Conține documente cu număr de înregistrare al INGGAA

Nu este ordonat alfabetic

Decadele: `70 - `80

Limbi : engleză, română, spaniolă, malaeză, franceză

Documentele sunt dactilografiate și manuscrise.

Documentele sunt pe suport de hârtie.

Dosarul conține o listă de prețuri, o factură, un prospect medical, două telegrame, o ilustrată, o carte de vizită a lui Rafael Barbudo Cantarero - atașată unei scrisori dată 1958, 1 plic.

Unele scrisori au atașată traducerea în limba română.

Conținut:

Conținutul dosarului este compus din corespondența între pacienți și INGGAA, analize medicale, buletine medicale, scrisori medicale, recomandări.

Scrisorile de răspuns sunt semnate, în original, de către prof. Ana Aslan .

Correspondență medicală și personală între Z. Wayne Griffin director al Union Bank cu prof. Ana Aslan și dr. Cornel David (prima scrisoare trimisă de domul Griffin. Datată 1987.

Correspondența dintre H.C. Young secretara, în numele Ambasadorului Malayeziei în Iugoslavia Neznanog Junaka, și prof. Aslan. Inclusiv răspunsul oferit de dr. Cornel David. Datată 1974.

Correspondență medicală dintre Azzam Mohammed Ofiice Manager al Ministerului Muncii și al Afacerilor Sociale din Qatar adresată inițial către Chimimport, trimisă de către aceștia către institutu și la care este atașat un răspuns din partea dr. Cornel David. Datată 1974.

In treat. du 1874. —

Mrs. Elinor W. Griffin  
154 South Hudson Avenue  
Los Angeles, California 90004  
U.S.A.

Dear Mrs. Griffin,

I received your letter of November 8 mentioning that a year ago you felt better by taking alternatively Gerovital H3 tablets and only one-half of the vials.

In this case I advise you to continue like this, as the treatment is more effective in this way than in tablet form only.

Thanking you for your good wishes, I remain with my kindest regards,

Yours sincerely,

Acad. Prof. Ana Aslan, M.D., D.Sc.  
General Director

SVA  
In trat. du 1874.

Mrs. Z. Wayne Griffin

154 South Hudson Avenue  
Los Angeles, California 90004

November 8, 1987

Dear Dr. Aslan,

Thank you very much for your prompt reply to my letter concerning whether I should use the Gerovital in tablet form only.

I definitely felt, some time ago, that the use of the entire vial injection was too much for me, and I ceased using any injections for a period of three months, upon my doctor's orders. It caused me a disturbing dizziness for an hour or more after each injection.

Since I began the treatments again, a year or so ago, it was with the alternating use of the tablets and only one-half of the vial injection at the prescribed times, and I feel much less of the disturbance than I felt before. However, I am wondering if only half of a vial is of any real value? And if it would be advisable to follow the printed instructions for the use of the tablets exclusively?

Remember, my age is 87 1/2 years old; my weight, 93-94 pounds, and my height, barely 4 feet 11 inches (I am sorry I cannot tell you this in metrics.)

Now that I am older, my doctor has reduced the amounts of various medications he gives me - although he continues to be enthusiastic about the Gerovital treatment and takes it himself.

I am sorry to trouble you with this further question, but will appreciate having your further advice as to the value of only half an injection at the prescribed times, or whether to eliminate the injections in favor of the tablets only.

With my best wishes to you personally,

Sincerely,

Elinor N. Griffin

October 9th,

Mrs. Z. Wayne Griffin  
154 South Hudson Avenue  
Los Angeles, California 90004  
U.S.A.

Dear Mrs. Griffin,

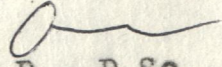

I advised you to continue the treatment only in tablet form as you mentioned in your previous letter that the injections caused you some bad reactions.

If in the meantime your tolerance to vials has increased, you may start again the injections as before.

Please, keep us informed about your further health condition.

I congratulate you for your professional activity and send you my kindest regards and best wishes, hoping to see you again possibly next year.

Yours sincerely,

Dr. Ana Aslan  
Str. Minasterul Sanatatii  
Caldarusani Nr. 9  
Sect. Cod. 78178  
Bucuresti cod 7 000

Dear Dr. Aslan,

Thank you very much for your personal attention to my letter, and I was delighted to hear from you and to have your advice for the continuation of my treatment.

Because there is a decided difference between the advice in your letter and the printed instructions that came enclosed with the last shipment of the tablets, I took that printed slip (enclosed herein) as well as your letter, to my doctor. (He, by the way, was at the luncheon my husband and I gave for you here, so long ago, and regularly uses Gerovital H 3 himself.)

To quote from the printed slip in my order, you will see that at the bottom it says: "In cases of advanced old age phenomena, the parenteral treatment alone is recommended." At 87 years of age, I am certainly in the old age classification! But Dr. Smith says that the word "parenteral" means injection- something administered with a needle. This is contradictory, just opposite to your letter's written instructions; the doctor advised me to write to you again to ask you to clarify this for me, as well as for him. (A number of his patients are on Gerovital H 3.) It may be this advice for using the tablets only is one of personal instruction for me, especially.

I shall appreciate your clearing this for me, so I may be able to follow your kind interest in my case. I await your reply with keen interest, and shall follow it, as soon as I am sure which course to follow. I imagine it will be for the tablets only, but want to be sure, because of that one confusing word "parenteral".

I hope you will come to our country, and to Los Angeles again, and we shall have another luncheon!

With warm regards and good wishes,

Sincerely,

Elinor Griffin  
(Mrs. Z. Wayne Griffin)

P.S. At present I am well supplied with both the tablets and vials, but am glad to know of your Romanian outlet.

Sorry I used my professional paper before I realized it. By the way, my new recordings with a wonderful singer, and me at the piano, have just been released by Cambria Records, on cassette tape and compact disc. Called "Aut Songs By Elinor Remick Warren" - 26 songs - a big job!

# Gerovital H<sub>3</sub>

Produs original Prof. Dr. A. Aslan

## Prezentare:

Soluție injectabilă — cutii cu 6, 12 sau 25 fiole de 5 ml.  
Drajeuri: cutii cu 25 drajeuri.  
Compoziție: pe un drajeu și pe o fiolă.  
Carbhidrat de procaină 0,1000 g; Acid benzoic 0,0060 g; Metabisulfid de potasiu 0,050 g; Fosfat de sodiu bibazic 0,0005 g.

## Acțiune farmacoterapeutică:

Acțiunile complexe ale Gerovitalului H<sub>3</sub> se datorează acțiunii sale la nivelul sistemului nervos central și neurovegetativ cât și la nivel celular prin stimularea energizării tisulare și ameliorarea proceselor metabolice intervenind și în procesele de oxido-reducere celulară. Datorită efectului său eutrofic menține echilibrul proceselor corticale asigurând funcționarea normală a sistemului nervos. Gerovital H<sub>3</sub> are o acțiune anti-acetilcolinică, simpaticolitică, antihistaminică și analgeică, diminuează excitabilitatea musculaturii striate exercitând și o acțiune smolitică, antifibrilantă, vasodilatatoare, diuretică, lipotropă.

## Indicații:

Tratamentul profilactic și curativ al fenomenelor de îmbătrânire.  
Tratamentul tulburărilor trofice, nevrite, nevralgii, arterioscleroza centrală și periferică, boala Parkinson, spondiloze, artroze, osteoporoză, neurodermite, alopecie, psoriazis, sclerodermie, vitiligo.  
Gerovital H<sub>3</sub> mai este indicat în spasme vasculare, angină pectorală, sechele de infarct miocardic și posthemiplegice, arterite, astm bronșic.

## Contraindicații:

Sensibilitate la procaină (Se va testa toleranța).

## Reacții adverse:

Uneori. În cazul persoanelor sensibile la procaină pot apărea: cefalee, mușături, bradicardie sau tahicardie, agitație motorie și psihică, reacții alergice.

## Incompatibilități:

Se va administra concomitent cu sulfamidele (inactivare), ezerină sau stigmină.

## Posologie și mod de administrare:

Tratamentul preventiv al fenomenelor de îmbătrânire: oral 2 drajeuri pe zi la 2-3 săptămâni. Tratamentul se reia după o pauză de o lună.

Tratamentul parenteral: de 3 ori pe săptămână câte o fiolă intramuscular timp de 2-3 săptămâni. Tratamentul se reia după o pauză de 1-2 luni. Se recomandă tratament asociat: 4 serii de injecții (3 injecții pe săptămână, în total 12 fiole) urmate de 30 zile după care urmează 4 serii de drajeuri (2 pe zi timp de 12 zile).

Tratamentul curativ este în general de lungă durată: câte o fiolă intramuscular de 3 ori pe săptămână (12 fiole pe lună). După o pauză de 10 zile se reia tratamentul. Se pot alterna seriile de injecții cu tratamentul oral: 6 serii de injecții (după schema de mai sus) cu 5 serii de drajeuri la interval de 10 zile între ele.

Tratamentul artrozei poate fi administrat intraarterial sau concomitent intraarterial și intraarticular.

Tratamentul artrozei se poate administra intraarticular și periarticular.

Tratamentul boală astmatică și spasmele vasculare se poate administra câte o fiolă zilnic intravenos foarte lent, 2-3 serii de câte 12 injecții cu o pauză de 7 zile între serii.

În cazurile de fenomene avansate de îmbătrânire se recomandă numai tratamentul parenteral.

## Conservare:

În sticlă, la temperatura camerei, la adăpost de lumină și umiditate.

# Gerovital

H<sub>3</sub><sup>®</sup>

Original Product of Prof. Dr. A. Aslan

## HOW SUPPLIED:

- Injectable solution: boxes containing 6, 12 or 25 ampoules of 5 ml each.
- Sugar-coated tablets - boxes of 25 sugar-coated tablets.

Composition (for one sugar-coated tablet or one ampoule):

Procaine hydrochloride 0.1000 g; Benzoic acid 0.0060 g; Potassium metabisulfite 0.0050 g; Disodium phosphate 0.0005 g.

## ACTIONS:

The complex effects of Gerovital H<sub>3</sub> are due to its activity both at the level of the central and neurovegetative nervous systems, and at the level of the cells through the stimulation of tissues regeneration and the improvement of metabolic processes; the product has also been proved to act in the oxidation-reduction phenomena of the cell. By its eutrophic action, the product maintains the equilibrium of the cortical processes and ensures the normal activity of the nervous system.

Gerovital H<sub>3</sub> exerts an antiacetylcholinic, sympatholitic, antihistaminic and anti-allergic effect; the product decreases the excitability of the striated muscles; it also acts as a spasmolytic, antibrillatory, vasodilating, diuretic and lipotropic agent.

## INDICATIONS:

Preventive and curative treatment of old age phenomena.

It is also indicated in trophic disorders: neuritis, neuralgia, cerebral and peripheral arteriosclerosis, Parkinson's disease, spondylosis, arthrosis, osteoporosis, neurodermitis, eczema, alopecia, psoriasis, scleroderma, vitiligo.

Gerovital H<sub>3</sub> is recommended in vasospasms, angina pectoris, sequelae of myocardial infarction and post-hemiplegic sequelae, arteritis, bronchial asthma.

## CONTRAINDICATIONS:

Specific allergy to procaine (individual tolerance will be tested).

## ADVERSE REACTIONS:

No adverse reactions have been recorded. With procaine sensitive persons, the following phenomena may however appear: cephalaea, shaking, bradycardia or tachycardia, motor or psychic restlessness, allergic reactions.

## INCOMPATIBILITY:

Gerovital H<sub>3</sub> should not be administered simultaneously with sulfonamides (activation), eserine or prostigmine.

## DOSAGE AND ADMINISTRATION:

Preventive treatment of old age phenomena:

- Per os: 2 sugar-coated tablets daily, two or three hours after meals, over a period of 12 days. The treatment should be repeated after a one month break.

- Parenterally: 1 intramuscular injection three times a week, over a period of 4 weeks. The treatment should be repeated after an intermission of 1 to 2 months.

The association of both ways of administration is recommended:

4 series of injections (3 per week, a total of 12 ampoules); 30 days break; 4 series of sugar-coated tablets (2 daily, for 12 days). After 24 days of intermission a new course of treatment may be begun. The curative treatment is, generally, a long term one: 1 intramuscular injection 3 times a week (12 injections per month).

After a 10 days break the treatment should be resumed. The series of injection could be alternated with the oral treatment: 6 series of injections and 5 series of sugar-coated tablets, with 10 days intermissions between the courses.

In arteritis, Gerovital H<sub>3</sub> may be administered intraarterially or both intra- and periarterially.

In arthrosis, it may be administered intraarticularly and periarticularly.

In asthma and vasospasm, 1 ampoule can be administered daily, in slow intravenous injection; there will be 2 or 3 courses of 12 injections, with 7 days breaks between them.

In cases of advanced old age phenomena, the parenteral treatment alone is recommended.

## STORAGE:

At room temperature, protected from light and humidity.

Mrs. Elinor Warren Griffin  
154 South Hudson Avenue  
Los Angeles, CA 90004  
U.S.A.

Dear Mrs. Griffin,

I am glad to have some news from you after such a long time. Dr. David retired some years ago and he is abroad now.

I am very sorry to hear about the disappearance of your husband. I express my deepest regrets to you.

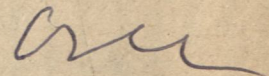

I remember with nostalgia the luncheon party given by Mr. Griffin and you for me in Los Angeles in 1973.

For the continuation of your treatment, I advise you to take Gerovital H3 only in tablet form as follows: 2 tablets a day (1 tablet taken 2 hours after breakfast and 1 tablet 2 hours after midday-lunch), for 15 days. Rest interval of 3 weeks after which another course of tablet as above. After a few courses of treatment, please write us again and let us know how you feel.

You may order Gerovital H3 directly to CHIMICA, our Enterprise for Foreign Trade, (Export 16 Dept.-PHARMACEUTICALS), Splaiul Independenței Nr.202 A, Bucharest, Romania. Enclosed herewith you have their price-list.

Waiting with pleasure for further news from you, I remain with my kindest regards and every good wish,

Yours sincerely,

  
Acad.Prof. Ana Aslan, M.D., D.Sc.

MINISTERUL SANATATII  
Institutul National de Geriatrie  
INTRARE NR. 1368  
1987 Iul 25

Dear Director,

My husband and I were at the clinic for 2 very helpful weeks in May of 1974, and until after March, 1977, were often in correspondence with Dr. Cornel David.

As my husband had a very complicated and serious medical history, we appreciated Dr. David's advice as to the uses of Gerovital in his particular case, and we hoped to be able to return to the clinic the following year. However it became impossible to travel so far again; my husband wrote twice to Dr. David, but his letters were returned unopened, so we were puzzled as to what may have happened.

Then my husband's condition grew more and more serious, and after several hospitalizations and surgeries, my beloved husband of 45 years died of cancer in September, 1981.

The reason for this letter is to say I have continued with the Gerovital treatments as instructed by Dr. David in 1974, which is: a series of the intramuscular injections 3 times a week for 4 weeks, then a 2 week break - after which the sugar-coated tablets: 2 a day for a period of 12 days, followed by another break of 2 weeks; then continuing with a new course of the 2 treatments.

For the last two years I have taken the injections with only one-half of a vial at a time, as a whole vial-injection became too much for me and caused bad reactions. I attribute this to my advanced age, now 87. My height is 4 feet 11 inches, my weight, 93 pounds.

I have continued to be active in my musical profession as composer and pianist, with a number of recordings of my orchestral works, and just now the new releases of 26 of my songs, with me at the piano, on cassette tapes and compact discs. I mention this only because I attribute much of the credit for my reasonably good health to the benefits I received thirteen years ago at the Clinic, and Dr. David's good advice.

The reason for this letter is to ask if you think I am carrying out the treatment correctly at this time, or if you would suggest any changes. It is impossible for me to consider making the long journey to Bucharest. I do have quite severe arthritis problems, especially affecting my walking. Also, I suffer with neck and shoulder pain from tissue degeneration at the base of the brain, which would probably be even more debilitating without Gerovital, which I get from a London Chemist Company.

I will appreciate having your advice as to whether I am taking the treatment correctly or if you have any suggestions for changes. I have been a long-time Gerovital enthusiast and have sent a number of people to your Clinic.

Sincerely,

*Elinor Warren Griffin*

Elinor Warren Griffin  
(Mrs. Z. Wayne Griffin)

P.S. It would be a great pleasure to have word about Dr. Cornel David. I was also

*acquainted with Prof. Aslan; Malgriffin and I gave a luncheon party for her in Los Angeles in 1973.*

*He retired some years ago and lives abroad now.*

Dear Mr. Griffin,

In answer to your letter of July 7, I have the pleasure to write you again.

I am glad that you feel well both of you.

Mrs. Griffin may switch to Gerovital H3, instead of Aslavital, if you could find it. Perhaps you may come again, just for a few days to Bucharest and take a supply for a year. It will be an opportunity to see you and talk to you.

Looking forward to your further news, I remain,

Yours sincerely,

Dear Dr. David:

Many thanks for your last letter full of good information and help. It is regrettable we cannot pick up some Aslavital in one of the Black Sea ports. Now I have to ask, where can we purchase it? Is it available only in beautiful Romania?

Since Aslavital is not available, and Gerovital H-3 is, would it be satisfactory for Mrs. Griffin to switch to Gerovital H-3 out of necessity? There exists the possibility that we could fly to Bucharest from Athens on the way to Paris. This would give us the opportunity to get a supply of Aslavital. Best of all it would afford us the opportunity of greeting you once again and possibly Dr. Aslan. We would do this by choice anyway but an important performance of one of Mrs. Griffin's new Symphonic Choral Compositions will be having its world premiere in Honolulu and she may have to hurry to get there for rehearsals. If this performance can be postponed we would greatly enjoy seeing you again and would hope that we could invite you and Mrs. David for dinner one evening. If we do this it would be around the middle of September. I will write to you quickly as soon as we know definitely the performance dates.

Meanwhile I would like to know from you if the switch to Gerovital H-3 would be okay for my Elinor. If you could write to me it would be a big help. If I try to carry back to the U.S.A. a supply of either medication it might be taken from us by our Customs people who are very silly indeed. Since the Gerovital H-3 can be shipped directly from London I would have no problem and would not attempt to take anything through our very hard-nosed Customs.

Mrs. Griffin had a hysterectomy on May 4th and made a wonderful recovery. She is walking her mile briskly each morning. I had a double hernia operation last Fall and also had a quick recovery. I returned to the tennis courts within ten days and I am now playing four days each week and jogging a mile on the days I do not play. The Parkinsons problem is under control with Madopar, the Roche medication. The colitis, too, is being controlled satisfactorily and the thrombo-phlebitis of the lower left leg is causing no problem. So, at 70 I feel very fortunate.

Dr. Doz. Cornel David, M.D., D.sc.  
Page 2  
July 7, 1977

*This letter is too long and I apologize for that. Mrs. Griffin joins me in sending our affectionate greetings to you --with a hello to Dr. Aslan and Dr. Gusic.*

*Sincerely.*

Dear Mr. Griffin,

I also remember with great pleasure of your visit to our country.

