available please send an instruction on administration of Gerovital in English language.

I that much quantity of Gerovital

P.T.O.

...2...

Since my mother has been suffering badly for last so many years, I would beg of you to kindly comply with my request at your earliest possible convenience. If, however sending Gerovital takes some time, I will feel highly obliged if you will kindly acknowledge the receipt of this letter and let me have your answer as soon as you conveniently can.

With best wishes for your health and happiness,

Yours sincerely,

(PURVEZ DOTIWALA)

Your early reply will be eagerly awaited and will highly be appreciated.

Dear Sir,

I was very interested in reading your letter dated May 15th andIvery much hope the GEROVITAL H3 treatment could be of use to you and your dear mother.

Unfortunately and much as I would have liked to, I am unable to satisfy your request for the medicine as our Institute is only concerned with research and medical work, the sale of the product being entirely in the hands of the commercial Agency CHIMIMPORT, Bulevardul Republicei 10, Bucharest, which is solely qualified to provide it. There is no place nearer India where you could get it. The sale of the product is at a cost of $ 5 the box of 10 vials and about 3 series of 12 vials each should be considered to begin with.

We enclose hereby Directions for treatment should you be able to start it. CHIMIMPORT can let you know the mode of payment through the Rumanian State Bank.

I am extremely sorry not to be able to help you better and beg you to believe me,

Yours very truely

Dear Doctor -

I am extremely happy to read about your wonderful and commendable theory 'Gerovital H3' because although I am only 45 years old, I am experiencing effects of a worn body. This sort of condition constantly weighs on my mind and I feel very dejected because I am not married yet and still very hopingly look forward to getting married.

I like and respect women and have always looked for an opportunity to get married and yet if I am not married, only the circumstances and my dirty luck are to blame. I must, however, admit that to a certain extent I am to blame too for I was and still am very fussy about marrying a girl of my choice only - I do not like to marry for marraige's sake.

I am about 5' 6", weigh about 115 lbs and am pretty thin. In spite of taking physical exercise and emulsions and injections prescribed for increasing weight, I could never put on any weight. More often than not my body and joints ache and my face is sunk and lined. I have always looked younger than my age but of late I have begun to look a bit old. Almost always I get up tired in the morning and on an average I feel exhausted and drowsy. I think, despite good food and enough rest, I feel weaker than I should at 45 and my virility is reduced by a great extent.

The real trouble with me is that I have lost a good deal of my health because I am not happy at heart for while I am dying to marry a girl of my liking, such girls do not care for me simply because I do not look young and healthy. But once if a girl of my choice marries me my joy and happiness will know no bounds and I will automatically regain my lost health and looks -- and good looks I indeed had not so long ago. So Madam I am sure you will see how badly I need your wondeful tonic to regain youth and good looks.

Perhaps as deserving as mine is the case of my mother. My mother, despite her age of 73, is still very active but she suffers from some kind of stomach trouble which pulls and churns her stomach and this discourages her very much. She also has developed a kind of a hump on one side of her back and the top portion of her left foot is swollen. We are poor and cannot afford servants so my mother must work as long as she can or until such times as I get married. Therefore a constant good health, free from any kind of ailment, is an absolute necessity for my mother.

I hope you will very kindly take my mother's and my case into a very sympathetic consideration and will be good enough to send me Novocaine Derived Tablets or Innoculations or both according to your judgement for my mother and me in a quantity which may be necessary to make both of us 100% young and healthy. Also please send complete instruc-tions regarding the use of your preparations and any other advice that may be required to follow before and after their use.

Now I come to the point of payment. At this particular moment I do not know if the State Bank of Pakistan will allow me to send you the money for the medicine or not. Within the next few days I will make an enquiry but in the meantime I would request you to kindly send me a proforma invoice for the total quantity of Pills and/or Innoculations that you think would be necessary for me and my ~~mot~~ mother. If the State Bank refuses to let me send you the money I will still urge you to kindly send me the requested medicine for my mother and me and I give you my word of honour that I will ~~dis~~ discharge my debt or obligation in one way or the other no matter what trouble I may have to take to do so.