I am glad to hear that you are better after the treatment, as well as Mrs. Griffin. You should continue it according to the indications.

As regards the shipment of medicine to one of the mentioned ports, I am afraid it is not possible. If you could come to us just for a few days, it will be all right, If not you may try to obtain it from our representative in London.

I gave your greetings to Prof. Aslan and the staff who thank you and hope to see you again one day.

With my kindest regards to you and Mrs. Griffin.

Yours sincerely,

Cornel David, M.D., D.Sc.

Dear Dr. David:

How nice it is to be communicating with you. It brings back very pleasant memories of our visit to your beautiful Romania and the experiences in your unique institution.

There's a good chance Mrs. Griffin and I will be on a cruise which will touch the seaports on the Black Sea. If so, would it be practical to have a shipment of Aslavital sent to our ship at one of the ports? They will be Varna, Odessa, Yalta and Sochi. We also visit Athens twice as well as Istanbul and Izmir.

It's very simple now to have Gerovital H<sub>3</sub> mailed direct from London. Perhaps they also have Aslavital. I shall investigate. Meanwhile, at your convenience I would appreciate a little note, advising me whether it would be safe and practical to ship to one of those ports.

We were hoping that before now you would be paying a visit to California. We spoke to three different universities about it but they all have commitments of their own. They were interested but unable to fund such a visit at this time. I will keep you advised if anything turns up. Meanwhile, I hope you will likewise seek a suitable way to make a trip here.

I'm happy to report I tried one months' treatment of Gerovital and got along much better than before. It didn't seem to make me jittery this time so I shall continue.

Dr. Doz. Cornel David, M. D., D. sc.  
Page 2  
May 5, 1977

Also Mrs. Griffin continues to prosper on the Aslavital. I am the "M.D." who administers the injections and am becoming quite proficient, she says. I find it a little more difficult to give them to myself but it keeps me limber to try.

I hope this finds you well and happy. Please give our greetings to Dr. Aslan and any others who may remember us and especially our greetings to you.

Sincerely,

F. Wayne Griffin

June 4, 77

PC/3302

Mr. Z. Wayne Griffin  
31st Floor  
Union Bank Square Building  
Los Angeles, California 90017  
U.S.A.

Dear Mr. Griffin,

I have received your letter of May 23 and as you probably have learned, our Gerovital H3 has been approved to be distributed in Nevada. We don't know yet the precise address where you should apply in order to get it, but you may inquire at Rom-Amer Pharmaceuticals Ltd., 233 South Beverly Drive, Suite 100, Beverly Hills, CA 90212. I am happily telling you this piece of information, because otherwise it would have been impossible to send you by mail the medication, FDA destroying it at the customs.

Now, I'll try to answer your questions.

First, both Gerovital H3 and Aslavital are indicated in Parkinson disease, they may be used separately or in alternative courses of treatment. Of course, an experiment is worth trying.

You have an incipient form of Parkinson and for the time being, the medication you use is enough.

You may use Gerovital and Asulfadine, when you need, because there is no flagrant contraindication to it, this Sulfa is not resorbed and Gerovital is applied intramuscularly. Concerning the little additional tremor that appears after the application of Gerovital, I would like to inform you that for the moment, during the treatment with Gerovital H3 it may appear such tremor, due to the decontracting effect of Gerovital.

As regards the use of two injections of Gerovital each week in stead of three, I'm positive. You may try this schedule and according to its result, you may continue it or give up.

I remember you and most of all Mrs.Griffin with much affection and I often think of you as very nice persons.

I'm sorry I can't comply with Mrs. Griffin's want of having some more jars of Gerovital cream, because of your customs regulations, but maybe she can find it in Nevada or maybe in one of your travels to London, you may buy it from our representative ARCODE, Plantation House, Mincing Lane, tel. 01-623 7074, telex 883476.

Looking forward to your news, accept my best wishes,

Yours sincerely,

Cornel David, M.D., D.Sc.

P.S.

Dr.Gusik is fine and sends you his best compliments.

Dear Dr. David:

It's too soon for me to have a reply from you from my letter of May 5. When it arrives I will respond again and hopefully enclose a check for the purchase of a supply of Aslavital for Mrs. Griffin. It's likely you will not be quoting the price of the medication so if you have not I would appreciate in your next reply knowing so that I may send a check.

Now a few quick questions which I hope will not be too much bother to you.

(1) Is Gerovital better than Aslavital for the treatment of Parkinsons? I would be glad to try the Aslavital if you think it adviseable as an experiment.

(2) I'm really very fortunate with my Parkinsons in that it has not incapacitated me badly. I play tennis three or four times weekly and jog on other days. I do notice, however, an increasing tendency toward tremor in my left arm and hand. It is not showing yet to others but I feel it. Luckily I can still control it but I know it will get worse and I wonder if you may have a suggestion of any medication or treatment which would control tremor.

At the UCLA Neurological Center, which is guiding my medication, they tell me my symptoms are not yet very noticeable. I am glad for that but am trying very hard to search out through every possible source any new ideas or medications. That is why I appeal to you now.

(3) Regarding the use of Sulfa and Gerovital, how much time is necessary between the use of Sulfa and the Gerovital injections? I am required to use Asulfadine occasionally for chronic Colitis. Would it be alright to take a Gerovital injection on Monday, use three 500 mg. Asulfadine tablets on Tuesday and have another Gerovital injection on Wednesday? It seems to be working satisfactorily but I need your advice.

Incidentally, I seem to notice that Gerovital causes a little additional tremor. Is that normal?

(4) Do you think that two injections of Gerovital each week for six weeks, instead of three weekly for one month, would be worth trying?

Mrs. Griffin underwent a hysterotomy almost three weeks ago. She was hospitalized for ten days. There was no carcinoma but her organs had prolapsed to the point where she was uncomfortable. So, after long consideration we had

Dr. Doz. Cornel David, M.D., D.Sc.  
Page 2  
May 23, 1977

it done. She's recovering nicely now at home, each day growing a little stronger, but it will be many weeks and probably months before she reaches her full strength again. Otherwise, she is in fine health and actively creative in her composition. A major, new work of hers, "Good Morning, America," is now being played in this country. Perhaps later we can send you a record or tape of it.

Mrs. Griffin asked to be remembered to you with affection. Also, she will want a dozen or so jars of the Gerovital cream when we order.

Please forgive this lengthy letter and accept our warmest greetings.

Sincerely,

Z. Wayne Griffin

ZWG/sk

P. S. And how is Dr. Gusic?

U.S.A.

Dear Mrs. & Mr. Griffins,

I was very glad to receive your news.  
Thank you for your warm greetings. In my turn,  
I want to all your kind family my best wishes for a  
happy and prosperous New Year.

Of course, you are always welcome in our country  
and in our institute. I am satisfied that your condition  
improved and you are better now.

Looking forward to see you, such nice people, or  
at least have news from you, I remain

With my best wishes,

Yours sincerely,

Dr. C. David

Mrs. Elinor W. Griffin  
154 South Hudson Avenue  
Los Angeles, California 90004  
U.S.A.

Dear Mrs. Griffin,

I have received your letter with great pleasure and although it's true there are many people who come to our clinic, I always remember you with the best thoughts.

I'm sorry to hear that Mr. Griffin had to stop the treatment. I'm not quite sure that Aslavital or Gerovital H3 could have activated his colitis. On the contrary, they usually help the improvement of this illness. But your husband could be one of the few cases which presents paradoxical reactions. He can try very small dosis of Gerovital H3: a course of 12 ampoules, 1/2 ampoule every second day; It follows a rest interval of 14 days, after which a course of 12 tablets in 12 days, 1 tablet 2 hours after the main meal, with a rest interval of 14 days. Maybe with the L-Dopa treatment for Parkinsons disease, Gerovital H3 will be better tolaraed.

As for you, I'm glad that your back pains have completely disappeared. Your schedule of treatment is very good and I advise you to have blood tests only once a year, no matter if it is after or before a course of injections.

As regards the face cream, it's rather difficult to send them to England and it would last rather long, without being certain if they find you in London or not. So that, I advise you to address to Arcode Ltd., Plantation House, Mincing Lane, London E.C.3 or Cassina Pharmaceutica S.A., 6066 Locarno, Suisse. I send you herewith enclosed your check.

Hoping to see you next year,

Your truly,

USA.

Dear Dr. David,

With so many people coming to your Clinic, you may hardly remember your friends from far-off California who were there last May. However, we think of you, very often, and most gratefully! As well as with great pleasure!

My husband unfortunately had to stop your prescribed treatment as it severely activated his ulcerated colitis, as well as stimulating him unduly so he could scarcely sleep. He has hopefully tried both the Aslavital injections and the tablets, as well as the GERovital, several times since, but I am afraid he is one of the unfortunate few who cannot tolerate the treatment, and had to abandon even a very limited dosage. Also, last summer the doctors discovered he is suffering from Parkinsons disease, and is now for several months on the L-Dopa treatment, with fairly gratifying results.

As for me, I am in the best of health, and the severe back pains I suffered for many years have completely gone. All the more reason why I think gratefully every day of you, and Dr. Aslan, and Aslavital!

When I talked with you at the clinic last May, I stated that I had found it impossible (in the test dosages I had had here under Dr. Ditman as a test case) to take more than one a day of the tablets, and that the injections also seemed to stimulate me unduly. After the period of concentrated injections at the Clinic, the Medical Report given me when we left Bucharest stated:

- "Aslavital injections - 12 in 4 weeks, 3 times a week, 3-4cc. 10 days rest period.
- Aslavital tablets 1 a day for 12 days.
- Alternating injections and pills with 10 days rest periods between each course."

My system has now adjusted so well I am taking the full 5 cc's injections, and 2 tablets a day during the periods for their intake. Since taking these increased dosages, I have extended the "rest" periods to a full 2 weeks between each course. I shall appreciate your advice as to whether this is advisable, or if you have any further suggestions, now after almost a year of treatments. I am having periodic check-ups,

as you advised. How often should I have blood tests, and should they be just after a course of the injections? 1 per year

Wayne and I expect to drive through the English countryside in May for about three weeks, with a few days in London at the end. Unfortunately we cannot go farther, this year, but as I understand it is possible to buy Gerovital (and maybe also Aslavital?) in London, we hope to secure some more there. If the Gerovital face cream--- which I like very much--- is not available there, would it be possible for you to send me a package of jars to the Berkeley Hotel, Wilton PLACE, London, S.W.1, England? I enclose a check for which I would very much appreciate your sending the number of little jars for this amount, including the sending, and hope this is not asking too great a favor. If you cannot do this, just return the check to me, or if you can tell me any place in London where I could buy the cream, I could of course get it myself; I was told that one of the Boots chemists (pharmacies) carry the Gerovital tablets. You may know of a certain one, or another outlet, in which case I would like to have the address. We expect to arrive in London on June 1, and will be at the above address only a very few days, before flying home. We plan to leave Los Angeles a few days before the middle of May.

We shall hope to see you again next year; it would be such a pleasure to Wayne and me if that could be in Los Angeles; we wish you would come to tell about your work and lecture at one of the universities. Wayne joins me in sending our warmest regards to you and to Dr. Aslan; also our kind remembrances to Dr. and Mrs. Gusik.

Sincerely,

Elinor N. Griffin

P.S. We have a very good supply of the vials and tablets, because Wayne is not taking what he had expected to use. He will give it another try, one of these days soon, though. Maybe his system will respond differently later; but now the doctors at the U.C.L.A. Clinic, who are treating him for Parkinson's, feel that the L-Dopa is all he should have.

MSA  
ELINOR W. GRIFFIN  
154 North Hudson Avenue  
Los Angeles, California 90004

560-16-8457B

Private M.D. Wm. Weber Smith

DOB: 2/23/06

Age 68

Height 5'2"

Weight 103

BP 120/70

Married 37 years -- 2nd marriage (first lasted 4 years)  
3 children, ages 43, 35, 33

Reason for Taking GH3: Husband is interested. I don't sleep enough.  
Feel tired. Denial of depression. Doesn't want to get old. Arthritis of the  
lower back and cervical neck -- stiff and painful.

Sensitivity Test OK

Occupation: Composer--classical music

Born and raised in L.A. only child, happy childhood. High School education.  
Trained in music

Operations: T & A 38 years ago

Illnesses: Osteoarthritis of the back

Injuries: Has fallen a number of times due to bad ankles

Present Medication:

Premarin

Miltown or Plocidyl for sleep or Dolware

Tyelonol

Heavy vitamin user

Drinks at parties

Allergies: None that she is aware of--has id reaction of the fingers (peeling of  
the skin)

Present Medical State: Elevated blood cholesterol  
Back pain --arthritis

Present Emotional State--Good -- very happy.

Never felt the need for psychiatric treatment--married to a homosexual  
first marriage, a shock to her

Diagnosis: Aging, Arthritis, Osteoarthritis of neck and lower back  
Some insomnia

Elinor W. Griffin

- #4--3/13/74--5cc--At times her usual insomnia. Notes nothing yet
- #5--3/15/74--5cc--Notes nothing yet
- #6--3/18/74--5cc--Feels back pain may be less.
- #7--3/20/74--5cc--Less back pain, maybe.
- #8--3/22/74--2.5cc. Feels charged up like too much coffee. Didn't sleep  
Back is better.
- #9--3/25/74--2.5cc--Still not sleeping better--Feels fine otherwise.  
Feels shoulder is better.
- #10--3/27/74--2.5cc--More wide awake at night--back and neck less painful.
- #11-3/29/74--5cc--Gave 5cc vial to take Friday the 29th.
- #12--4/1/74--5cc--Feels helped her

SUMMARY; My back has improved since the first 4 injection. Has been stimulating to me. More energy and couldn't sleep at night at times.

keep it around 25°.

CASE HISTORY

ELINOR W. GRIFFIN

Age 67, born February 23, 1906. Caucasian, 5' 1", weight 105#.

Mrs. Griffin is in remarkably good health, full of energy and strong and quick in her movements. She is a famous composer-pianist with over 150 published works for symphony orchestra, chorus, soloists, etcetera. She has enjoyed a long, distinguished career much of which has been made possible, she asserts, by her continued good health.

Mrs. Griffin has had no surgery at any time. She leads a disciplined, well ordered life. While she no longer tours as an artist she is still composing and has a constant exchange of communications with conductors, performers, etcetera.

With the increasing years Mrs. Griffin has shown a slight tendency toward arthritis, suffering some discomfiture in her spine and joints. Her other problem is sleep. She sleeps soundly for 4 or 5 hours, rarely more. She has half a dozen mild tranquilizers which she uses to help induce additional sleep. They are not satisfactory for reasons well known.

Mrs. Griffin has a sound knowledge of diet and food values. She has a slight tendency to gain weight, therefore watches her intake. Although a bundle of energy herself, she shows no tendency to hypertension. Her blood pressure is 130 over 80, approximately the same as her husband's. She has a tendency to high cholesterol but through diet is able to keep it around 250.

SHORT FORM

CONSENT TO ACT AS SUBJECT

SUBJECT'S NAME: Erinny N. Smith

DATE: March 7<sup>th</sup> 1974

NAME OF PROJECT: Series of Gerovital H3 injections

I hereby consent to be a participant in the project named above. An explanation of the procedure(s) and/or investigation(s) to be followed, including an identification of those which are experimental, was provided to me by Robert S. Wilkins, MD. I was also provided with a description of the attendant discomforts and risks to be expected. I was also assured that any injuries concerning the procedure(s) and/or investigation(s) would be answered. I was also assured and I understand that I am free to withdraw my consent and to discontinue participation in the project or activity at any time.

Dear Mr. Griffin,

just returned from a long trip abroad I found your so kind letter and are thanking you heartly for this, as well as for the article.

Please believe me, that I am very happy to hear that you are well and that enjoyed the treatment, our people and our country. But it was a shadow within this letter, to hear that you had a thrombophlebitis - I am very sorry indeed and I hope that now is all in good order.

With me all is well, but obviously I am very overworked, just now with the International Congress of the Population here in Bucharest.

I, myself, and my whole staff would be very happy to see you again here in our country.

Again with many thanks and awaiting with great pleasure your further news, I remain,

Yours sincerely,

Acad. Prof. Dr. Anna Aslan

Dear Professor Aslan:

Mrs. Griffin and I had a most delightful experience in your country and in your hospital under the direction of Dr. David. We are personally very grateful to you for assigning Dr. David to us. He is a wonderful man and fulfilled everything you said as a doctor.

Mrs. Griffin is right on schedule with the treatments and responding very well indeed. Alas, I have not had such good luck. I acquired a thrombophlebitis in the left leg which put me in the hospital for ten days and the recovery period, as you know, is several weeks. I should begin the Aslavital treatments again as soon as feasible and hope to have a good report in our next communication.

All your fine people gave us a superb impression of Romania and of the efficiency of what you are accomplishing. Dr. Gusic and his little family were very attentive and I call attention also to Mrs. Zelenak and Dr. Munteanu.

We enjoyed the Intercontinental and tried the restaurants, including the Palace-Athenee. We enjoyed the drives through your park-like city and out into the country. We left Romania with reluctance and hope someday to return.

Meanwhile we hope all is well with you and that you are in good health and happiness.

Sincerely,

Wayne Griffin

ZWG/sk

Mrs Griffin clipped this current article for you. We think it is very good. Special greetings to Dr David.

Dear Mrs. Griffin!

many thanks for your kind letter of the 19th June, which indeed made me a great pleasure. We all rememberd you very often with the kindest thoughts and you can imagine, how glad we were all to have some news from you.

But I was very sorry to hear about your illness and I heartly are hoping that now you are no more in the hospital being again in good health.

Please transmit the best regards of myself and of our staff to Mrs Griffin. At the same time our staff is thanking you very much for your regards, returning these heartly.

My dear freind, please believe me, that I am wishing you and your est.wife the best health, hapiness and succes in your work. It would be a great pleasure for me to see you again - may be in a near future we shall meet you or here, either in your country.

Awaiting always with pleasure your further news, I remain, again with my best wishes and regards,

Yours sincerely,

Dear Doctor David:

At long last, my friend, I can write you a little report on how the Griffins are doing. We arrived home safely two weeks ago. A week later I picked up a thrombo phlebitis behind my left knee and had a severe attack in the prostate gland at the same time. Obviously neither of these are in any way connected with our Aslavital treatment. They have only interrupted the treatment for two or three weeks.

At the moment I am in a large hospital dictating to my secretary who is at my bedside. I had wanted to write earlier but as you can see I have been totally occupied.

We came through the U. S. Customs without problems. A pleasant feminine Customs Official opened only one bag and smilingly passed us through. The Ampules shipped well.

I want to thank you and all of your splendid Staff for the superb and expert professional treatment you gave both Mrs. Griffin and me. We are very impressed with your whole operation including your Laboratory and Clinical work, and with your personnel. Certainly you, my friend, could not have been more considerate and helpful.

Dr. Sapse and I have telephoned each other but have missed. I shall get in touch with him as soon as I am out of the hospital. The reason I am in the hospital is to treat the blood clot. I am taking anti coagulants and keeping moist heat on the leg. Meanwhile, Mrs. Griffin is on the Aslavital tablets and well pleased with the results. When I recover I shall continue experimenting with amounts and frequency, and report to you.

Please give our greetings to the members of your fine Staff who might remember us, especially Dr. Gusic. He and his wife and daughter were very friendly and helpful during our stay. We shall long remember with affection what each of you did. I soon must write to Professor Aslan and tell her these things.

Let us hope that everything clears with our U.S., FDA., so that we may get you over here for a visit and return some of the courtesy we were shown in your country.

With affection and best greetings in which Mrs. Griffin joins me, I am

Sincerely, your friend,

*Wayne Griffin*

Dear Mr. Griffin,

I am very glad to see you again in Bucharest. I remember with great pleasure of the extraordinary receiving and of the firendship you showed me.

I am so sorry to inform you that a change occured in my program, and I have to travel to Greece, France and Portugal. I shall be back in Bucharest on May 14th.

Between May 10 and 14, Dr. Cornel David will be at your disposal, but between May 14th and 17th, I shall be very glad to receive you and to see the tests made by Dr. Ditman, and having the tests made you may stay at Intercontinental hotel and at the same time having the possibility to see our country.

Please, be so kind and announce the date of your arrival and the fly in order to send somebody to meet you at the airport.

Looking forward to see you again, I remain with my all good wishes,

Yours sincerely,

Dear Professor Aslan:

Well at last our times are definite. We shall arrive (God willing, of course!) in your beautiful city Friday, May 10, and report to the clinic Saturday morning, May 11. We will be with you until Friday, May 17, when we depart for Warsaw. 23

I have written this information to Dr. Munteanu but Dr. Sapse felt I should advise you personally so that you will know we are there. It would be Mrs. Griffin and my great pleasure to invite you and a friend for dinner any evening during our stay. I would trust you to choose the restaurant you believe is the best. ASH

Mrs. Griffin and I are in the middle of our Gerovital H<sub>3</sub> tests here. Dr. Sapse arranged with a Dr. Ditman and we are progressing. I will have all of the information of the tests and all relevant material to give the clinic upon our arrival. Actually, it probably is not necessary for us to come to the clinic since we are having the tests here. However, it will be our pleasure to see your beautiful country and be able to spread the news among the medical fraternity here of our experience at the clinic. It seems like an adventure and we have high hopes.

We hope you will find it convenient to save an evening for that famous Romanian dinner. We are reading and learning all we can about your country and its history so we shall be ready.

It was a happy experience for us to have you and some of your associates for luncheon in Los Angeles. Whenever you come here we hope you will let us know so that we can carry on our beginning friendship.

All good wishes for your happiness and health and until we meet again, I remain, sincerely,

ZWG/sk

Dear Mr.Griffin,

I duly noted the contents of your kind letter of the 30d January and are glad to hear, that you will come in the Month of May in our country.

For the moment Mrs.prof.dr.Anna Aslan is not in Bucharest, as she is participating of the Congress of Gerontology in Maiama and that Mrs.prof.will leave for Fort Lauderdale, probably Canada and will be back beginning April.

If you will stay at the Inter Continentel, you will have no problems with reservation at a clinic.You have only to call us at the institute in order to settle the our of the appointment.

Concerning all the other problems, to rent a car, the trip to Constantza a.s.o. you can contact at your arrival immediately our International Travel Agency, Carpați, Bucharest Bdl.Magher 7, or if you want, please whrite directly in order to receive all details.

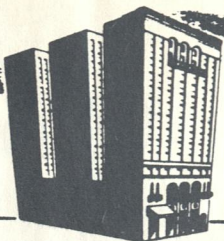

Awaiting with pleasure your arrival, I remain,

Dear Professor Aslan:

Plans are now definite that Mrs. Griffin and I will arrive May 5 and report for treatment May 6 at your clinic. We plan to stay two weeks, through May 18. Through our own hotel we are making arrangements to stay in the Inter-Continental during our visit. We plan to rent a car at your airport.

I understand there will be some free time so that we shall be able to drive to Constanta and other places. We are looking forward with pleasure to the whole experience.

I am advised locally that you soon will be in this country, perhaps in Los Angeles. I shall try to keep informed and to reach you if we are here. Mrs. Griffin and I plan to be in Guatemala for ten days in late February.

The news of progress of our FDA testing of your wonderful treatments continues to be encouraging. There is much optimism here at this time. Gerovital H<sub>3</sub> may at long last find a home in the U. S. When it does it will be like an explosion! Anticipating this success I have acquired stock in the Rom-Amer Corporation.

I trust one of your associates will write to me and advise if our plans are satisfactory. We shall forward our deposit check when advised. Also, I shall appreciate any other information and instruction we should have. I can't begin to tell you what a

Dear Professor Aslan:

By this time you have no doubt received my letter from November 8. Only one question was omitted. Mrs. Griffin and I would like to know whether your travels will bring you as far as the U. S. and possibly California in the future months. If so, it would be our pleasure to have a small dinner party in our home in your honor.

In any case we anticipate with much pleasure meeting you and taking your treatments next May, hopefully to bring another couple with us. The only question which lingers in my mind is how we would bring out to the USA the medication.

We are looking forward with much joy to seeing you either in California or in beautiful Bucharest.

Sincerely,

REFERENCE: YOUR LETTER BI/BI/8778, DATED 3 OCTOBER 1973

Dear Professor Aslan:

It was kind of you to write such a personal and helpful letter. Mrs. Griffin and I have decided to follow your counsel and will plan to visit you in May of 1974, probably around the middle of the month. We are eager to drive through the beautiful Balkan countries but, as you suggest, it would be much more pleasant in the Spring.

Meanwhile, information has been forwarded at your request, no doubt, from your International Travel Agency.

There remains one final question. How are we able to bring out to the U. S. any medication for continued use? I could bring a prescription from our family physician if this would help, but I am informed that our Custom officers confiscate all such medication, even including the many ones produced in Europe.

We read with considerable interest in this country that our FDA is reconsidering the importation of your wonderful product. If this passes then, of course, there will be no problem. A company has been formed here to expedite this vital solution. It is called Rom Amer and its stock has advanced quickly. Everyone is hoping they will be successful so that your discovery will be welcomed here. If so, it will be an instant and very great success.

Perhaps one of your assistants can write a little letter explaining how we would get medication back to this country. All other matters are clear and in due time I shall make all reservations for the middle of next May.

Thank you so very much, dear Professor Aslan, for your courtesies. Thanks and good wishes for the continued growth and success of your wonderful discovery.

Very sincerely,

*Z. Wayne Griffin*

Dear Mr. Griffin,

I duly noted the contents of your kind letter of the 11st July,

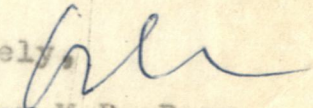

Concerning your requests, I have pleasure to inform you:

- As our treatment is a powerful regenerator improving the general condition of the health, it has so too a good influence of the intestinal tract.
- Concerning all problems with the prostate gland, just, also in such cases, we had very good results.

In order to be sure that your visit is definitively settled, I informed again our International Travel Agency, Bucharest, to send you urgently the final confirmation.

Meanwhile I remain,

Yours sincerely,

  
Professor Anna Aslan M.D., D.sc.  
Director, The Bucharest Institute of  
Geriatrics

U.S.A

Professor Anna Aslan M.D., D.sc.,  
 Director, The Bucharest Institute of Geriatrics,  
 Bucuresti, Romania

Dear Professor Aslan:

This will acknowledge your kind letter to Mrs. Griffin. It was dated in June and took much longer to arrive here than I would expect.

Yes, we are indeed interested in visiting your lovely country and possibly undergo the treatments we have heard so much about.

There are two questions I need to ask about the treatments.

1. As a long time victim of colitis will the treatments in any way agitate the intestinal tract?
2. For some time I have had difficulty with my prostate gland. What would the effects of the treatment be upon a normal but slightly enlarged gland?

I know how busy you are and do not like to impose on your time. I would greatly appreciate, however, having one of your staff, at his early convenience, give me the information on these two questions.

Hopefully we will be in your country in late September and early October.

Thank you for your interest and help.

Sincerely,

*Z. Wayne Griffin*

MSA

W. WAYNE GRIFFIN  
154 South Hudson Avenue  
Los Angeles, California

560-16-8457A

DOB: June 13, 1907

Height: 6'1"

Weight: 190

BP 130/80

Reason for Taking GH3: Hoping for better days. Colitis 20 years.  
Allergies (pollens and grasses) for 50 years.

Sensitivity Test: Not Allergic to ANY MEDICATION

Occupation: Private investor -- made movies AS A PRODUCER AT MGM

Married 37 years -- wife AND has 3 married children

Born in Hartford, Kentucky -- Early life great -- Father has several nose operations for polyps.

Operations: Hemorrhoids on left groin in 1934  
Appendectomy 1945  
Polypa removed

Losses: None

Used Antihistamines for 40 years for allergies  
Antihistamines off and on for years  
Sulfonamide for colitis

For 20 years has been a Vitamin user in large amounts  
Does not drink --> allergic to alcohol.

Allergies: MANY of nose and eyes to pollens and grasses. Red, itching eyes,  
has had great relief from injection of Piromen.

Present Emotional State: tense, compulsive, exacting -- Strong driver. A hard worker

No previous psychiatric treatment -- never felt the need does not relate colitis to emotional tension in himself.

Diagnoses: Multiple allergies, Nasal and eyes to Pollen, Colitis, chronic, Enlarged Prostrate, Depression at times.

Plays tennis 4 days weekly

Jogs a mile in 10 minutes on other days

Sleeps well.

Wayne Griffin

Gerovital H3 Series I

#1--3/7/74--5cc-- Initial injection.

#2--3/9/74--5cc--Notes nothing yet.

#3--3/11/74--5cc--Notes nothing yet.

#4--3/13/74--5cc--Notes nothing yet.

#5--3/15/74--5cc--Notes nothing yet --like water, he says.

#6--3/18/74--5cc--Notes nothing. Feels well most of the time.

#7--3/21/74--Had stimulation last night and a little diarrhea

#8--3/22/74--Felt over stimulated and slept poorly--sexual life down to z  
2.5cc

#9--3/25/74--5cc--Doing fine, but his colitis has flared up.

#10--3/27/74--5cc--Doing better

Gave 5cc vial to take Friday as will be gone

#11--3/29/74--5cc

#12--4/1/74--5cc--Doing well.

SUMMARY: I feel pretty well, I feel I am a poor subject. He feels he should have responded more. His sexual drive and urge are decreased.

4/8/74--Feels fine--felt better after 3 days off GH3. Thinks 2-1/2cc three times a week would be better or 5cc twice weekly.

CASE HISTORY

Z. WAYNE GRIFFIN

Age 66, born June 13, 1907. Caucasian, Height 6' 1", weight 190#.

Mr. Griffin is well and strong. He enjoys good health generally despite having had to cope with colitis for the past 20 years. During the past 3 years he has had some minor problems with his prostate gland but so far no surgery is indicated. He has been plagued with round-the-calendar allergies for nearly half a century. Has undergone removal of polyps perhaps a dozen times during this period. He has consumed a wide variety of antihistamines in large amounts since they first came on the market. He has had innumerable tests and taken copious injections most of which were of little benefit.

Mr. Griffin has had his appendix removed, in 1945, and had a pelvic hernia repaired in 1935. This has been the only surgery undergone and he remains in excellent health playing tennis 4 or 5 days weekly. When he misses tennis he jogs a 10 minute mile.

His motivation to keep well is strong. That is another reason he is interested in the Gerovital H<sub>3</sub> treatments. He is knowledgeable on diet and adheres reasonably to balanced food values. He is a confirmed vitamin addict and has been for 20 years.

Mr. Griffin's blood pressure is 128 over 75. Cholesterol 175.

SHORT FORM

CONSENT TO ACT AS SUBJECT

SUBJECT'S NAME: F. WAYNE GRIFFIN

DATE: 7 MARCH 1974

NAME OF PROJECT: Series of Gerovital H3 injections

I hereby consent to be a participant in the project named above. An explanation of the procedure(s) and/or investigation(s) to be followed, including an identification of those which are experimental, was provided to me by Keith S. DeMar. I was also provided with a description of the attendant discomforts and risks to be expected. I was also assured that any injuries concerning the procedure(s) and/or investigation(s) would be answered. I was also assured and I understand that I am free to withdraw my consent and to discontinue participation in the project or activity at any time.

Subject's signature F. Wayne Griffin

Auditor-Witness: Keith S. DeMar  
(to oral presentation and signature)

Woodland Hills,  
California 91365  
U.S.A.

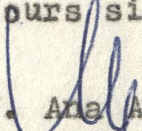

Dear Mrs. Gordon,

In answer to your letter I would suggest you to start again a treatment with Gerovital H3 (6 courses of injections alternating with 6 courses of pills). But taking into consideration your invalidating knee problem which needs special treatments (intra-arterial and intraarticular infiltrations with Gerovital H3), I give you the address of a physician of the U.S.A. who knows our method of treatment: Prof.Dr. Ivan Perkovic, 420 Deauville St., Las Vegas, NV 89106, phone (702) 382-5895 or 384-4812.-

Enclosed herewith we send you back the X-rays.

Waiting with interest for further news from you, I remain with my best wishes,

Yours sincerely,

Acad.Prof.  Aslan, M.D., D.Sc.

Dear Dr. Aslan,

Thank you for a prompt reply. Since I cannot come to your Clinics at this time, I am enclosing two X-rays of my left knee.

Your diagnosis and type of treatment for my problem knee, will be greatly appreciated. Please return the X-rays to me when you are finished with them.

I greatly respect and admire you and your Medical knowledge, and will follow your advice.

Sincerely,

*Paulyne Gordon*

Dear Mrs. Gordon,

I got your letter and I am sorry to find out that you do not feel very well. I suggest you to come to one of our clinics if possible, for 2-3 weeks, because besides the general treatment, special infiltrations are given here, which are indicated in your case.

Enclosed in the letter you will find our conditions.

If you cannot come, please send us an X-ray of the knee and you will get an indication of treatment.

With best wishes.

Yours sincerely,

Acad. Prof. Ana Aslan, M.D., D.Sc.

Bucarest, Romania

Dear Dr. Aslan,

I hope this letter finds you well and happy and all your cares are little ones. I have been on the Gerovital-H3 Program since 1974. For some time now I have been experiencing some pain and stiffness in my left knee. This condition causes me to limp quite badly. I read how you cured a young man with a similar problem with procain injections, and I would like to try it.

I would appreciate it, if you could suggest a Doctor in Los Angeles who does use procain injections as treatment for Arthritis. If you do not, then perhaps you could give me a prescription for such treatment, and I could find a Doctor to do it. I did see an orthopedic Doctor, and he suggested surgery, and an artificial knee-cap re-placement, which I am not too thrilled about. I would like to give the procain injections a chance, to see if I would benefit from such treatment.

I wish you would give me your views on the above. It would be deeply appreciated by me. Please keep well.

Thanking<sup>you</sup> for complying with my request, I am,

Sincerely,

  
PAULYNE GORDON

Dear Mrs. Gordon,

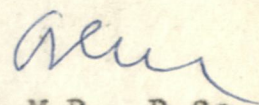

I got your letter dated October, 10 and I can answer that I am very well, thank you.

As far as the order to "Chemica" is concerned, I got in touch with Mr. Valentin Tăruș, Export 6 Deptm. and he told me that he has sent the supply, with delay, because the company dealing with the export of drugs changed. Here is the Address: I.C.E. "Chimica", Bucharest-Romania, Splaiul Independenței 202 A, telex 11489/10073 danaz r, telephone 495010.

So, your drugs order must arrive soon.

I wait for further news from you.

Yours sincerely,

Acad. Prof. Ana Aslan, M.D., D.Sc.

Dear Dr. Aslan,

I do hope you are well and enjoying good health. I called you this summer and was informed that you were on a lecture tour and was expected in California. I was sorry to have missed you, but I will try again soon. Once again, I need your help to get the medication for our treatments. I am enclosing copies of the order to CHIMIMPORTEXPOR and also copy of cashier check which was paid to them on August 17, 1985. To date I have not received my order.

I called CHIMIMPORTEXPOR and was told that CHIMCA now does the exporting. At any rate I feel that I have been very patient, and don't know why there is a delay, as it has been almost three months, and we are completely out of the medication for that length of time also.

I would appreciate it if you would get in touch with CHIMIMPORTEXPOR and find out why they have not sent my order, also the name of the person whom I can contact.

Thank you so much for coming to my aid.

Sincerely,

*Paulyne Gordon*

*Dear Mrs Pauline Gordon*

We acknowledge with thanks the receipt of your letter dated 6/8-85 and thank you for your interest in geriatric treatment and geriatric products- Romanian original drugs of Prof. Dr. Ana Aslan.

Please find enclosed a price list for Gerovital H 3 and Aslavital and some brochures for your information.

Payment shall be made in advance to the account of Chimimportexport 30-22-04-79 with the Romanian Bank for Foreign Trade, St. Calea Victoriei no. 10 Bucharest, telex nr. 11235 ebank r, or by cheque notifying "for Gerovital H 3".

Delivery in max. 30 days after cashing the money.

As the drugs are not registered in your country, we offer them only for your personal use, as allowed by the regulations of the health authorities in your country. Please therefore agree with the delivery on your risk including that of customs clearance in your country.

The present offer is valid for 1985.

Should you have questions regarding therapy, please address them directly to Prof. Dr. Ana Aslan:

-----  
Institutul Național de Gerontologie

Dear Dr. Aslan,

A very Happy and Healthy New Year. I wrote to you some time ago, that my husband and I took the treatment in 1974, and you advised us to get the medication for the treatment in London. We have been purchasing the ampules and vials from Tudor Trading Co. in London. At this time, I would like to know if there is another Company that has the Gerovital ampules and vials, closer to the U.S. and also the price of same.

Ofcourse as you must know Gerovital is being sold in Las Vegas, Nevada, but cannot be transported to California. That is why I have been getting it from London. Have you invented any new medications for the cure of arthritis, and heart disease, and cancer. I do hope that you are enjoying good health.

I am looking forward to an early reply to the above.

Sincerely,

*Pauline Gordon*

Dear Dr. Gleser,

I hope you are well and  
enjoying good health.

We took the treatment about  
four years ago. I want to know if  
just taking the Gerontol or Aspartol  
Pills all the time with rest periods  
is as effective as the shots. Some-  
times it is inconvenient to have  
the shots when you are away from  
home. I await your expert opinion.

Sincerely,  
Pauline Gordon

Stimată Doamnă Dr. Aslan,

Sper că sînteți bine sănătoasă.

Noi am făcut tratamentul acum 4 ani. Aș vrea să știu dacă luînd Gerovital sau Aslavital numai pastile tot timpul este la fel de eficient ca și injecțiile.