Since this letter has already been too long and since I cannot pester an important person like you with lengthy letters I am not trying to put too much emphasis on how badly we need your prepara--tions but by now I am sure, ~~by now,~~ you must have already seen how we would crave to get your wonderful medicine. We are, therefore, sure that you will be very kind indeed to comply with our request.

I now wish you abundant health and fame and remain with kind regards and sincere thanks

yours truly,

Purvez D. Dotiwala.

Bukarest the 18th of
June, 1957.

Dear Sir,

I have received your letter from the 4th of May and read it

duct "H_3" owing to the numerous formalities required by the conveyance.

Meanwhile, you may employ the Novocain available at your chemists shops, in solution of 2%, provided that it be frish, that is to say, not yellowish and containing no adrenalin.

You will thus be able to obtain results almost similar to those obtained by the use of "H_3".

At the beginning of the treatment, in order to test the tolerance of your organism, you will be given, on the first day, a subcutanous injection of 1 cmc and the next day, another one of 2 cmc, thus time intramuscular. If no allergie occurs (urticaria) you may begin the treatment properly so-called, according to the following technic :

Three times a week an intramuscular injection of 5 cmc, in a solution of 2%. Consequently 12 injections in 4 weeks, followed by a rest of 10 days, after which one begins a new series of 12 injections and so on.

The treatment must be followed under medical supervision.

The longer the treatment the more efficient its results.

Strictly speaking, there is no special diet, bzt you should follow the diet suitable to your ailment and avoid exciting and sour food (alcohol, coffee, strong tea, etc.).

./.

If you want to come in our country for a treatment a rumanian visa is needed. It can be obtained at our Consulate in New-Delhi.

In that case there are two possibilities : 1) to be hospitalised in our Institute, should beds be available or 2) to stay at a hotel and follow an ambling treatment. In that case, I let you know that the National Travel Office "Carpaţi" has made available for sale abroad, hotel and restaurant coupons ("pension coupons) valid only in Bucarest, which are obtainable through Banks and Travel Agencies, nominated in this purpose.

These "pensions coupons" are sold to persons who come to Bucarest for other than tourist purposes (business, studies, cultural missions, medical treatment, etc).

Wishing you a speddy recovery, we request you in case you should employ our method of treatment, to let us know the changes you notice after the first series of injections.

With my kindest regards

yours sincerly

Aslan

The Doctor in charge.
Bucharest Rejuvination Institute.
Bucharest. — Rumania.

Dear Sir, If this letter should ever reach its destination I know I will get a reply - so am posting it to this most insufficient address given to me.
In our daily Newspaper the "Pakistan Times" of the 30th April 1957 a London correspondent has written about your clinic - He writes that Rumanian experts have discovered effective methods of rejuvination by using Novocain - 2 The Institute started its researches in 1951 by 1st. Injection

the old for rehumatism and 3 the Institute has branches in 3 other Rumanian cities

The final word is with God Almighty - but the quest of ways to prolong life is a preoccupation with us all who are grow y old -. I shall therefore be thankful if you will send me all available literature connected with your research - I am 62 yrs of age - male - with 9 children. I have diabetese which I control with Insulin - I had an attack of thrombosis 6 months ago - I sometimes get a pain in the heart which the doctors say is Angina. I also have a lot of wind in my stomach - I drink & eat normally - ~~I have~~ I have arthrerio - scelerosis for which the doctors give me Lipotropic Capsules - contain y Dimetheo - Inositol - Choline dyhydrogen -

I also take injections of Testosterone twice a week - I shall be thankful if you will guide me as to how to stop the formation of Chloestrol in the arteries - which is undermining my health - for "A man is as old as his arteries" - If I can get the foreign exchange I will be able to come to Bucharest this summer -

Sincerely

N. Nolid: Jan.

Sînt peste măsură de bucuroasă că am aflat din ziare că aţi descoperit un medicament numit "NOVOCIAN" care să transforme părul cenuşiu în negru şi să facă să crească părul la persoanele cu chelie. Am nevoie imediată de acest medicament.

Deaceea v-aş ruga să-mi expediaţi acest medicament cu poşta, pentru care voi plăti toate cheltuelile. Dacă nu e posibilă trimiterea medicamentului prin intermediul serviciilor poştale, v-aş ruga să aranjaţi expedierea lui prin intermediul misiunilor diplomatice, legaţii, misiuni comerciale, etc. pentru care deasemeni voi plăti toate cheltuelile.