Uneori este incomod să faci injecții cînd ești plecat de acasă.

Aștept părerea dv. expertă.

A dv. sinceră,

Dear Prof. Anslan,

In your very nice letter of September 4th, you referred me to your representative in London, to purchase Gerovital-4 and Aslavital. Upon receipt of their letter, I learned that they do not carry Aslavital. My husband is the one who uses the Aslavital. Is it possible for you to send us the vials and pills=Gerovital and Aslavital by mail to an address in Mexico? How much is the price of the vials and pills. Can we just take the pills? Would just the pills be just as benefical as both, the vials and pills.

Please let me know by return mail, about shipping to Mexico, and pulls only, and how I can pay for same, including shipping.

Sincerely,

(Mrs. Paulyne Gordon)

P.S.- We are getting very low on our supply purchased in Bucharest in September 1974.

To Whom It May Concern:

My husband Allen, and I, Paulyne Gordon, took the Gerovital treatment on September 9, 1974, at your clinic. We were prescribed a two years supply of Gerovital and Aslavital shots and pills. By September, our supply will be gone, and therefore, I want to know if your clinic can send us the medication C.O.D., or do I send you a check, or money-order?

If the above is not possible, could you tell me where we may get the medication, that, is closer to our country. I have heard that treatments are being given in Mexico and also Majorca. Do we have to have a physical examinations, same as we did two years ago? Or can we just reorder the medication for another two years? What is the procedure?

Please let me know by return mail, giving me all the information I desire, namely where and how we may get the medication to continue the Gerovital treatment.

Thank you for complying with my request by return mail.

Sincerely,  
*Paulyne Gordon*

Gentlemen:

My husband and I are very interested in your Gerovital H-3 program. We became aware of it through the television media last year, and have read a few brochures too, but would like more information about the treatments.

We are planning to visit Bucharest this summer, and desire treatments at the Clinic. Perhaps you can tell us when is the best time to come insofar as climate and availability of accomodations, and cost. Is the treatment the same at the Hotels? Which hotel would you recommend if space is unavailable at the Clinic? Do we have to take specific shots and have a visa before arrival?

I would appreciate an early reply, so that we can make all the necessary arrangements for the trip.

Thanking you for complying with my request, I am,

Sincerely,

Dear Sir,

Very recently, I read about your institute in a local newspaper, carrying that you can convert the older people into young people. (I know it's limited to the patient's emotional character). It's obvious that you must have made a secret ointment in order to 'clear up' the weakness during the old age.

My mother is now 58 year-old.

She is extremely suffering from 'Paralysis'. She is the only life whom I am living for. Only for her sake I am writing to you so far.

Yet, we are poor. We don't know what to do with her. I believe you will kindly do something that is please send the medicine which is necessary to her disease.

My mother has also weak blood veins and heart disease.

I will thank you, if you will kindly send the medicine through Post or C.O.D. I will indeed grateful to you if you will kind enough to reply me earlier before you are sending the medicine, stating the cost for medicine. I will try to collect the money you are asking, somehow, with the help of god. Amen.

I am certain your medicine will cure my mother's disease. I am looking forward for your reply. will be happy to see the deduction of price.

Thank you.

H.E. Miss P.G. Lim, the Ambassador would like to thank Prof. Aslan for her kind letter dated 6th September, 1974.

The Ambassador is making arrangements to come to Bucuresti on the 15th October, 1974.

I hope that all arrangements will be made for her to stay in the clinic and that arrangements can also be made to meet her on arrival.

I look forward to hearing from you soon, that these arrangements can be made.

Dear Miss Lim,

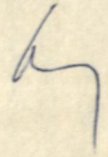

thank you very much for your kind letter of the 22nd July within which I learned, much to my regret, that you are yet ill and your health is not quite well. Please, believe me, that I am wishing you from all my heart to be rapidly in good health again.

I am awaiting with much pleasure your visit, and although we are very overcrowded, we will do our best to find a good place for you even if you write us only in the month of September for October. But, please, be kind enough, to inform us as soon as possible when you will be able to come for a few days in our clinic.

Awaiting with great pleasure your kind further news, I remain with my best regards and wishes,

Yours sincerely,

Dear Miss Lim,

thank you very much for your kind letter of the  
23rd august, which made me a great pleasure,  
knowing now that you are again in good health.

Obviously I am awaiting you from all my heart,  
but please, as the schedule of my voyages abroad  
changed for some days, be kind enough to call  
me before your final arrival in order to be  
sure that I returned.

Awaiting with great pleasure your phone as well  
as your arrival, I remain with my best regards  
and wishes,

Yours sincerely,

Dear Prof. Aslan,

Thank you for your kind letter of  
1st August, 1974.

I have recovered from my illness and  
I should be fit to travel to Rumania for consultation  
with you on 15th October on which date you have  
said you will be in Bucharest. I hope that  
accommodation would be made available for me at  
your clinic.

Thank you once again for your concern,  
which I appreciate very much.

Yours sincerely,

22nd July, 1974.

Dear Prof. Azlan,

Thank you for your letter dated 10th  
July, 1974, addressed to my Secretary.

I am not able to travel away from Belgrade  
as yet and I am also undergoing some physio-therapy  
treatment for my disc condition. I also have to  
rest after my recent asthmatic attacks.

Perhaps I will come and visit you after the  
15th October after your return. I would like, if  
possible, then to be able to stay in your clinic for a  
few days for observation. I will write you again nearer  
the time and if I can come after September, I will also  
write you again.

With kind regards,

Yours sincerely,

P.G. LIM(MISS)

Acad.Prof.Dr.A.A./BI/7970  
10.7.1974

Dear Miss Chin,

I was indeed very sorry to hear about the illness of Mrs. Ambassador as per your kind letter of the 4th July 1974.

I expected her with great pleasure and I was deeply impressed to hear about her troubles.

Unfortunately the second half of the month of July I am no more in Bucharest being abroad. I think I shall be here after the 10th August up to the 15th september, and then again after the 15th october.

If these periods will not be suitable for Mrs. Ambassador, she can come very well in the period requested by you, as my co-operators are a staff very spezialized in all geriatric problems.

If Mrs. Ambassador needs an internation for 2 weeks, not only as out-patient with the daily treatment, please, be kind enough to inform me as urgently as possible in order to take the necessary steps.

Awaiting with pleasure your kind reply, and wishing the best health for Mrs. Ambassador,  
I remain with kind regards,

Yours sincerely,

Socialist Republic of Romania

Dear Sir,

I regret that we had to cancel our Ambassador's visit to Bucuresti on Monday 24th June. As you know she had been ill with an asthmatic attack on a Saturday before she was due to leave for Bucuresti. She strained a muscle and her disc gave trouble and the doctor says she has to lie completely still in bed for two or three weeks.

She is in considerable pain with complete immobilisation. With rest she should improve.

Perhaps by the end of July she may be able to visit Professor Aslan if she still will be in Bucuresti.

Our Ambassador would like to visit Bucuresti about 24th or 25th July and perhaps you will let me know whether this is a convenient time and if it would be possible for her to stay at the clinic.

Sorry for the inconvenience caused.

Thanking you,

Yours sincerely,

## MEDICAL REPORT

Mrs. LIM Peggy, aged 56, from Malaysia was hospitalized in our institute between October 24th and 27th 1974.

The patient complains of pains in the lumbar region, irradiating along the left sciatic nerve, and from time to time she has asthmatic attacks that are quickly stopped with isoproterenol given in aerosols.

At the clinical examination we found pains at the movement of the lumbar spine and at the extending of the sciatic nerve.

The clinical examination of the respiratory system was negative. The laboratory data were within normal limits.

The X-ray examination revealed arthrosic modifications of the spine.

Our diagnosis is: - Lumbar spondylosis (with left sciatalgia).  
- Bronchial asthma (allergic, extrinsic).

The patient underwent a biotrophic treatment with Gerovital H3 in infiltrations, injections and tablets.

After 2 weeks of rest, we advise the continuation of the treatment as follows: Gerovital H3 3 injections weekly for 4 weeks. It follows a rest interval of 2 weeks after which Gerovital H3 2 tablets daily for 12 days. It follows a rest interval of 2 weeks, after which begin the same cycle of treatment, alternating injections with tablets with the prescribed rest interval.

BEOGRAD, Le 6. Juin 1976

Poštanski fah 607

Cher Collègue Cornel,

Je vous prie de m'en excuser de vous déranger, mais j'espère que vous n'êtes que lui-même en état de m'en donner une vraie réponse.

Ma patiente, Madame Peggy Lim, ambassadeur de Malesie à Belgrade, a passé certain temps à Bucarest, il y a un an de ce temps-là, chez vous et chez Prof. Dr. Ana Azlan.

Elle a reçu comme traitement une cure dans les injections de Gerovitale et C-vitamines. Elle se sent à présent bonne et fraîche, mais dans ce temps-là, elle a engraisé 4-5 Kg et elle ne peut pas les perdre, même pas par l'activité de réduction.

Je me suis intéressée, pour ma pratique médicale, si c'est une habitude dans ces cas des cures et quelle est votre propre expérience concernant cette question.

Est-ce qu'il existe une cause et une liaison entre cette thérapie de Gerovitale et de l'engraissement.

En attendant votre réponse et en vous remerciant d'avance je vous prie d'agréer, cher Collègue, mes salutations très distinguées.

Amicalement

Cher Confrère,

Je viens de recevoir avec un très grand retard votre lettre du 6 juin par laquelle vous me demandez des renseignements et je m'empresse de vous répondre.

Le traitement au Gérovital H3 étant un traitement biotrophique entraîne une augmentation de la capacité vitale, donc aussi celle de l'appétit; il s'ensuit évidemment une prise de poids qu'on peut prévenir en surveillant attentivement les repas — pour que l'apport de calories ne soit pas au-dessus de la normale — et en faisant du sport et de la gymnastique.

Veuillez agréer, cher Confrère, l'expression de mes sentiments les plus distingués.

Dr. Doc. Corneliu David

Rafael Barbudo Cantareso

C. Coín, n.º 35.

Mijas, (Málaga).

Aslan,

Bucarest,

Distinguida Profesora:

Hace algunos meses se ocupó la Prensa española, al hacer referencia al Congreso de Gerontología, celebrado en Merano (Italia), de la sensacional intervención de V. comunicando los notables resultados obtenidos en el Instituto de Geriátrica de Bucarest, con su método terapéutico, aplicado a los ancianos, con la novocaina.

De nuevo, el Extraordinario de los domingos del diario "España", que se imprime en Tanger, vuelve a ocuparse, con más detalles y extensión, del mismo tema, con el sugestivo título "LA DOCTORA ANA ASLAN FABRICA CENTENARIOS CON NOVOCAINA".....

Y, en seguida, como los chicos que encuentran, de pronto, el juguete con que soñaron, y que nunca creyeron tener a su alcance, surge en mí un incontenible grito:!!! YO QUIERO SER CENTENARIO!!!....

Tengo 77 años; llevé una vida espititual angustiosa y una tarea profesional, cruda y agotadora, durante cincuenta años y días, que el Estado cortó, en seco, a los 70, como máxima señalada por la Ley, y no por mi gusto ni incapacidad. Pero yo sigo entero y fuerte.

Mi padre (q.e.p.d.), dedicó 48 años a la Medicina y murió, a los 69, agotado. (Una lápida conmemorativa, como homenaje póstumo por sus trabajos y sacrificios por la Humanidad, da nombre a la casa y a la calle donde murió (Cañete de las Torres, (Córdoba), ¡Pero murió agotado!... Yo, con vida mas dura, trabajé más y más años y me encuentro fuerte y entero. Pero.....la degeneración de los centros nerviosos no tardará en acusar que la distrofia empieza y.....V., Dra. Aslan: tiene los medios de contenerla.

Obligado por la Ley a no hacer nada, HAGO; pinto, cultivo el deporte de la caza; leo incesantemente y, sigo, incasable, el progreso incesante de la Humanidad.

Y como mi vida pasó de la crudeza, hoy es tranquila, y me siento embargado por estemafán de vivir y ver...?quiero vivir, Dra.

Además de Doctora, es V. mujer; dos razones poderosas para poner confianza en sus bondades.

A ellas acudo en ruego de que se sirva facilitarme: fórmula completa con novocaina, dosis a emplear, por día o por semana, duración de tratamiento y contraindicaciones, si hubiese alguna.

Yo me brindo a tener a Vds. al corriente de los resultados. Con la admiración y respetos que se merece, agradece a V. por anticipado, cuanto haga por atenderme y attn. le saluda y l.b.l.p.

安娜雅士士博士 雅鑒 敬啟者，先生係世界上非常人，智慧超人一等，所以發明出返老還童聖藥 H3，而且馳名全球，令人欽佩之至。鄙人今年 47 歲，男性，職業經商和負責會計工作，在 1967 年中，曾患腳手抖病（疲弱時）和心臟也有攪抖。人漸逐漸瘦弱，已服食 H3 藥丸 6 盒（25 粒元）不但病除，人復健起來。我在這裡萬分感激你。

以下有些疑問，萬望先生，夜費些寶貴時間，幫解答，不勝感盼。

在此年餘般代價 H3 藥丸，藥丸很暢銷。

1. 針藥，盒面寫有限期 12-1968，過些時間可用否？
2. 藥丸有否限期？
3. 隨函附奉存單，請看是否貴出品（恐冒牌）？
4. 我連續服食，可以嗎？（藥丸）
5. 我成存藥丸每盒 M\$24.00，針藥每盒 M\$54.00，即等於 3 磅多，和 7 英磅多，對嗎？

我不諳英文和羅馬尼亞文，所以只好用中文，引起不便之處，萬分抱歉。

18-3-70.

Professor Ana Arslan,  
Institute for Geriatrics,  
Bucharest, Rumania.

Dear Professor,

According to the local newspaper the Straits Times of 10-3-70 you have new composed an improved version of the virility drug x-3 known as x-4. Is your x-3 the same as H-3 which my wife, aged 47 years old, has been taking. We have never heard of your product x-3 in Malaya. We only get H-3 (Gerevital) with your signature on the label. Please let us know when your new drug x-4 is out in the market for sale and available in Malaya or any place near Malaya as we want to order some for use by my wife.

By the way, dear Professor, could you please tell me if there is any treatment to cure my wife's sickness. Two years ago she was admitted to the Singapore General Hospital for over a month. She was subjected to lumbar puncture, myelogram, and angiogram (lateral carotid) etc. The doctors diagnosed the sickness as **Amyotrophic lateral sclerosis**, cause of which is unknown, and therefore incurable. It is a sort of progressive chronic degeneration of the anterior cells and non-functioning of the motor neurons involving both the spinal cord and the brain stem.

Since her discharge from the Singapore General Hospital about 2 years ago she has not been to see any doctor except taking multi-vitamins and your Gerevital called ~~H-3~~ H-3 pills. All muscles in her shoulder-blades, arms & hands are disappearing. She has no strength even to move her fingers, nor can she raise her hands. She cannot speak clearly now. However, the muscles in both her legs are normal although they are also very weak. She cannot stand by herself and unable to walk. Each morning I have to take her by one of her arms and help her to move her 2 legs about very slowly for half an hour. I think because of this the muscles in her legs are still normal.

I have managed to read about the sickness of Amyotrophic Lateral Sclerosis in page 1594 of the 11th edition of the Text Book of Medicine by Cecil-Lieb.

Clinical manifestations of the disease:-  
"Amyotrophic Lateral Sclerosis develops gradually and progresses rapidly or relatively rapidly after onset. It may herald its appearance in one of the following ways:  
(1) by weakness of the hands and arms;  
(2) by bulbar systems, such as difficulty in swallowing and talking; (3) by weakness and spasticity of the legs; (4) by ~~the~~ a combination of all or some of these systems.

"The usual mode of onset is by symmetrical weakness of the hands and arms, manifested usually by difficulty with fine hand movements, as in buttoning clothes, picking up small objects & writing. The systems are more pronounced in the distal segments of the limbs, but the onset is sometimes characterised by weakness of arm and shoulder movements. At times the systems characterise only one hand or arm. Leg weakness may involve simultaneously with hand and arm disabilities or may follow these after a varying period of time.

"Similarly, difficulties in swallowing may be in talking (indistinct speech, hoarseness) may unfold prior to the limb difficulties) simultaneously with them, or at a later date. I have just started physiotherapy on her in the hope that her sickness can be stopped or arrested from further deterioration in her.

Your advice will be greatly appreciated. Professor. Thank you very much in advance.  
Yours faithfully,

Dear professor Anna Aslan,

Not long ago, I have read a essay from the magazine and know

that you have given lecture in London recently. You announce that you have invented the H3 medicine which can make the old people become younger & live longer. Although I am not a old man I find this very interesting. Is this true a person can become younger after taken the H3 medicine? Can you tell me something about how and why the medicine H3 can make the people younger? How you found the medicine in 1946? Can you show me the efficacy of the medicine in picture or some other evidence? Would you kindly please tell me all these?

At last I hope you can send me some sample of the medicine or tell me whether I can buy the medicine from you and how is the price.

Thank - you,

Yours truly  
Wong Loon Hung

Dear Mr. Lingham,

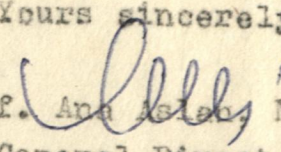

I received your letter and I send you enclosed herewith, for your information, a brochure regarding the geriatric cure in our country.

It would be better to come and undergo here a first course of treatment under our supervision. Afterwards you will continue it at home according to the given informations.

If you cannot come to us, you may order Gerovital H3 to one of our representatives on the enclosed list.

In case you decide to come to us, please, let us know the date of your arrival, in order to make a reservation.

Yours sincerely,

Dear Dr, Ana,

I am writing to you this letter regarding my  
my health problems, firstly I am suffering from Diabetics which is  
under full control now, however it is now found that I am having sligh  
High Blood ppressure.

As I have read about your sucess in world magazine  
therefore I want to be your patient and to treat me.

I hope you will send me the medicine plus the  
cost of consultation fees to the above address by return.

Thank you

Yours Sincerly.

Dear Sir,

In answer to your letter of January 24th, I inform you that our product named "Gerovital-H<sub>3</sub>" is prepared under the form of 5 cc ampoules, administered intramuscular. It is naturally suitable for aged people as it is mainly used in old age and for the prevention of precocious ageing processes. It can be used in any climate. The dosage is different when used on children. Physicians wishing to have details can write to us directly if they wish to have information or apply for reprints in English about our work to: Miss Frances Coleman, Consultants Bureau, Inc., 227 West 17th Street, New York. A series of scientific papers and articles have recently been translated and published there.

Kindly let us know if you decide to contact the Ministry of Oil & Industry and Chemistry in view of a sale agreement.

Sincerely yours,

Prof. Dr. *A. Aslan*

23rd May, 1977.

Dear Dr. Aslan,

I became interested in your work when I read in a newspaper article here that your Gerovital H3 stimulates the growth of fresh cells within the body and acts on the central nervous system.