In sfîrşit v-aş ruga să fiţi amabili să mă ajutaţi să capăt acest medicament pe orice cale posibilă, pentru care vă voi rămîne veşnic recunoscătoare.

Mulţumindu-vă cu anticipaţie

A Dvs. sinceră

Dear Sir,

I found your letter at my return in Bucarest, after a long journey to Mexico and the U.S.A., and wish to express my thanks for your interest concerning our work.

In answer to your request, I inform you that we could receive you at our Institute whenever you decide to come, after November 1st. The treatment could however also be carried out in your own country. Hereinclosed our general indications.

Should you take a decision, kindly keep us informed, we shall be at your disposal for any information you might desire.

Yours sincerely

To,

Doctor ANNA ASLAN

Parhon Institute of Senile Diseases

B U CAR E S T

Rumania.

Dear Doctor Anna Aslan,

The world renowned efficacy of your wonderful discovery of Gerovital H 3, for which kindly accept my humble appreciation and homage, has tempted me to request you kindly to have me informed, if there is any possibility for my self __ a foreigner of PAKISTAN, residing at Karachi, getting the benefit of treatment at your Parhon Institute of Senile Diseaes, the healing methods of which are reputed to be wonderful.

In case you may not be taking foreigners for treatment at your institute, at present, may I request you kindly to register my name for admission, if and when, your institute may be in a position to admit foreigners for treatment? Meanwhile, perhaps there may be devised some method by means of which foreigners may be able to derive some benefit from treatment by correspondance or otherwise. Should any such humanitarian method occur to you, I would feel extrmely obliged for your kind consideration and advice. I agree to pay all the requisite charges for everything that may be possible in this respect.

I am 61 years of age, growing grey and have led

quite an active life, but of late ,depression,asthenia, loss of sound sleep and physical exhaustion appear to be overtaking me and although one cannot escape the loss of life, one would very much like to live well and healthy while life lasts!

I apologise for any inconvenience that this letter may have caused you and close it with renewed appreciation for your amazing discovery and with very best and respectful regards for your gracious self,

Yours most respectfully

S. Kazim Raza

Dear Mr. Sajid,

In answer to your letter we send you enclosed herewith for your information a brochure concerning the therapy applied in our country.

We have also let you know that we usually recommend alternating courses of injections and pills which are much more effective.

You may order Gerovital H3 either directly to CHIMICA, our Foreign Trade Enterprise (sole exporter), Splaiul Independenţei 202 A, Bucharest, Romania, or to one of our representatives abroad (see the enclosed list).

If you are interested in coming to us, the secretary gives you enclosed our conditions.

I shall be glad to give you any further information or whatever medical advice you might require.

Yours sincerely,

INTRARE Nr. 1006
1998 LUNA 09 ZIUA 03

Dear Dr.Arsalan,

I have read an article in the " Urdu World Digest" published from Lahore (Pakistan) in which it is alleged that you are treating old age patients as you think it is a disease not a natural process. I am 65 years old and suffering from the consequences of the old age. I would be grateful if you kindly let me know the following infromations:-

Whether the Tablets prepared by you are available in Pakistan or can you can send them by post.Qouting their price.

As regard the Injections invented by you, please let me know whether I can use these Injections and how to get them. Qouting their price.

I shall be grateful for an early reply, as there are many other old age patients in my country/office.

PS What are the charges of your Clinic — Mease Commercialise your medicines for availability in foreign Countries.

Yours sincerely,

9/5/1998

K a r a c h i - 1
PAKISTAN

Dear Mr. Sethi,

I answer to your letter of March 27th, I send you enclosed herewith our conditions and inform you that a tourist visa can be obtained at the airport on arrival.

You may continue the treatment with Gerovital H3 pills until you come here. After we see you, we shall give you the proper indications.

As regards your diet, I advise you to avoid heavy, fatty food and to have instead several meals a day in small quantities. As Gerovital H3 has an antidepressive action, I am sure that your anxiety, fear, worry, tension will disappear after treatment.