I am a 48-year-old Malaysian male now working as Publisher-Editor of the forthcoming monthly magazine "Developing Nations, Journal of the Third World." In November, 1975, I had a stroke (brain stem infarction) and lost my sense of balance and speech. I am now able to walk unassisted and speak satisfactorily, but the left half of my face and the right half of my body, including my right limbs, are covered with skin that is of reduced sensitivity (especially to heat and cold) and have painful nerves within them. The pains seem to be getting worse day by day. This may be due to the degeneration of my nerves.

I am still receiving outpatient treatment at the University Hospital, Kuala Lumpur, Malaysia (my patient registration number is 042466). All I am getting by way of treatment are ALDOMET to control my blood pressure (which is now

P.S.: This has been written in my own handwriting.

ILE MAURICE

Cher Monsieur,

J'ai lu avec attention votre lettre du 13 juin, parvenue avec un peu de retard, et je regrette que vous ne puissiez pas venir pour bénéficier sur place du traitement.

Il m'est difficile de recommander un traitement individuel à une telle distance, mais je me contenterai de vous indiquer un schéma général du traitement - en annexe - au Gérovital H3. Vous pouvez commander notre médicament à une des adresses comprises sur la liste jointe; à mon avis il vous sera plus facile de commander le médicament en Angleterre, du moment que l'île Maurice fait partie du Commonwealth. Veuillez me tenir au courant avec votre état de santé, en m'écrivant après avoir fait 2-3 séries complètes (injections et dragées).

Dans l'attente de vos nouvelles, agréez, cher Monsieur, mes salutations distinguées.

*Anna Aslan*

Chère Madame,

un

Avenue Trianon 1.

Shantiniketan

Je suis un habitant de l'île Maurice.

Quatre Bornes

Île Maurice

Océan Indien

Ce 13. Juin 1978

soixante-quinze (75) ans. J'ai lu avec beaucoup d'intérêt un article sur vous et votre "Gérovital", un traitement vraiment merveilleux qui vous rajeunit à vue d'œil. J'ai même vu votre ravissante photo dans "Paris Match" de Décembre dernier.

Bien que vous ayez 80 ans, vous ne portez pas le moindre ment votre vieil âge. Vous êtes jeune et belle & ravissante. La raison: c'est que vous prenez du Gérovital, votre propre invention, depuis 27 ans. Vous attirez annuellement dans votre clinique 60,000 patients de tous les pays du monde qui viennent "se refistoler" chez vous. Malheureusement, je ne puis pas faire de même. Je n'ai pas les moyens. Aussi je prends la liberté de vous écrire pour vous dire qu'ici à l'île Maurice avec une population de 900,000 âmes et une cinquantaine de pharmacies, votre gérovital est introuvable. J'ai écrit à un ami en France et il a fait le mort.

Je suis un peu diabétique et j'ai la forte tension de 17-9. Puis-je faire une cure de gérovital? Si oui, quel en est le coût? Sous quelle forme c'est meilleur pour moi: comprimé, capsule ou injection intra musculaire? Je ne prends ni sucre ni sel depuis 10 ans. Je souffre d'une grande faiblesse dans les jambes surtout en est. Je suis infiniment redevable si vous voudriez bien m'envoyer un prospectus du gérovital et de la littérature sur la gériatrie. Vous me rendriez un très grand service et pour lequel je vous remercie infiniment. Avec mes salutations les plus respectueuses, je demeure, madame, votre humble serviteur très dévoué.

Curepipe - Mauritius  
INDIAN OCEAN

Madame,

Nous confirmons réception de votre lettre du 20 juin et en réponse à votre demande nous vous informons que notre produit - "Gerovital H3" est actuellement exporté dans de nombreux pays.

Il peut être obtenu en vous adressant directement à l'entreprise roumaine exportatrice - "Chimimport" - 12 Strada Doamnei, Bucarest.

Nous considérons que dans votre cas un traitement selon notre méthode pourrait avoir des résultats favorables. Quant à sa durée, elle dépend uniquement de la manière dont vous réagirez. Il sera probablement nécessaire de vous faire administrer de 6 à 8 séries d'injections par an, d'après le mode d'administration ci-joint.

Veillez avoir l'obligeance de nous tenir au courant des résultats obtenus après les trois premières séries d'injections.

Agréez, Madame, l'expression de nos sentiments très distingués.

LA DIRECTION,

Dr. C. David

Messieurs,

J'ai apporté en son temps l'attention la plus sérieuse a votre réponse du 14 mars 1959, laquelle me faisait savoir qu'il ne vous était pas possible de me procurer les produits de vos découvertes, ceux-ci ne pouvant être exportés, cependant qu'il restait l'espoir qu'ils puissent l'être dans un délai plus ou moins court.

Le produit qui m'intéressait alors était le "Gerovital-H<sub>3</sub>", et en remplacement vous m'aviez conseillé un produit allemand se rapprochant du votre, la Novocaïne-Hoechst, mais ne donnant pas la même certitude d'efficacité et davantage susceptible de soulever des réactions désagréables.

Comme il ne me fut pas possible de me procurer le produit allemand cité plus haut, je viens a nouveau vous demander si le "Gerovital-H<sub>3</sub>" est maintenant exportable? et me dire aussi exactement que possible s'il répond bien comme médication a soigner, et stabiliser ensuite, une insuffisance aortique et coronaire, dont les effets se font de plus en plus fréquents et douloureux, malgré les dilatateurs, anti-coagulants, etc, etc., qui, j'en ai l'impression, me conduisent a une extrême faiblesse, et tout cela sans résultat appréciable, tout au contraire, n'ayant jamais été aussi mal.

Je crois qu'il est bon que vous sachiez que j'ai commencé a souffrir de l'insuffisance aortique il y a 9 ans. Un régime alimentaire très strict a, je crois, pu me maintenir a mon travail sans que j'eusse a subir de crises pénibles et longues. Les coronaires étant maintenant en cause, il n'en est plus de même. J'ai 69 ans et ai eu des règles normales jusqu'a l'âge de 58 ans. Ce dernier point rejoignant les effets cliniques de la maladie, vous indiquera-t-il si votre traitement peut enfin être heureusement appliqué a mon cas et lui apporter un arrêt?

Je vous prie de me répondre au plus tôt, et vous assurant

/.....

de ma plus vive reconnaissance,

Je vous prie d'agréer, Messieurs, l'assurance de ma  
considération distinguée.

A. C. Regnault

(Madame A.C. Regnault)

Ci-joint coupons réponse  
pour un affranchissement  
par avion.

5364

Madame A.C. Regnault  
14 Rue Chasteauneuf  
Curepipe - Mauritius

Madame,

J'accuse réception de votre lettre et vous informe que notre traitement pourrait améliorer votre état, ayant des résultats favorables dans l'artériosclérose.

Notre substance H<sub>3</sub> a été récemment produite à une échelle industrielle, sous le nom de "Gérovital-H<sub>3</sub>", par le Ministère de l'Industrie du Pétrole et de la Chimie, sa vente étant réglée par: "Chimimport", 12 strada Doamnei Bucarest. Je regrette de ne pouvoir vous en envoyer une quantité pour votre traitement, notre Institut ne s'occupant que de recherches scientifiques et d'activité clinique et non pas du côté commercial. Le produit ne tardera pas à être mis en vente à l'étranger.

Entretiens, étant donné votre désir de commencer le traitement, vous pouvez utiliser une solution de procaïne, d'après les indications ci-jointes. Il serait recommandable d'utiliser la novocaïne-Höchst (allemande), qui se rapproche de notre produit. La Scurocaïne française n'a pas donné de résultats concluants. Après l'injection, il est nécessaire de garder le repos pendant une demi-heure, afin d'éviter les éventuels phénomènes de vertiges qui pourraient se produire - phénomènes qui ne paraissent pas avec notre produit. Vous pourrez ensuite continuer le traitement au H<sub>3</sub>, lorsqu'il vous sera possible de le procurer.

./.

Veillez me tenir au courant de vos observations pendant le traitement et, si possible, m'envoyer un rapport médical.

Il faudra prévoir six- à huit séries d'injections pendant un an, sans autre interruptions que les dix jours~~es~~ entre chaque série de 12.

Je joins à ma lettre une liste bibliographique qui pourrait servir à votre médecin, au cas où il aurait besoin de connaître des détails concernant nos travaux.

En attendant vos nouvelles, agréez, Madame, mes voeux les meilleurs de bonne santé et mes salutations distinguées.

le 28 février 1959

Madame,

J'ai entendu dire le plus grand bien de votre traitement contre le vieillissement ainsi que les maladies qui en résultent. Je souffre d'artério-sclérose depuis plusieurs années, et suis agée maintenant de 67 ans. Comme je suis malgré tout obligée de mener encore une vie de travail, je cherche par tous les moyens à améliorer mon état de santé. Jusqu'ici, seul un régime alimentaire très sévère m'a quelque peu soulagée, mais le mal est toujours là. Je vous serais donc infiniment reconnaissante de bien vouloir m'indiquer le traitement à suivre et me dire où je peux me procurer votre sérum. Si vous ne pouvez m'écrire en français, j'en comprends parfaitement l'anglais, mais malheureusement pas le roumain.

Je vous adresse ci-joint quatre coupons réponse internationaux qui vous donneront droit à un affranchissement par avion. Afin de ne pas perdre du temps, je vous demande de me répondre par avion et de me dire en même temps ce que je vous dois pour cette consultation. Je vous en ferai parvenir le montant immédiatement par chèque bancaire.

Vous avez, Madame, à l'avance mes plus sincères remerciements.

Madame,

J'accuse bonne réception de votre lettre du 6 janvier 1982 par laquelle vous me demandez des renseignements.

En ce qui concerne votre problème, nous vous informons que ces réactions sont habituelles quelquefois.

Il faut diminuer la dose, de 5 cc à 3 cc.

Si vous ne supportez pas ni 3 cc., à l'âge de 50 ans le traitement est efficace aussi seulement avec tablettes, à raison de 2 par jour. Les médicaments que vous avez acheté sont valables.

Veillez agréer, Madame, mes salutations bien distinguées.

PO B 1004 - BUCAREST

Docteur,

A la suite d'une correspondance avec la Pharmacie Grosclaude de Genève, concernant le Gérovital H 3, celle-ci sur ma demande m'a communiquée votre adresse.

Mon problème Docteur est le suivant :  
Lors d'un passage en France il y a deux ans, j'avais passer commande de 4 boites de Gérovital H 3 par voie intramusculaire. Oubli ou négligence je n'ai pas fait faire ses injections immédiatement, ce n'est qu'il y a quelques mois que j'ai retrouver celles-ci. Aussi ai-je donc décider de passer à l'action. Docteur je souhaiterais votre conseil en ce qui me concerne, car après les injections j'ai une légère réaction : sang à la tête , léger étourdissement etc ... Est-ce une réaction normale ?. Au bout de 20 minutes environ cette réaction disparaît progressivement.

A signaler que la date de péremption sur les boîtes restantes (2) est mentionnée Novembre 82. Et la pharmacie Grosclaude me conseille la continuité du Gérovital mais en comprimés. Je dois aussi vous signaler que le climat ici n'est pas le même qu'en Europe. Nous n'avons que 2 saisons marquées. En ce moment " notre été " il fait très chaud, et notre hiver " austral " qui correspond à un très doux été d'Europe. Ceci au cas ou il y aurait une corrélation climat-médicament ?.

Par ailleurs je vous indique que j'ai 55 ans, ménopause disparue depuis une quinzaine d'années, je crois que ma santé est assez bonne puisque je suis donneur de sang tous les 3 mois, et que je travaille et occupe un emploi à plein temps, en y ajoutant 20 minutes de natation chaque jour (en mer bien sûr) et que mon poids est de 48 kgs. Ceci ce ne sont que quelques renseignements mais afin que vous ayez quelques minces données il est vrai pour établir " un diagnostic ! " et surtout Docteur me dire si je dois continuer les injections restantes ou commander les comprimés à la Pharmacie de Genève ?. Il me reste 24 ampoules de H 3.

Avant de continuer, j'attends votre réponse Docteur, et vous remercie d'avance pour les conseils que vous voudrez bien me donner par lettre.

Je vous prie d'agréer Docteur, mes salutations distinguées.

Madame Lucienne BERNUT

Reacțiile acestea sînt  
obisnuite la unele  
persoane. Trebuie  
diminuată doza, de la  
5 cc la 3 cc.

(Medicamentele sînt  
valabile.)

Dacă nu suportă nici  
3 cc, la vîrsta de 50  
ani tratam. e eficace

Monsieur,

J'ai bien reçu votre lettre par laquelle vous me demandez des renseignements en vue d'une cure et je m'empresse de vous répondre.

Notre produit Gérovital H3 - facteur vitaminiq, eutrophique et régénérateur - exerce une action favorable sur l'état général de l'organisme et sur le système nerveux. Pour une cure complète, vous devez compter sur un séjour d'environ deux semaines, quand on fait tous les examens nécessaires et on commence le traitement, qui sera ensuite continué à domicile.

Jointes les conditions pour nos deux cliniques, celle de l'Institut et celle d'Otopeni, ainsi qu'un dépliant. Veuillez me faire savoir votre choix, afin qu'on puisse faire la réservation à la clinique et à la date désirées.

Agréez, Monsieur, mes salutations distinguées.

Madame la DOCTORELLE A. ASLAN

Ayant eu connaissance de votre produit KH3  
un enthousiasme sans borne me hante depuis ce jour.

J'ai 59 ans . en 1975 j'ai subi 2 opérations  
1 pour LILCERE à l'ESTOMAC il m'en reste 1/4 et l'autre  
pour HERNIE DISCALE L4

CHocs opératoires ou mauvaises conditions physiques et  
morale , je suis resté 4 années ou je n'ai pratiquement  
pas séjur . Impossibilité de travailler , réflexes diminués  
de 80% , peur maladive de tous les bruits insolites , timidité  
complexes d'infiriorité , sans la douceur, la patience et  
la compréhension de ma femme bien aimée , jamais je n'aurais  
eu le courage et la volonté de guerir.

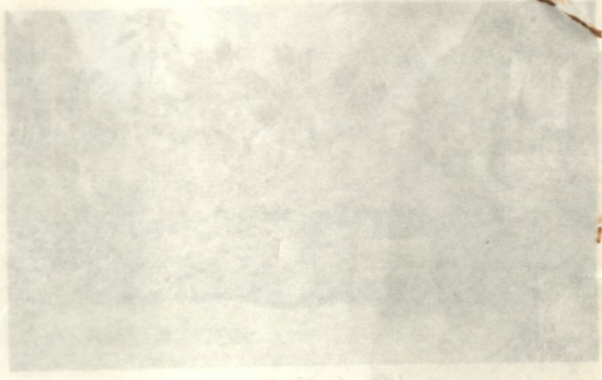

Aujourd'hui je travaille et me sent non en pleine  
forme mais conscient d'avoir retrouvé un esprit sain.

Mais en 4 années j'ai vieilli de 15, perte de cheveux  
de poids de force musculaire et de confiance en l'avenir.

Aussi je vous serais reconnaissant de me donner tous  
les détails sur la cure de votre produit KH3 surtout  
le prix (car n'ayant pas travaillé pendant 4 années je ne suis pas  
riche

NOUMEA le 13 MAI 1980.

Cher Professeur

J'ai lu avec beaucoup d'intérêt, différents articles concernant votre nouveau traitement H-3, à base de novocaïne.

Je souffre de rhumatismes depuis quelques années. J'ai essayé quantité de remèdes, sans résultat.

Je n'ai que 53 ans, et je me sens "vieille" et si fatiguée, que bien souvent je n'ai plus goût à la vie.

J'habite la Nouvelle Calédonie, petite Ile française qui se trouve dans l'Océan Pacifique, à 20.000 Km. de France. C'est vous dire qu'il m'est impossible d'aller vous voir, et je le regrette vivement.

Soyez assez gentille, Professeur, de me dire si vous pouvez m'envoyer le traitement complet H-3, avec le mode d'emploi, et le prix. Traitement que je ferai faire ici par mon médecin traitant.

Dans l'espoir d'avoir une réponse favorable, veuillez agréer cher Professeur, mes salutations distinguées  
V. Gap

Mme Pouillet

Paita le 8 juin 1970  
Noua Calédonie 2613.

Madame la Doctoresse

J'ai lu dans le journal "France Dimanche" du 10 au 16 Mars 1970 un article sur Luis Mariano qui s'est fait rajeunir grâce à votre traitement le Gérorital H3. Cet article parlait aussi d'autres personnes qui s'étaient fait rajeunir par le Gérorital notamment une femme qui a retrouvé ses cheveux lorsqu'elle était complètement chauve. Je vois que votre Gérorital est merveilleux ceux qui le suivent retrouvent leur jeunesse. aussi j'aurais bien voulu me procurer le Gérorital pour mon père qui va avoir 64 ans le 14 Octobre 70 et se sent fatigué, il se fatigue pour un rien et j'aimerais tant le voir en meilleure santé, en pleine forme. Malheureusement et après l'article que j'ai lu dans "France Dimanche" il paraît qu'on ne trouve pas de Gérorital en France mais seulement en Roumanie en Suisse en Belgique en Allemagne Fédérale et en Hollande et comme notre argent n'est pas le même que celui de tous ces pays il m'est impossible de me procurer le Gérorital, j'en suis malheureuse. Pouvez-vous me dire si je puis avoir l'espoir qu'un jour on puisse trouver le Gérorital en France. Je ne peux pas me procurer du Gérorital par le moment mais je vous demanderais de bien vouloir m'envoyer tout de même toute documentation sur votre Gérorital. D'autre

part je ne pense pas que l'on soit  
 obligé de ce faire ce traitement  
 qu'en allant dans votre clinique puisse  
 trouver le Gerontal dans d'autres pays que  
 la Roumanie. Il est vraiment dommage qu'en  
 France le ministère de la Santé publique ne l'ait pas  
 encore homologué, mais j'ai voulu que mon père passe  
 ce traitement. Je vous demandais de bien vouloir me répondre sur votre  
 Gerontal H3 et je vous demandais de bien vouloir me répondre sur votre  
 je ne sais pas par bateau cela met trop longtemps pour arriver  
 à destination. L'adresse que j'ai lu sur le Gerontal  
 est incomplète. Je me met l'adresse comme je peux en me basant sur  
 ce que j'ai pu trouver dans l'article que j'ai lu sur le Gerontal.  
 J'espère que ma lettre vous parviendra bien que l'adresse soit  
 la Doctoresse mes sincères salutations. recevoit Madame

Dear Dr. Aslan,

Through the kind co-operation of the newspaper I have been able to get your address, after reading about the wonderful drug H3, which I am most interest in.

With great pleasures I write you now for supplies of same. I want this drug for my father who has been here 40 odd years, and the tropical heat age people very quickly. Besides that when he was a young man he fell from the rooftop and injured his spines. After reading about the drug H3 I know I must get some for my father which will be a great help to him.

In closing I wish to thank you for the discovery of such a wonder drug that is a great benefit to all people, and trusting to hear from you soon.

Yours faithfully,

ROBERT CHEUNG.

The Director  
PROFESSOR ASLAN' INSTITUTE  
Bucarest  
ROMANIA

5th December, 1988

Dear Sir/Madam,

LETTER OF ENQUIRY FOR ADMISSION TO TREATMENT

I write this letter on behalf of my father. He is 82, in good mental health, having perfect memory and still maintaining his mathematical and chess skills. Recently he suffered a fracture of the femur, a thigh bone, in the area close to the hip. My feeling is that his body is weakening and a possible treatment in your world-wide famous Institute would be beneficial to his health. Could you please let me know the conditions, terms and charges.

For your information, my father is a Pole and lives in Poland. I work on behalf of Polish Government in Papua New Guinea.

Please send me your answer to the address as in the head of the letter. It would be highly appreciated if you could also send a copy of your answer to my Polish address, since I shall be in Poland on my leave in the days 1-20 January 1989. That could greatly help to accelerate the action.

My Polish address is

A/Prof. K. Korzeniowski  
Wierzbowa 42/41  
90-133 LODZ  
POLAND

Thank you for your attention.

Yours sincerely,

Kris Korzeniowski  
Associate Professor

5599/25-XI

Mr. Reg. S. H. Young,  
Papoudessa Law Hill  
Papoudessa  
T of Papua and New Guinea

4 November 25th

Dear Sir,

We have received your letter of the 10th October, accompanied by a cheque for £ 3 - 19 - 8, which we transmitted on the date of November 9th by the State Bank of Rumania, for the account of "CHIMIMPORT", Bucharest, Bld. Republicii 10, the sole exporters of Gerovital H3.

Our Institute is engaged in scientific researches and clinical activity and does not look after the commercial angle.

You can obtain supplies directly from the above-mentioned exporters, who handle all commercial matters. Herewith you find our general informations concerning the price and way of payment.

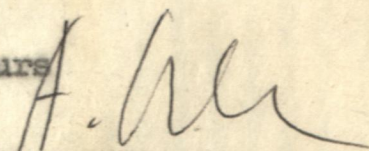

Further we give you the following general informations:

From the brief description of your and your wife's condition we think a long term treatment with Gerovital H3 could have a favourable influence. In similar cases we noticed favourable results in our Institute.

Treatment should be taken under medical guidance, according to the indications given in the box of ampoules and the directions included herein.

We would be willing to give any further information which might be required.

Sincerely Yours

Prof. A. Aslan, M.D.,  
Director, The Bucharest Institute of Geriatrics

Prof. Ana Aslan.

osteoarthritis  
in the knee.

I have written to Olga Franklin of London reference to your Aslan treatment, which she wrote up in her paper, I have received word from her & she has given me the above address & told me to mention her name.

I am enclosing \$5 could you please forward me a parcel of your treatment at your earliest by air mail suitable for my wife & myself.

I am 60 years of age have some ~~Bones~~ Arthritis, had a heart turn 3 years ago (not serious) but become short of breath if I rise up steps or rush generally, I have always been very energetic. I have a wife 48 years & a daughter 9 years I am more worried for ~~her~~ them than myself as I wish to stay on & support them as long as I possibly can, If I could regain some of my vitality I would be very grateful. My wife is always worried about me & this does not help her health.

The 3 of us just live for each other & we sorely need your help

Would you please forward what ever amount of the treatment you can for my wife & I for the amount enclosed :- \$5 Australian, vet p 3-19-8.

My wife suffers from Highaine head aches.

Please treat this as urgent, hoping to receive your earnest consideration

Yours faithfully  
Reg Young.

Moorea - Insula

M. Pierre Gros  
B.P.Nr.2  
Ile de Moorea  
Polynésie Française

Mon cher Ing.Gros,

Je suis très content que notre traitement vous a aidé. Vous pouvez renoncer aux dragées si ils vous donnent des troubles, l'effet des ampoules est le même, si vous remplacez les dragées.

En ce qui concerne les douleurs cervicales, si elles se sont réduites après les infiltrations avec Gérovital H3, elles se diminueront si vous continuez le traitement général ainsi que les infiltrations locales.

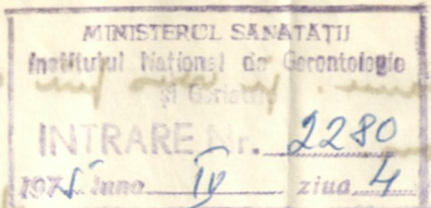

Si vous venez à Bucarest, je crois que sera nécessaire deux semaines. Si vous n'avez pas cet possibilité, continuez encore une année avec des ampoules et repos d'une mois entre les séries.

Le traitement d'amibiase sera continuer après vos indications antérieures.

Espérant nous nous reverons à bientôt, je reste

Votre dévoué,  
Dr.Vascan C.

Pierre GROS  
B.P. n° 2  
Ile de MOOREA

Mourea 27 Mars 1975.

à Monsieur le Médecin VASCAN  
Bucarest.

Vous m'avez reçu, en gériatrie, d'an  
dernier du 10 au 15 Octobre, à l'hôtel PARC de  
Bucarest. Je souffrais d'amibiase intestinale et d'arthrose  
cervicale. C'est d'ailleurs pour cette dernière raison que  
je m'étais rendu à Bucarest.

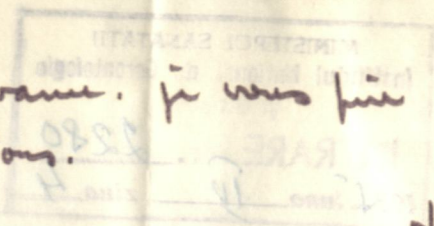

Je continue mon traitement au gervital  
selon les modalités que vous m'avez fixées. Alors que  
le traitement sous forme de piqués i.M ne me dérange  
absolument pas, le traitement sous forme de comprimés  
me fatigue. Je dois vous dire que je continue également  
mon traitement anti-amibien : Hexafome - bismuth.  
Entobex.

Je rentre en France en Mai pour suivre  
une cure d'eau thermale. Le traitement au gervital  
m'a beaucoup atténué les troubles que me donnait  
l'arthrose, mais néanmoins j'ai eu encore et ai  
encore des étourdissements surtout par temps humide.  
Penny - vous que des infiltrations ~~me~~ faites à  
Bucarest, sous votre contrôle, enrayeraient définitivement  
ces troubles? Si oui je pourrais me rendre une  
semaine à Bucarest après ma cure thermale  
pour l'amibiase, car je ne dispose que de peu de temps  
pour ce congé en Europe.

Dans l'attente de vos lies et en vous

1947

remerciant à l'avance. je vous prie d'agréer mes  
meilleures salutations.

Madame,

J'ai reçu il y a quelques jours votre lettre du 26 Septembre écoulé et vous remercie vivement de vos conseils.

J'ai contacté mon pharmacien habituel et lui ai donné communication de votre lettre. Il s'agit de Monsieur A. JUVIN, Pharmacie Place Notre-dame à Papeete. Ce Monsieur est très intéressé par le GEROVITAL H3 et a demandé l'autorisation d'achat de piqûres et de dragées. Il espère aboutir et je pense qu'il s'adressera directement à vous pour ces fournitures.

Il me sera alors plus aisé de m'approvisionner sur place. Je pense, au début, éviter les piqûres intra-musculaires étant toujours sous anti-coagulant, quitte à entreprendre par la suite une série lorsque je serai dégagé de ce traitement.

Je vous prie d'agréer, Madame, l'expression de mes sentiments les meilleurs.

Yvon LAURENT

Monsieur,

J'ai bien reçu votre lettre par laquelle vous me demandez des renseignements et je m'empresse de vous répondre.

Ne pouvant pas vous envoyer le médicament, je suis d'avis que vous devriez vous adresser à une des sociétés inscrites sur la liste jointe, afin de commander ou acheter le Gérovital H3.

Agréez, Monsieur, mes salutations distinguées.

Messieurs,

J'ai fait une cure de " GEROVITAL " à votre Institut en 1975 et grace aux ampoules que j'avais emportées, j'ai pu faire une série de piqure chaque année depuis 1975.

Je désire recevoir 24 ampoules de Gérovital afin de continuer le traitement cette année et l'an prochain.

Pourriez-vous expédier PAR AVION , sous fort emballage, ces 24 ampoules à :

Monsieur le Docteur Philippe LEPROUX.

Dear Professor Anna Aslan,

After sending my last letter to you saying the H3 had not arrived, it did arrive two days later. I am very happy to receive it.

There was no allergic reaction at all, so I am now starting on my first series of injections.

As it takes so long to arrive here I am sending for the rest of the medicine H3 to complete my treatment.

I have received 3 series, and would now like 5 more series of L2 injections posted to the above address.

I am posting 32 dollars to the State Bank, and hope that will be quite sufficient to cover cost and postage.

Thank you so much for your help. and hoping to receive the rest soon.

Yours faithfully.

Evelyn R Christian.

Dear Madam,

Answering your letter of 26.VI.963., I inform you that a parcel of 36 ampoules of Gerovital H3 has been sent to you by CHIMIMPORT on the 14<sup>th</sup> of March.963 by surface mail (nr.5335).

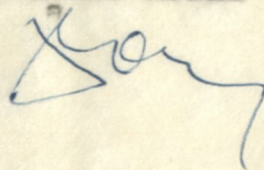

Chimimport has advised you of this sending with the letter dated from 28.III.963.

In case the parcel has not yet been delivered, please send a claim letter to CHIMIMPORT, who will make the necessary inquires.

With best regards,

Yours sincerely,

Prof.Dr. Anna Aslan

Bucharest.

Dear Madam,

I received your letter dated April 16,  
Saying that the ampules of medicine that I ordered  
was posted. I have waited until now for them to arrive  
but so far nothing has come yet. I did hope to send a  
larger order when I received this lot, and was sure there  
was no reaction from them.

I am glad you received the nineteen dollars safely,  
I will wait a little longer to see if it does come.  
Perhaps it would not be safe to send a larger order, if  
the goods do not arrive.

You asked me to let you know when I received it, that  
it why I am writing this.

I do hope it turns up yet, as I feel it will do me  
good.

Thanking you, if you will check your end to make  
sure it was posted.

Yours faithfully

(Mrs) Evelyn R Christian.

Mrs. Evelyn R. Christian  
Private Bag  
Pitcairn Island  
S. Pacific Ocean

Dear Mrs. Christian,

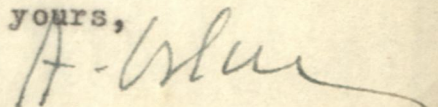

Thank you for your letter. In answer to your request I consider that a treatment with Gerovital H3 could have a favourable influence upon your condition.

It should be administered according to the enclosed directions, at the rate of 6 to 8 series of injections in one year.

The Rumanian exporters "Chimimport", 10 Bulevardul Republicii, Bucharest, informed us that the cost for 24 ampoules of Gerovital amounts to US \$ 10.- to which \$ 9.- should be added for airmail postage fees for a parcel up to 1 kg. The money order should be addressed directly to the State Bank of the Rumanian People's Republic, to the account of "Chimimport", with the mention: "for Gerovital H3 supplies" and your address.

I shall remain at your disposal for any requested medical advice during the treatment.

Sincerely yours,

Professor Anna Aslan, M.D.  
Director, The "Bucharest" Institute of  
Geriatrics

Professor Aslan,  
Institutul de Geriatrie  
Bucharest. Romania.

Dear Madam,

I have just been reading about your wonderful drug H.3. in the New Zealand Womens Weekly. You seem so friendly, and so willing to help any one, that I feel I can take this liberty in writing to you.

You say that H.3. is a wonderful help in Rhumatism I have had it in my knees for over 25 years now, and it often makes its self felt in other joints also.

I am a trained nurse, and came here as the government medical officer in 1944. I am now retired here and married, and another nurse is in charge of the medical work here.

I am 68 years old and very anxious to get some help for my rhumatism.

We have no Dr. here, and have to depend on passing ships Drs. if we need them. Our nearest ports are Panama one way and New Zealand the other side.

Could it be possible for you to post to me a course of H.3. and I or the nurse here could give the injections. I have no heart trouble or high blood pressure.

We are not very rich here, but I will gladly pay you for the drug if it is not too expensive. I could pay in English notes, or have a bank draft sent you from the New South Wales Bank in New Zealand, what ever is convenient for you.

Thanking you and hoping to hear from you soon

Yours faithfully,

*Evelyn R Christian*

Dear Dr. Ana Aslan,

I take this opportunity to introduce myself as Mr. Mohd Ahmed Hegazi, aged 50 years and an Egyptian Nationality.

The very purpose of writing this letter is to have an appointment with you for a complete check-up especially for Geriatric Treatment.

I shall be highly obliged if you can advise me as the costs for the treatments with accommodation and the duration of the treatment.

I intend to arrive at Bucharest on 23rd June 1981 and also request you to please let me know whether an entry visa is needed before my arrival or please confirm of your approval of treatment to obtain visa.

Looking forward your earliest reply in the matter.

Thanking you,

Yours faithfully,

Mohd Ahmed Hegazi.

Dear Sirs,

Kindly be informed that the undersigned and my wife intend to get ourselves physically checked and treated in Otopeni Clinic of Geriatrics on Sunday 28/11/82.

As I had been hospitalized in above clinic in Dec. 77, I therefore request you kindly confirm as early as possible your acceptance of the above appointment to arrange for our flight reservations and entry visas.

An early reply in the matter shall be highly appreciated.

Thanking you,

Mond. Farid Agle

QATAR (ARABIAN GULF)

Dear Mr. and Mrs. Zorob,

I received your letter and I inform you that I am well as you know. I am glad to hear that you both feel well and have no pains.

As regards your friend, I let you know that it is better for him to come to us too, for treatment, after October, whenever he wishes. Till then I am not in the Institute, being in a longer holidays. As regards his departure to Felix, he cannot do it before the two weeks of treatment in Bucharest necessary to establish the diagnosis. According to his disease we shall see if he has or has no indications for Felix spa for his rheumatism.

Before your departure, please send us a telegram, in order to make a reservation in the hospital.

Till then I remain with my kindest regards and every good wish,

Yours sincerely,

Rodica Pepenel, M.D.

(Beautiful Arabic)*

*Vor sa revina  
cu noi prieten*

5th March, 1981

Dear Dr. Pepenel

How are you getting along with your work. We hope you, keeping well and in good health.

Now I am writing to you to inform you that I have a friend of mine, his name is Bashi Mohammed Rida Qassabi - ~~XXXXXX~~/Iranian

The above man is complaining from pain in His knees, and Vertebra. I believe he has rhomatism. He wants to know if you will be able to treat him. I said to him yes, you can do treatment. But about his Vertebra, I do not know if you do treatment as they do in Felix hospital.

Please advise me the situation as we may come to you say after three months. Is that Okay ????. and if he needs Visa ?

I am with my wife still taking treatment of which you gave us and no pain in my feet, my wife is same, no pain.

Please give my regards to your assistant, Selvia and all the Beautiful nerses around you. Please inform me if you need something special from here.

Thanking you, and looking forward to seeing you again.

With best regards from my Wife and me.

Yours sincerely

George Zorob

INTERNARI

November 20th,

81

MEDICAL REPORT

Mr. Bashi Muhammad Riza Kassadi, aged 51, of Qatar, was hospitalized in the Clinic of National Institute of Gerontology and Geriatrics from November 4th to 21st, 1981.

On hospitalization, the patient complains of lumbo-sacral pains with radicular irradiation predominantly on the right leg; coxalgias, gonalgias marked by certain positions.

Four and a half years ago he presented a painful lumbar onset with medular compression; it required an urgent intervention and the lipiodol injection. Mrs. Kassadi underwent multiple anti-rheumatic and physiotherapeutic treatments with temporary improvements.

From his antecedents it cannot be specified anything, excepting the lambliasis recently noticed and which is treated with Fasigyn, then Nectronidapol. It appeared negative at duodenal examination.

Clinical examination reveals a patient with a height = 175 cm a weight = 75 kg, with difficult gait with contraction of lumbar paravertebral musculature, dextroconcave scoliosis and Valleix points sensible bilateral.

The patient presents pains both spontaneous and at the elbow's joints mobilization, stiffness of the fingers in the morning, moderate limitation of coxo-femoral adduction, crepitation at knees' level. Anterior flexion of lumbar column is of 20° at hospitalization and of 60° on departure. The coxo-femoral mobility is much improved as well as that of the knees.

Respiratory apparatus: On hospitalization, Mr. Kassadi presents daily cough on a background of chronic tabacism and pulmonary a diffuse hyperpersonority. The cough disappears when the patient stops smoking.

Cardio-vascular apparatus: Blood pressure is maintained within normal limits: 130-140/80 mmHg and AV is regular, well beaten cardiac sounds.

Digestive apparatus: gaseous dyspepsia, sometimes pyrosis after meals, with abdominal meteorism, sensible colic frame.

./.

Clinically, the patient presents moderate hepatomegaly, smooth liver, round anterior border, without splenomegaly. The hepato-splenic scintigraphy confirms the existence of a chronic hepatopathy probable on the ~~an~~ dysmetabolic background (fat overcharge) and toxic background (ethanolic ingestion). No sign of hypersplenism.

Gerontoxon +++

Neuropsychical examination: marked decrease of Achilles tendon-reflex. Positive bilat. sciatic extending. Sciatic hypoesthesia of right external popliteus.

After Gerovital H3 treatment, the improvement of radicular and painful articular syndrome was evident as well as of general condition.

Recommendations of treatment:

- GEROVITAL H3 - 3 injections/week, for 4 weeks.

Rest interval of 7 days after which:

- ASLAVITAL - 2 tablets/day, for 12 days.

Rest interval of 7 days and the above schedule is resumed.

Associated medication:

- Caterogen 2 capsules/day.

- Metodopamide 2 capsules/day.

It is advisable to come back for a medical control and a new course of treatment after 6 months.

To avoid a prolonged orthostatism, cold and damp weather.

Physical repos of 12 hours daily.

Acad.Prof. Ana Aslan, M.D., D.Sc.

General Director

National Institute of Gerontology  
and Geriatrics

RAPORT MEDICAL

Domnul Bashi Muhammad Riza Kassadi de 51 ani din Qatar a fost internat în Clinica de Geriatrie în perioada 4-21 noiembrie 1981.

La internare pacientul acuză dureri lombosacrate cu iradiere radiculară dominant pe membrul inferior drept, coxalgii, gonalgii accentuate de anumite posturi.

În urmă cu 4 1/2 ani a prezentat un puseu dureros lombar acut cu compresie medulară; necesită intervenția de urgență precipitată și de injectarea lipidelor. A fost supus unor tratamente multiple antireumatice și fizioterapice cu ameliorări temporare.

Din antecedentele sale personale nu se poate preciza, decât lambliaza evidențiată recent și în tratament cu Fasigyn apoi Nectrenidapol și negativată la examenul duodenal.