You may associate vitamins with Gerovital, as there is no other contraindication except the simultaneous administration with sulfonamides (inactivation!). It should not be injected following previous administration of eserine or neostigmine.

The treatment is also indicated in disfunction of thyroid gland. An associated treatment with pills and injections is more effective.

When you decide to come, please let us know the date of your arrival.

Yours sincerely,

Dear Dr. Aslan,

Thanks very much for your letter No. IT-2074 dated 11th March, 1976.

Sometime during this year, I wish to come Romania for complete laboratory & clinical tests, I hope that it will be completed in one to two weeks time. Please let me know:-

1) Approximate expenses, including first class hotel accommodations for independent room with bath, and all other expenses?
2) Visa for Romania is obtainable at the Airport or it is to be arranged from here or Europe before leaving for Romania?

On receipt of your letter, I will let you know the difinite date of my arrival.

In the meantime I would like to have your advise & instructions for Gero H.3., at present I am taking 2 pills a day for 12 days repeating it after 30 days intervals.

For your information I am sending you the copy of my latest medical report from the Cavandish Medical Centre, London dated 10th February, 1976. At present Blood Pressure is 100-105/140-145.

My main problems are:-

a) Stomach upset (loose motions) mainly due to (A) rich, Heavy, fatty food & meals, cold meals, cold milk AND (B) due to Anxiety, fear, worry, tension etc. (without any proper reason)

Please let me know till I come to Romania for complete check up:-

1) Should I continue taking Gero H.3. pills as mentioned above?
2) Can I take with these pills multivitamin & Vitamin E.?

In your letter dated 11-3-76 you have mentioned that female with disfunction of thyroid gland can also take this medicine. She is already taking Thyrodine medicine, in this case which treatment you recommend, Pills or Injections and/or both?

Thanking you & awaiting an early reply,

Yours faithfully.

Dear Sirs,

GEROVITAL H-3
injection- pills, Cream & Oil

One of my friend from Europe sent me sufficient quantity of the above medicines for one year but the literature and information regarding the above medicines are not available in English.

Please let me know :-

1. If the above medicine is equally good for Male and Female?
2. For Female, with the complaint of Thyroid glands, not function properly, what is the best way of treatment? by injections or pills? and/or both?
3. What should be the duration of use of the pills and injection? normally one year? or more?
4. What are the benefits of these medicines? please write in full details.
5. Male with the complaint of slightly high blood pressure, can also use it?

Please send me the all above information in full details and as well as all the literature, leaflets and information available in English and oblige.

Thanking you and awaiting an early reply.

Mr. Shamsuddin
Sind General Store
Market Road
Hyderabad
PAKISTAN

Dear Mr. Shamsuddin,

In answer to your letter, I inform you that before starting the treatment, you should have a tolerance test: first day: 1 subcutaneous injection of 1 cc, second day: 1 intramuscular injection of 2 cc. If after this test the patient does not present any allergical phenomena, the treatment can be started according to the indications.

For allergic condition you should consult a physician. At the same time, it is better to reduce the dose to 2-3 cc from an ampoule.

Please, keep us informed about your further condition.

Yours sincerely,

Dear Dr. Ahmed

Reference your letter of 22nd Dec 1975 No PC/9850

Institutul Institutul de Gerontologie
INTRARE Nr. 5372
1976 Luna V Zona 31

I started your treatment as per your instruction and advise I started with Inj Gerovital H.3 as per instruction upto 12 injection without any adverse reaction then after intervals of 14 days I started taking pills as per direction in the leaflet. Within 4 days of start of tablets I started allergic reaction on my forehead & head. with intense itching more on forehead & head with erythema & ulceration. The itching spread all over body & it is continuous. I consulted

my family doctor who gave me
antiallergic drugs but no response
Then doctor shifted B my
tablet, since then Spreading
of ulceration on forehead & head
has decreased but itching is
still there. I take clemizole
or Pheniramine as antihistamin
but itching is still there.

I want to continue my
treatment till full effects
are obtained but in view
of allergic reaction, I kindly
advise further line of treatment

Surprisingly there reaction
did not come with injection
therapy. Awaits your instructions

Dear Prof. Dr. Ana Aslan,

I have recieved your letter dated 22nd Dec. 1975 (PC 9880) in which you wrote the details for the treatment of Geruoital H3.