Examenul clinic indică un pacient de I- 175 cm, greutate 75 kg, cu mers dificil cu contractura musculaturii paravertebrale lombară, scolioză dextroconcavă și puncte vallux bilateral sensibile.

Pacientul prezintă dureri atât spontane cât și la mobilizarea articulațiilor cotului, redoare matinală digitală limitarea moderată a adducției coxofemorale, crepitații la nivelul genunchilor. Flexia anterioară a coloanei lombare este de 20° la debutul internării și de 60° la externare. Mobilitatea coxofemurală se ameliorează mult ca și a genunchilor.

Aparatul respirator

La internare prezintă tuse zilnic pe fondul tabagismului cronic iar pulmonar hipersonoritate difuză. Dispneea tusea la oprirea fumatului.

Aparatul cardio-vascular

Tensiunea arterială se menține în limite normale 130-140/80 mmHg iar AV este regulată, zgonote cardiace bine

## RAPORT MEDICAL (sumare)

bătute.

### Aparatul digestiv

Dispepsie gazoasă, uneori pirozis postprandial, cu meteorism abdominal, cadru colic sensibil.

Clinic prezintă hepatomegalie moderată, ficat neted, marginea anterioară rotundă, fără splenomegalie.

Scintigrafia hepato-splenică confirmă existența unei hepatopatii cronice probabil pe fondul atît dismetabolic (încărcare grasă) cît și toxic (consum etanolic). Nu are semn de hiperep splinism.

Gerontoxon +++

### Examen neuropsihic

Seăderea marcată a reflexului ahilian. Elongare sciatică pozitiv bilateral. Hipoestezi sciatic popliteu exterior drept.

După tratamentul cu Gerovital H3 ameliorarea sindromului radicular și dureros articular a fost net vizibilă ca și a stării generale.

### Recomandări de tratament

Gerovital H3 - 3 fiole pe săptămîină timp de 4 săptămîin

Pauză 7 zile apoi Aslavital 2 tablete pe zi 12 zile.

Pauză 7 zile și reia tratamentul.

### Medicație asociată

Caterogen 2 capsule pe zi .

Metodopramidă 2 capsule pe zi

Va reveni la control și o nouă serie de tratament peste 6 luni.

Va evita ortostațiunea prelungită, frigul, umezeala.

Va păstra repaus fizic 12 ore zilnic.

Mr.

Azzam Mohammed  
Office Manager for Minister of L.S.A.  
Minister's Office  
State of Qatar  
D o h a POB 201  
=====

Dear Mr. Azzam,

I am sorry indeed that my reply of your kind letter of the 6th loth came no earlier as I was not in Bucharest.

Concerning the treatment with Aslavital, it seems me very strange that after the effected tests appeared although an allergic ~~reaction~~ reaction, because as I know during your sejour in Bucharest after the tests you showed a good tolerance to Aslavital. Although obviously I do not contest the remarks of your doctor and as the matter is not exactly clear, I would suggest you to repeat the first test with Aslavital and if the reaction is again allergic, please, continue with Gerovital as per the schedule indicated for the Aslavital.

Unfortunately the medicine can be sent only within the enterprise I.M.E.C.O., Str. Pitar Moş Nr.6, Bucharest, where, please be so kind to write. Or perhaps if some one of you will cam to Bucharest or to the Embassy, I will give him with great pleasure the prescription for purchasing the medicine to reach you then in Quatar.

Concerning the pills, these so too are to be tested, and I am sure that they will be well tolerated. It exists even the possibility to effect the treatment only with pills, if they are well tolerated, each month during 12 days, 2 pills each day.

For making Bourget more efficient, you may increase the quantity of Natrium Sulphat as f.i. for each cachet :  
Natriumsulphat 6 g  
Bicarbonat

Dr. Corneliu David,  
Institutul De Geriatrie,  
Str. Minastirea Caldarusani, 9-Sector 8,  
Casuta Postala 1004,  
BUKHAREST,  
ROMANIA.

Dear Dr. David,

I hope you still remember me. My name is Azzam Mohammed of Qatar and had undergone medical examination at Institutul De Geriatrie during August 1974 under your supervision together with H.E. Mr. Ali Al-Ansari, Minister of Labour & Social Affairs in Qatar, while we were attending the World Population Conference .

In your Medical Report you have prescribed to me Aslavital ampoules and Aslavital pills to be taken according to a special schedule. In my country I tried to start the treatment and have taken 1 ml of Aslavital injection under the skin as a test for sensitivity, and a reaction appeared after 15 minutes showing a red spot in my arm; and the local Doctor advised me not to take the Aslavital ampoules.

Now, I shall be grateful if you would advise me about this case. Shall I take the Aslavital ampoules in spite of this reaction? or you would kindly prescribe to me another kind of ampoules. In this concern I shall be grateful if you would send me the alternative ampoules by post and I shall send you the cost and expenses in this respect.

At the same time, I want you to advise me if I can take the Aslavital pills or not. If I can take the pills how should I take them and according to which schedule.

Regarding the associated medication you have prescribed to me, I have taken Hidergine 15 drops 2 times a day for 3 weeks and I shall repeat this 4-5 times a year. I have also taken Bourget solution as you have advised me, but it did not show any effect or progress, and I am still suffering from constipation and have to take other laxatives like milk of Magnesia every other day ?

I am waiting to hear from you giving me your advise regarding my case which I have clearly pointed out. H.E. Ali Al-Ansari, Minister of Labour & social Affairs, and our colleague

Office Manager for Minister Of L.&S.A.

~~Amrati Azzam~~

Dear Minister Azzam

Regret ca raspundul meu sarac ca raspundere, dar am scris  
fost posibil mai din vreme deoarece am legat de Bucuresti  
In ceea ce priveste tratamentul in Aslantul, nu se pare curios  
ca dupa test a aparut o reactie alergica locala, deoarece dupa alti  
inii amintesc in timpul sejurului dr. la Bucuresti s-a facut testul  
care a aratat o buna toleranta. Totusi nu contest observatia medicala  
curant, dar deoarece exista nedumerire s-ar putea rejeta testul  
la Aslantul si daca reactia se rejeta sa faceti generatia dupa  
ocheana indicata la Aslantul. Medicamentul insa nu poate fi  
trimis decat de JMECO. Str. Pitesti Mos 6 Bucuresti, I.  
Cineva trebuie scris, s-au dat o copie din partea dr. la  
Bucuresti sau o Ambasada, sa mare placere la o cura reteta, pe  
baza caruia se poate compara medicamentul si tombs apar  
in Qatar. In ceea ce priveste dragevile acestor si asنعنا  
trebuie incercate si au convingere ca va fi bine tolerata

Exista chimie puzulitate de a lua numai dozele  
daca sunt bune foloate, in fiecare luna timp de

The General Director,  
National Institute of Gerontology and Geriatrics.

Dear Doctor Ana Aslam,

This is to bring in your kind attention that I have sent to our friends the name and address for the companies where you have mentioned in your letter that I would be able to get in these countries my medicine and injections.

I am sorry to say that I could not get in ITALY, SPAIN, GREECE and nor in England.

Please advice how can I obtain from your institute and in which currency I shall send the draft of the cost for the ten packet of injections.

I hope you will help me in this regard and oblige.

Thanking you,

Yours faithfully

Mohd Bin Nasser Fakhroo

Dear Mr. Fakhroo,

We received your letter and are glad to hear that you feel better after the treatment. You should continue it according to the indications received when you were in Romania in order to maintain the good results obtained.

As regards the medicine necessary for the continuation of your treatment, you may order them to one of our representatives on the enclosed list.

We would appreciate to receive further news from you.

Yours sincerely,

Acad.Prof. Ana Aslan, M.D., D.Sc.  
General Director  
National Institute of Gerontology  
and Geriatrics

Dear sir,

I received your card and thanks for it, and also my hearty thanks for your medical treatment when I was in Romania.

Now I am feeling better and I am following your Medical treatment. I will appreciate for you because I had a chance to follow your treatment.

I wish to inform you that, if you have possible to send me the medicine which you instruct to me for injections and Tablets. I will pay all the expenses. If you need anything from Doha, It is my pleasure to send it for you.

Convey my regards to all the Staff and Doctors.

Awaiting your early reply.

Thanking you,

Dear Mrs. Hasan,

I received your letter and I apologize for the delay in my answer, because of my longer absence from the country.

Your son may try to undergo the treatment, but as it is a very serious case only slight improvements can be obtained. The medicine can be ordered directly to one of our representatives on the enclosed list.

I would appreciate to receive further news from you.

Yours sincerely,

Acad.Prof.Ana Aslan, M.D., D.Sc.

Dear Dr.

It never struck my mind to write a letter to the world-wide famous Dr. Anna Aslan, until last week when I was watching and listening to a speech delivered on the T.V. by Mrs. Sakina Sadat about an effective medicine prepared by you for curing handicapped children. When I got in touch with Mrs. Sadat for more details, she encouraged me to write you a letter seeking your advice for solving my problem. I'm all hope, therefore, that my problem will be given just very little of your attention.

*7acale incerca  
tratamentul, dar fiind  
un caz foarte grav  
se vor aloca din  
medii anuale*

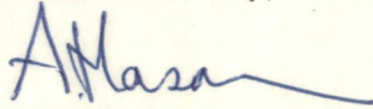

My son, who is now 12 years old, was born normal and healthy. When he was one year old he fell sick and had high fever. He was given a wrong injection the result of which is the case that I'm putting before you for help. It is the case of a mentally and bodily handicapped child.

Several times I carried him to London for treatment, but with no progress. That was the view of the doctors who saw and examined him. But, as a mother who is very anxious to see her son's case improve, I can assure you that there has been a slight progress in his movement and common sense since more than a year. In the past he couldn't distinguish between one person and another. Now he shows liking to certain members of the family and dislike to others. In the past he couldn't stand at all. Now with the help of his hands clasping anything solid, he can stand on one leg. Recently some friends recommended an Austrian Physician in Vienna who treats cases similar to my son's. I sent him copies of medical reports for advice. I am prepared to go to the end of the world to cure my son. I am in a position just like that of a drowning person who may catch a straw for safety. May I take the liberty then, to send you copies of medical reports about my son seeking your unvaluable advice and help.

Should you suggest to see and examine the child, I shall carry him to you immediately.

Hoping or rather begging, to hear from you anything, I am,

Yours sincerely,

(AISHA HASAN)

P.O. Box 516,

Report On

Khaled Ahmed Kazam, aet 11 years

I saw this child again on the 17th January, 1977.  
See previous reports dated 12.7.67., 6.4.71. and 22.3.74.

History:

The child is now aged eleven years. The mother says that since he was last seen nearly three years ago he has had no fits, but she does not think he has improved. He does not speak or understand what is said to him. He is still incontinent and cannot feed himself.

On Examination:

There was no real change in his condition except that he was able to sit up unsupported and moved about sitting on his bottom. His general condition remained good. He was not unduly restless. Circumference of the head was 50 cm.

In the cranial nerves no abnormality was discovered.

In the limbs there was spastic weakness of both left limbs with flexion contractures at the left wrist and elbow and left knee and ankle.

The tendon jerks were increased on the left side.

The plantar response on the left side was extensor but was flexor on the right.

Attempts were made to help him walk and, supported by two people, he stood on his right foot but made little or no attempt to support himself on the left.

Opinion:

I am afraid that this child still has evidence of very severe brain damage and I am sorry that during the last three years he has made very little progress. The prognosis for worthwhile improvement is very bad now and I do not see any point in submitting him to any orthopaedic operations in order to overcome the contractures of the left ankle and knee.

Our Ref. EMB/MWN/79414.

01-643-3300

3rd May, 1971.

TO WHOM IT MAY CONCERN.

Khaled Kassem, aged 5 years.

I saw this boy as an Out-patient on the 9th April with a history of normal development until the age of eight months when, following a febrile illness, he developed a left hemiplegia with retardation and fits.

His fits occur between three and ten times per day without any free days and do not occur at night. They are apparently always bilateral and vary in duration from a few seconds to about three minutes. Previously he used to convulse in the attacks but this does not now occur and instead he simply falls to the ground in any direction and is unconscious for a short time.

The fit frequency is at present rather more than before but they are less severe than they used to be.

He has very little constructive play activity.

On examination he was a severely subnormal boy with a head circumference of 18 $\frac{3}{4}$ " and a left hemiplegia worse in the arm than the leg with contractures in the left arm and inability to extend the elbow. The left limbs are smaller than the right and the left foot colder than the right. He has bilateral increase in the knee jerks.

He was admitted to Queen Mary's Hospital, Carshalton under my care for investigation, although it seemed unlikely that any useful diagnostic information would be gained or that the situation would be materially altered.

The following investigations were done:

Skull X-rays: no significant abnormality.

Haemoglobin: 92%, WBC 8,200 per cu.mm. with normal differential.

Fasting blood sugar: 58 mg/100 ml.

Serum calcium: 9.7 mg/100ml.

Chromatography of aminoacids (Scriver test): no abnormality detected.

E.E.G.: This record shows a severe generalised abnormality with a marked asymmetry between the activities of the two hemispheres and very frequent paroxysmal features. There has probably been considerable loss of cellular tissue over the middle third of the right hemisphere. These features appear to be similar noted in the E.E.G. taken at St. Bartholomews Hospital but I am hoping to be able to see the actual record taken there for comparison. The changes seen are probably of some long standing.

Dear Mr. Nahla,

I have received your letter of October 21st.

The treatment we are recommending for hair loss is Gerovital H3 injections (5-6 courses of 12 ampoules each course). Directions for administration of treatment enclosed herewith. The intermissions between each course are of two weeks.

In the near future a hair lotion with Gerovital H3 will be on market in Romania in a couple of months.

Enclosed herewith the addresses of representatives in Europe where you can find the drug.

Yours sincerely,

Via P.O.Umm Said,  
(Qatar) - Persian Gulf

Dear Sir :

I have received your letter, and in answer to your request I am sending you the necessary directions for the novocain treatment, which could improve your aunt's condition. The treatment should be undertaken under medical guidance.

A 2 percent solution of novocain (procain) can be used as a satisfactory substitute of our substance H<sub>3</sub>, which is not yet on the market, being still exclusively used by the Institute of Geriatrics of Bucharest, for its inmates and out-door patients.

Kindly send me a full medical report and keep me informed with your physician's observations after the first two series of injections. Should your physician wish to receive information about our researches, he can write us directly and we shall willingly send him reprints.

With very best regards,

Sincerely yours,

Prof. Dr. Anna Aslan  
Director of the "C.I. Parhon" Institute  
of Geriatrics

K.M. NAIR

c/o P.D (Te) Ltd,  
EL HAMRA,  
Via P.O. UMM SAID,  
COATAR)  
PERSIAN GULF,

Dear Prof. Ama Aslam,

13th. February '58.

I am so happy & much relieved to hear about your new  
life giver 'H-3', which rejuvenates & prolongs life.

My Aunt who is blind from childhood is an invalid  
& aged 70. Without someone's help she couldn't even  
get up from her bed & sit. She is suffering from Arthama  
& ~~Arth~~ Rheumatism. There is no one to look after her well  
except a distant relative. She is terribly weak due to  
malnutrition. When I heard about your successful  
discovery of 'H-3' the special novocaine injection, I  
wrote to her who is about 5000 miles away in my home  
in south India, she agreed to take these injections  
to get better rather than suffering like this, confinement  
to her bed only.

Can you help us & let me know the full details of your  
'H-3', whether it can be administered on those  
suffering from diabetes, blood pressure or any age  
limit etc. In my home town in Kerala State some who  
have reached 60 yrs. are very weak & couldn't look  
after themselves; most of them are poor.

We are neither rich nor poor to afford for a costly  
treatment, but certainly I am willing to spend  
what ever I earn & will even borrow some money if  
necessary, so that my dear Aunt may live happily

for some more years. I shall be able to arrange  
payment to you by way of a cheque in one of the  
British Banks in England & rather difficult to  
arrange payment in your local currency. If you  
are agreeable for payment in British currency,  
Please send me the required 'H-3' for my Aunt's  
complete care by return Parcel Post with full  
instructions of dosage, administration etc.  
My aunt & myself should be so much grateful  
to you, if you would help us, taking into  
consideration that she is not only blind & very  
weak, but no loving one near her to look after  
her. As I ~~am~~ have to earn my living & send her  
some money to look after her, I couldn't stay  
with her. Here I live more or less a lonely life  
in this Arabian desert.

Trust you will help us what ever you can  
& thanking you.

With all best wishes,

Yours sincerely,

K. M. Nair

Manager  
QATAR TOURS  
Volkswagon Building  
P.O.Box 1683  
Doha,  
QATAR

Dear Mr. Ofeish,

In answer to your letter concerning a three and a half year old Qatari boy, I have to inform you that for the moment we do not have proper conditions of hospitalization for children with spastic state. We had some similar cases, but the children came with their family only for medical examination and indications of treatment, staying in a hotel.

From this reason I think that the child could be helped, without promising to his parents that he can be cured.

We recommend a treatment with Aslavital for children as follows: 2 pills daily (1 pill taken after breakfast and 1 pill after lunch), on the first, the third and the fifth days of the week, in 24 days. Rest interval of 10 days after which the treatment may be resumed.

Yours sincerely,

## CHILDREN'S REHABILITATION UNIT

Medical Report On : Salem Mohammed Said Al Hajiri  
Date of Birth : December 18, 1980  
Sex : Male  
Nationality : Qatari  
H.G.H. File Number : 014959  
Date of Examination : May 8, 1984  
Report Dictated On : May 8, 1984  
Date of Typing this Report : May 9, 1984

This three and a half year old Qatari boy suffers from cerebral palsy (Spastic Diplegia), of moderate degree and from developmental delay of moderate to severe degree. He was also "small for dates" at birth and has remained small in size and weight. He had recurrent respiratory infections for the first two years of life with multiple hospital admissions and treatment. He is the elder of two children of Qatari parents who are not related and he has a normal eighteen month old sister.

His past history shows slow milestones of development - he sat at one year, crawled at two years, stood at four and has been walking "holding-on" for the past four months. He has a history of seizures treated on Phenobarbital. He was initially hypotonic, but has developed an increasing spasticity of the lower limbs and a "scissors gait". He still is not toilet trained, has only a few words of speech and has restricted social and emotional development. His comprehension is fair, he can follow a two part command and attempts to help in self feeding and dressing. He dribbles constantly. His hearing and vision are normal. He has a short attention span and limited concentration.