Regarding the items of the course, I would purchase from your representative in London through my brother residing there.

As the problem of baldness is prevailing through whole world and millions of patients want to get rid of it, so same is the position in Pakistan. Numberless medicines and oils, pertaining baldness, are available here but all of those turned useless and people are almost despaired.

I hope your new invention will solve the problem of people and increase the demands of your items amongst them. Under these circumstances I want to sell items of the

course with reasonable profit. With your co-operation and my personal investment.

I shall sell the items of the course under the condition of medical control. It means that patient will use the medicines under the control of medical doctor.

If the invention is successful for majority of patient ~~Hand~~ then please do send some proofs for publicity purpose.

I do sincerely hope that you will appoint me for Pakistan under the contract of certain years.

Thanking you in anticipation.

Sincerely Yours,

Shamsuddin.

Doctor Ana Islan
Professor of Gereatric
Bucharest
Romania (Eastern Europe)

Dear Madam

Today I read in one of our local papers, that you have been successful in delaying old age where doctors in West inspite of their efforts have not been able so far to cure this desease — old age.

I am of 61 years age with low blood pressure & all the time feel tired & listless. Five years back one DR Ludwig of Vienna Austeria also claimed that he has been successful in keeping human body young & energetic for a long long time & claimed that his injections of 'Gelee Roy' are effective in making old young again. My Country is very new & developing. As such Our Government has put restrictions on travel & foreign exchange. We can only go out of Pakistan after every three years &

OUR REF. .....

23rd. November 1963.

Dear Professor Anna Aslan

I read about your wonderful drug H.3. and feel vitally interested in its treatment for me.

Due to domestic reasons I am not able to come to Bukharest for treatment. I therefore request you to kindly send me full facts about the H.3 treatment, and whether it is possible to take the treatment here.

I am 66 years old now and am diabetic.

On receipt of your reply I shall be able to send your any further information required.

Yours Sincerely,

Fidahusein M. Sheikha

Dear Mr. Sorathia,

I have received your letter and I want to inform you that we can't give you the Gerovital H3 formula, we can tell you that is on Procain (Novocain) basis.

You can order our medicine from the enclosed addresses, where there are our representatives abroad.

My secretary will also send you a general schedule of treatment.

Awaiting your further news, I wish you A Happy New Year!

Yours sincerely,

Dear Madam,

Your name has been given to me by His Excellency Mr. E.K. Dadzie whom you may remember was the Ghana Ambassador to Rumania for some time.

Through conversation he has told me of your wonderful remedy of helping men to recuperate themselves, and have taken this opportunity to write to you if it will be possible for me to undertake this course of yours.

I am 50 years of age, and should be grateful if you will let me know if its advisable to take this course as I suffer from hypertension.

Hoping to have a favourable reply, letting me know how much the course will cost.

Yours faithfully,

E. K. TANDOH.

Mr. E.K. Tandoh
Ghana High Commission
Islamabad - Pakistan

Dear Mr. Tandoh,

We have received your letter of February 4th and are answering on behalf of Professor Aslan who had a car accident two months ago and is yet in hospital. She is now much better but her convalescence will probably last one month more.

We all remember His Excellency Mr.E.K. Dadzie and kee the best recollection of His stay in Romania.

With reference to your question concerning our treatment with Gerovital H3 I inform you that it could be beneficial for your general condition. Association with hypotensive medication - as you probably have been using till now - is advised.

Three courses of injections and three courses of pill would be necessary for one year treatment. It will be undergone according to the following schedule:
Ampoules: one course of 12 injections in 4 weeks (an intramuscular injection of 5 cc every Monday, Wednesday and Friday - follows a rest interval of two weeks after which:
- Gerovital H3 pills: one course of 24 in 12 days (two a day, one pill taken two hours after breakfast and lunch). The treatment will be continued by alternating courses of injections and courses of pills with the prescribed rest intervald between each separate course.

The medicine can be ordered from one of the addresses enclosed herewith.and also cost of treatment at the Institute

Yours sincerely,
C. David M.D.