Children's Rehabilitation Unit  
Salem Mohammed Said Al Hajiri  
May 9, 1984  
Page 2

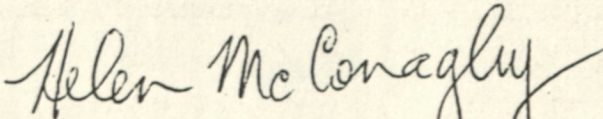

He has had extensive specialist medical investigation and attention at Hamad Hospital and overseas. He was referred to London in 1981 and was seen by two Consultant Pediatricians, a Physiotherapist and a Psychologist. He has attended the General Pediatric Outpatient, the Dentist and the Ophthalmologist. He has had regular physiotherapy at Hamad and the Children's Rehabilitation Unit Outpatients at Rumailah over the past two years. He has been seen and assessed and prescribed walking-aids and special boots. Occupational therapy assessment indicates moderate developmental delay and a program has been started for him. He has made slow but steady progress overall. His family have had difficulty in accepting the fact of his slowness in development and have expressed dissatisfaction with his rate of progress and the amount and quality of therapy given. His father now intends to take him overseas, perhaps to Vienna, during the summer for further advice and help.

Summary:

This three and a half year old boy has moderate cerebral palsy with Spastic Diplegia, increased reflexes in the lower limbs and a scissors gait. He is moderately to severely delayed in development and will probably be mildly to moderately mentally retarded. Many children with Cerebral Diplegia initially present well but the majority have intellectual defect and learning difficulties by school age. I.Q. Assessment has been attempted, but results are not valid under the age of five. Salim is likely to require special schooling.

In my opinion, his treatment and management in Doha has been adequate and a recommendation for overseas treatment is not justified. A continuing program can be offered to him here, but work with the family will be necessary for them to accept this.

Dr. Gotting  
Cancer Medical Department  
12 Collyer Place  
London, E.C.

Dear Dr. Gotting,

Salim Al Hajeri C.o.B. 18.12.50  
Letter No. 211071

Thank you for letting me see this 11 month old child who was born  
in the Women's Hospital at Ibra, a full term normal delivery but  
weighing 2.5 lbs. only at birth. He is the first child of two unrelated  
parents, or who are not at least direct cousins. A few days after birth  
he developed an infection and a pneumonia in the right lung. Since then

he has been in hospital for more than 12 weeks at  
account of respiratory symptoms. However,  
much better high fever for the past few weeks.  
His development has been within normal limits although he  
to be hypotonic until two months ago. Your report  
He seems to be pulling to sit on his own at 11 months  
and at 7 months he was able to sit up with support and he holds  
well, can hold his head up and has several words in his repertory  
and walking normally. He has a normal

reports from the hospital for more than 12 weeks at  
the present time.

weight 7.5 lbs. and so it is likely that the  
is 7.5 lbs. at the third birthday. The  
is 12 lbs. in the normal range for his age.  
The child is well and has several words in his repertory  
and walking normally. He has a normal

I am not entirely happy about his development and I am asking  
the Senior Clinical Psychologist, Mrs. J. R. Lohrman, to see him with  
a view to more detailed developmental assessment. I am also asking  
Dr. David Grant to see him for advice on his growth. I have also  
arranged for a chest X-ray to be done and also a milk scan because  
of the possibility that he might have a tracheo-oesophageal fistula  
or other respiratory symptoms.

12 November 1981

Dr. Gotting  
Qatar Medical Department  
30 Collingham Gardens  
London SW5

Yours sincerely,

Dear Dr. Gotting,

Salim Al Hajeri d.o.b. 18.12.80  
Qatar No. 8110071A

Thank you for letting me see this 11 month old child who was born  
in the Women's Hospital at Doha, a full term normal delivery but  
weighing 2.5 gms. only at birth. He is the first child of two unrelated  
parents, or who are not at least direct cousins. A few days after birth  
he developed an infection and a pneumonia in the right lung. Since then  
he has never been out of hospital for more than two or three weeks at a  
time on account of cough and respiratory symptoms. He has, however,  
been very much better and cough-free for the past three or four weeks  
in London. His development has been within normal limits although he  
was noted to be hypotonic and until two months ago had very poor head  
control. He seems to have smiled at about 2 months, rolled over at 8  
months and at 11 months is not pulling to sit or to stand but he holds  
objects well, can hold his bottle and has several words. He responds  
to visual and auditory stimuli normally. He does not yet use a spoon.

As regards feeds, he still refuses normal sieved foods and will  
take only the prepared baby food.

On examination he weighed 7.2kg. and so is below the third centile  
for weight, is 70cm. in length on the third centile and the skull cir-  
cumference is 43cm. which is in the normal range for his size. Fontan-  
elles, however, are closed.

There were a few coarse sounds and rhonch $\ddot{u}$  in the right lung but  
no other abnormality. I noted that the ears are prominent and the  
right is the shell type of ear. Muscle tone seems normal and in fact  
he pulls well to sit and will stand with support with the feet flat.  
Ventral suspension was normal and he responds well to stimuli.

/over ...

DR. A. P. NORMAN

34 GREAT ORANGE ST. STR. 2.  
WCVN 121

I am not entirely happy about his development and I am asking the Senior Clinical Psychologist, Mrs. Mary Lobascher, to see him with a view to more detailed developmental assessment. I am also asking Dr. David Grant to see him for advise on his growth as he is clearly a small *for date* baby who might also be deficient in growth hormone. I have arranged for a chest X-ray to be done and also a milk scan because of the possibility that he might have a trachio-oesophageal fistula responsible for the respiratory symptoms.

Yours sincerely,

Dr. D. Letting.

A. P. NORMAN

I saw this boy again today following his assessment by Mrs. Jones in the department of Physical Medicine and enclose a copy of her report. The X-ray of the hip showed both hip joints to be completely normal but at the request of your department I asked Mr. George Lloyd-Joberts to see Salis and he agreed that he has with moderate occasional pain and said that he considered it important that he would be seen again in one year or sixteen months time. I would be grateful, therefore, if you could arrange for his return to see me or Mr. Lloyd-Joberts in a year or so's time.

Yours sincerely,

A.P. Norman

Salim Al Hajeri : born 18:12:80  
Qatar Medical Department 8110074A

Dear Archie,

Thank you for asking me to see this baby who has had such a difficult time with recurrent respiratory infections. I quite agree that he is small for his age and that both his height (70cm) and weight (7.5kg) are near the third centile. However, there are no clinical stigmata of growth hormone deficiency, the bone age at the wrist is not retarded, and the boy has gained weight since you saw him a couple of weeks ago. I suspect that his small size is due to a combination of his recurrent illness and genetic factors, and I would not have been very keen to check on pituitary function unless there is a lot of family pressure to 'leave no stone unturned'. Quite clearly he is not hypothyroid.

I note that Salim has shown very slow motor development and was very hypotonic as a small baby. He had quite marked 'scissoring' of the legs with abductor spasm when I saw him and I wondered about the possibility of a mild spastic diplegia. His social development seemed to be excellent.

I hope that these comments are helpful,

Yours sincerely,

David

Dear Dr. Gotting,

Re: Salem Mohammed HAGRI, Aged 11 months  
QLS No: 8110074A

Thank you very much for asking me to see this infant. His mother tells me that he has been admitted to hospital on four occasions since the age of two months with high fever, cough and wheezing. At the age of 8 months he had an attack of diarrhoea from which he has now recovered though recently he has again had loose stools.

He is the only child of healthy parents who are distantly related.

Details of his mother's pregnancy are not definite but I understand he weighed 1100 grams at birth, though he only stayed in hospital for four days.

On examination he is, I am afraid, an obviously retarded child. Head circumference was normal at 43 cms and he had a normal facies apart from an intermittent internal squint. He was unable to sit unsupported and had very poor head posture when prone. Limb tone was not definitely increased but his hips were tight on abduction. He had a slight Harrison sulcus and prominence of the sternum. There was no finger clubbing and general examination was otherwise unremarkable.

Investigation results were as follows:

Haemoglobin 12.5 grams, WBC 15,700, 17% neutrophils, 81% lymphocytes, 2% eosinophils, ESR 4

Calcium 2.63 m.mols/l, phosphorous 2.55 m.mols/l, alk. phos. 177 IU/l

T4 161 n.mols/l, TSH 7.5 IU/l

Urine and plasma aminoacid chromatography both normal patterns

Lateral skull x-ray showed increased convolutional markings in the posterior vault but no abnormal calcification. The sella appeared normal

Chest x-ray - the heart and lungs are normal

Pelvis - rather valgus femoral necks but the capital epiphyses are reasonably contained in the acetabula. No evidence of rickets.

DR. STEPHEN HERMAN

116, HARLEY STREET,  
LONDON, W.1.

Salem Mohammed HAGRI (continued) -2- 13th November 1981

I explained to Mrs. Hagri that sadly Salem's major problem was his developmental delay rather than the recurrent chest infections. I have suggested that he could be admitted to Brooklands Nursing Home for approximately one week so that she could be given advice about his handling, management and stimulation and also to enable some further investigations including a CT brain scan to be obtained. I now understand however that Mrs. Hagri has requested a second opinion and so this arrangement has been cancelled. I would be glad if this report could be made available to whoever sees Salem, and if I can be of any further help in his management I would be delighted to do so.

Thank you once again for referring him,

Yours sincerely,

Stephen Herman, M.B., F.R.C.P., D.C.H.  
Consultant Paediatrician

Summary - an 11 month old child presenting with the problem of recurrent chest infections but unfortunately found to have considerable developmental delay. Initial investigations have been negative and I have suggested that he should be admitted for further investigation and advice about management to the Brooklands Nursing Home for one week but I understand his mother now wishes to have a further opinion.

### PHYSIOTHERAPY REPORT

30th November 1981

#### ASSESSMENT

1st baby. Weighed 3.5 kilos at birth. Did not cry for 5 days and had recurrent chest infections.

Now

Speech Vocalizing.

Hearing Appeared to have no problems.

Vision

I.Q. Very alert and interested in surroundings and very friendly.

Contractures and deformities

Some increase in tone in TA<sup>9</sup> but can passively d. flex to 90°.  
Abduction 20° only - rather tight.

Leg lengths Equal.

Muscle Tone Increased in lower limb.

Reflex Activity

Head control Good.

ATN+ Absent.

Moro Absent.

Protective extension Absent.

Grasp reflex Absent.

Motor patterns

Creeping along the floor.  
Pushing up on extended elbows.  
Rolling through 90°.  
He is unable to sit independently.  
Cannot balance on all four.  
No parachute reaction.  
No fine movement with fingers.  
This shows he lacks certain aspects of an 11 month old baby.

Dear Dr. Gotting,

Salim Al Hajeri, d.o.b. 18.12.80  
Qatar No. 8110074A

I saw this boy again today who has been much better since he came to London and has had little trouble with his chest. He was seen by Dr. David Grant who did not think that there was evidence of growth hormone deficiency because there were no clinical stigmata of this, bone age at the wrist is not retarded, and thought that his small size was a combination of recurrent illness and genetic factors.

He noted his slow motor development, hypotonia, and thought that there was a possibility of mild spastic diplegia.

I reassessed him today and think that his intelligence is probably within the limits of normal, he is alert and responds well, holds objects with a normal grasp, but he is slightly delayed in speech. He is certainly hypotonic and today ventral suspension gave a poor result with tendency to droop. When he is pulled from a prone position he tends to pull to the standing position in extension and occasionally shows scissoring. His knee jerks are brisk, plantar responses flexor.

There were a few coarse sounds in the chest and I wondered whether perhaps he is occasionally aspirating milk from the bottle especially as this is quite often given when he is in his cot, lying on his back, and he holds it himself. I have suggested to his mother that she does not do this and that she teaches him soon to drink from a spoon or cup rather than the bottle.

He is to see the Senior Psychologist tomorrow and is to be seen for physical assessment and advice on Monday. My assessment is that he is a small for dates child who may have had some damage to his brain from hypoxia during delivery or because of his failure to develop normally in utero may have had some previous damage to the brain. I think that intellectually

this is minimal and that he will be able to do most of the things that a normal child can do. I think that he also has mild to moderate cerebral palsey for which he will need exercises and encouragement and stimulation from his mother but that he should walk in a few months time with plenty of encouragement.

14th December, 1981.

Yours sincerely,

Psychological Report on : Salem Al Hajeri  
(d.o.b. 18.12.80). Qatar No: 8110074A.

This 11 month old child of unrelated parents living in Qatar was referred by Dr. Norman for developmental assessment. He is a boy whose birthweight was low at delivery and who has spent considerable periods in hospital on account of cough and respiratory problems.

Salem himself is a socially alert, smiling and responsive infant who was able to attend to the test for a period of 30 minutes. He was assessed on a number of developmental measures - The Bayley Scales of Infant Development; The Reynell Expressive and Comprehension Language Scale and the Vineland Social Maturity Scale.

On the Bayley Scales of Infant Development this boy is passing items at 6 to 8 months. He attends to scribbling, looks for fallen spoons and makes a playful response to a mirror. He has several words (baba, dada) but is still banging and mouthing objects.

On the Reynell Developmental Language Scale he gains an expressive language age of 9 months. He is using double syllabled sounds and is said to have 4 to 6 words. The comprehension language scales suggest that Salem is showing adaptive behaviour to familiar words and phrases, but is not yet selecting or identifying objects on naming.

On the Vineland Social Maturity Scale this child gains a social age of 9 months. He is sitting unsupported, pulls himself upright, moves about on the floor by crawling and grasps with thumb and finger. He does not drool. His food still requires to be liquidised and he is not as yet chewing.

Overall developmental level in terms of motor, language and social skills would appear to lie at about the 8 to 9 months range. In discussing Salem with Mr. Al Hajeri his father commented that he considered his son a trifle slow in that he felt other babies did a little bit more at the same age. There may be domestic factors which contribute to this boy's slight lag of skills in that both parents keep Salem at home because they are fearful to take him out in case he becomes ill. I discussed the need for stimulation and company of other children and adults, the need of interests from new environments and encouraged both parents to take Salem with them on social occasions. Also it must be remembered that this boy has been hospitalised for a considerable period of his infancy and this may also constitute a lack of stimulation.

It would be helpful to re-evaluate this child in another 12 months when it is hoped that developmental level will perhaps be age appropriate.

*Mary Lobascher*  
Mrs. Mary Lobascher,  
Principal Clinical Psychologist.

MEDICAL REPORT

Mr. Hassan Al Thani, aged 26, of Qatar, was examined in the National Institute of Gerontology and Geriatrics on November 21st, 1983.

From his antecedents we mention: appendectomy when he was 19 years old. Hypertrophy of conchas.

Physical examination reveals a patient with moderate overweight, with normally coloured integuments and maintained elasticity, cold extremities. Striations with pearl aspect on shoulders. Seborrhea of the hair on the head. Nails with maintained glitter.

Loco-motor apparatus: articulations of normal aspect. Crepitations of the great articulations movement.

Respiratory apparatus: partial nasal obstruction. Painfulness sinusal points. Normal lungs.

Cardio-vascular system: blood pressure = 125/75 mmHg. Cardiac rhythm = 64/min., regular. 1st reduplicated sound at bases. Permeable peripheral arteries.

Digestive apparatus: normal. Excretory apparatus: normal.

Quick periosteal-tendon reflexes of legs, much diminished in the upper limbs. Chvostek ++. Thyroid within normal limits.

Diagnosis: Chronic coryza.

Seborrhea.

Hypocalcemia.

Overweight.

Treatment:

- GEROVITAL - 2 tablets/day, 15 days/month, 1 tablet taken 1/2 hour after breakfast and 1 tablet 1/2 hour after midday-lunch.

Rest interval of 15 days and the patient repeats.

- GEROVITAL H3 hair lotion applied by massage of the skin on the head every second day. After 3 applications, the hair will be washed with Gerovital shampoo or Lelsun or with sulphur or tar soap. Wash hair only after 7 days.

Associated medication: Calcium Sandoz + Vitamin C 1000 -  
1 effervescent tablet/day, 10 days/month.

It is advisable: thyroid investigations and ORL control.

Monsieur,

Pour faire suite à votre lettre du 30.XI.1972, nous vous informons qu'à l'étranger il n'existe aucun centre où notre méthode de traitement soit appliquée.

Si vous voulez venir en Roumanie, alors nous vous recevrons avec plaisir dans notre clinique d'Otopeni, près de l'aéroport de Bucarest. Vous devez envisager un séjour d'environ deux semaines, quand seront effectuées toutes les analyses nécessaires, tests de laboratoire, sera commencé le traitement, qui sera continué à domicile, d'après nos prescriptions.

Le montant journalier est entre \$22-\$28 (ou le correspondant en francs), tout compris, pension complète en chambre avec salle de bains, traitement médical quotidien.

Vous pouvez faire tous vos arrangements par l'intermédiaire d'une agence de voyages, qui se charge d'assurer à forfait le voyage et le séjour; le visa s'obtient à l'aéroport ou à la frontière.

La prenotation doit être faire à l'agence O.N.T, "Carpati", bul. Magheru 7, Bucarest, 2-3 mois à l'avance.

Veillez agréer, Monsieur, l'expression de nos sentiments les meilleurs,

Prof.Dr. Anna Aslan  
Directeur de l'Institut de Gériatrie  
Bucarest

Monsieur le Directeur  
de l'Institut de  
GERIATRIE  
BUCAREST  
(ROMANIE)

Monsieur le Directeur,

Ayant l'intention de  
pratiquer une cure, dans  
un établissement pratiquant  
la méthode du Professeur  
Ana ASLAN, en juillet 1973  
Je vous serais obligé de  
bien vouloir me faire  
connaître si cela serait  
possible dans un de  
vos établissements en Rou-  
manie, et le prix de cette  
cure évalué en Francs Fran-  
çais.  
Par ailleurs pourriez  
vous me dire s'il existe

des centres pratiquant cette  
méthode, en Italie, en  
Suisse ou en Allemagne,  
et, dans l'affirmative, l'a-  
dresse d'un centre dans  
ces 3 pays, proche de la  
FRANCE.

Je précise que je suis  
célibe de 66 ans en bonne  
santé. Profession: Fonctionnaire  
à la retraite depuis 1962  
sans activité

Pour l'attente d'une  
réponse veuillez agréer,  
Monsieur le Directeur  
l'assurance de ma consi-  
dération distinguée

Monsieur,

Votre lettre vient de me parvenir avec un grand retard et je m'empresse de vous répondre.

Jointe une liste d'adresses d'où vous pouvez commander le Gérovital H3, notre produit, ainsi qu'un dépliant et les indications de traitement. Le traitement doit être fait sous surveillance médicale.

Veillez agréer, Monsieur, l'expression de mes sentiments les meilleurs.

Professeur D<sup>r</sup> Anna ASLAN  
Institut de Gériatrie  
9 St. Sifonăstirea Căldărușani  
Bucarest.

Cher Professeur,

J'ai lu avec intérêt la publicité autour de la cure de Gérovital, et j'y crois fermement à ses bienfaits aussi me trouvant dans l'impossibilité de me rendre à votre Institut j'aimerais savoir si un traitement ambulatoire et à grande distance me pouvait être prescrit par vos soins.

Dans l'affirmative je souhaiterais recevoir une documentation, et le coût tous frais compris de ce produit.

Dès réception de votre lettre je vous transmettrai ma commande.

Dans l'agréable attente de vous lire, je vous prie de croire, cher Professeur, en l'expression de mes sentiments respectueux.

E. Sifut
